The Work of Whiteness Helen

Morgan,2021-05-30 Whiteness is a politically constructed category which needs to be understood and dismantled because the system of racism so embedded within our society harms us all It has profound implications for human psychology an understanding of which is essential for supporting the movement for change This book explores these implications from a psychoanalytic and Jungian analytic perspective The fragility of whiteness the colour blind approach and the silencing process of disavowal as they develop in the childhood of white liberal families are considered as means of maintaining white privilege and racism A critique of the colonial roots of psychoanalytic theories of Freud and Jung leads to questioning the de linking of the individual from society in modern day analytic thinking The concept of the cultural complex is suggested as a

useful means of connecting the individual and the social Examples from the author's clinical practice as well as from public life are used to illustrate the argument Relatively few black people join the psychoanalytic profession and those who do describe training and membership as a difficult and painful process How racism operates in clinical work supervision and our institutions is explored and whilst it can seem an intractable problem proposals are given for ways forward This book will be of great importance to psychoanalysts psychotherapists social workers and all those with an interest in the role of white privilege on mental health **Modern Organizations and Emerging Conundrums** Richard Alan Goodman, 1999-01-01

The contributors to this book review the postindustrial subculture emphasizing cross disciplinary and cross contextual inquiry a central idiom of postindustrial organizational life The essays consider alternative methods of understanding media that add variety to meanings within and without organizations This multi method approach in the search for meaning and the limits of word and symbols to express meaning generates a personally interpretive basis to science **Rethinking Social**

Policy Gail Lewis, Sharon Gewirtz, John Clarke, 2000-03-28 Rethinking Social Policy is a comprehensive introduction to and analysis of the complex mixture of problems and possibilities within the study of social policy Contributors at the cutting edge of social policy analysis reflect upon the implications of new social and theoretical movements for welfare and the study of social policy Topics covered include criminology and crime control race class and gender poverty and sexuality the body and the emotions violence work and welfare in Europe Examples are drawn from a variety of welfare sectors such as social services and community care health education employment and criminal justice This is a course reader for The Open University course D860 Rethinking Social Practice Relocation, Gender and Emotion Sue Jervis, 2018-04-17 This book has

two main aims firstly to provide a rare detailed description of the use of a psychoanalytically informed reflexive research method to achieve an in depth understanding of social phenomena and secondly to throw some much needed light onto the complex intrapsychic and interpersonal influences that impact upon military wives who accompany members of the British Armed Forces to postings overseas These arguments are particularly relevant at a time when the military is over stretched given that unhappy wives can adversely affect the retention of servicemen This is an important contribution to the on going development of psycho social studies Collective Emotions Christian von Scheve, Mikko Salmella, 2014-01-30 Although collective emotions have a long tradition in scientific inquiry for instance in mass psychology and the sociology of rituals and social movements their importance for individuals and the social world has never been more obvious than in the past decades The Arab Spring revolution the Occupy Wall Street movement and mass gatherings at music festivals or mega sports events clearly show the impact collective emotions have both in terms of driving conflict and in uniting people But these examples only show the most obvious and evident forms of collective emotions Others are more subtle although less important shared moods emotional atmospheres and intergroup emotions are part and parcel of our social life Although these phenomena go hand in hand with any formation of sociality they are little understood Moreover there still is a large gap in our

understanding of individual emotions on the one hand and collective emotional phenomena on the other hand This book presents a comprehensive overview of contemporary theories and research on collective emotions It spans several disciplines and brings together for the first time various strands of inquiry and up to date research in the study of collective emotions and related phenomena In focusing on conceptual theoretical and methodological issues in collective emotion research the volume narrows the gap between the wealth of studies on individual emotions and inquiries into collective emotions The book catches up with a renewed interest into the collective dimensions of emotions and their close relatives for example emotional climates atmospheres communities and intergroup emotions This interest is propelled by a more general increase in research on the social and interpersonal aspects of emotion on the one hand and by trends in philosophy and cognitive science towards refined conceptual analyses of collective entities and the collective properties of cognition on the other hand The book includes sections on Conceptual Perspectives Collective Emotion in Face to Face Interactions The Social Relational Dimension of Collective Emotion The Social Consequences of Collective Emotions Group Based and Intergroup Emotion Rituals Movements and Social Organization and Collective Emotions in Online Social Systems Including contributions from psychologists philosophers sociologists and neuroscience this volume is a unique and valuable contribution to the affective sciences literature

Researching Beneath the Surface Simon Clarke, Paul Hoggett, 2019-06-06 This book offers an overview of the rapidly expanding field of Psycho Social research Drawing on aspects of discourse psychology continental philosophy and anthropological and neuro scientific understandings of the emotions psycho social studies has emerged as an embryonic new paradigm in the human sciences Psycho social studies uses psychoanalytic concepts and principles to illuminate core issues within the social sciences The present volume contributes to the development of the new research methodologies in a number of ways It is written largely from the point of view of practitioners who are also researchers Although contributors draw largely upon object relations traditions in psychoanalysis other influences are also present particularly from continental philosophy and the sociology of the emotions It develops an approach to epistemology how we know what we know which is strongly informed by a living approach to psychoanalysis not just as a theory but as a way of being in the world that is as a stance

Shadows of Power Jean Hillier, 2003-09-02 Shadows of Power examines public policy and in particular the communicative processes of policy and decision making It explores the important who how and why issues of policy decisions Who really takes the decisions How are they arrived at and why were such processes used What relations of power may be revealed between the various participants Using stories from planning practices this book shows that local planning decisions particularly those which involve consideration of issues of public space cannot be understood separately from the socially constructed subjective territorial identities meanings and values of the local people and the planners concerned Nor can it be fully represented as a linear planning process concentrating on traditional planning policy making and decision making ideas of survey analysis plan or officer recommendation council decision

implementation Such notions assume that policy and decision making proceed in a relatively technocratic and value neutral unidirectional step wise process towards a finite end point In this book Jean Hiller explores ways in which different values and mind sets may affect planning outcomes and relate to systemic power structures By unpacking these and bring them together as influences on participants communication she reveals influences at work in decision making processes that were previously invisible If planning theory is to be of real use to practitioners it needs to address practice as it is actually encountered in the worlds of planning officers and elected representatives Hillier shed light on the shadows so that practitioners may be better able to understand the circumstances in which they find themselves and act more effectively in what is in reality a messy highly politicised decision making process *The Political Psyche* Andrew Samuels,2015-09-21

What can depth psychology and politics offer each other In *The Political Psyche* Andrew Samuels shows how the inner journey of analysis and psychotherapy and the passionate political convictions of the outer world are linked He brings an acute psychological perspective to bear on public themes such as the market economy environmentalism nationalism and anti-Semitism But true to his aim of setting in motion a two way process between depth psychology and politics he also lays bare the hidden politics of the father the male body and of men s issues generally A special feature of the book is an international survey into what analysts and psychotherapists do when their patients clients bring overtly political material into the clinical setting The results including what the respondents reveal about their own political attitudes destabilize any preconceived notions about the political sensitivity of analysis and psychotherapy This Classic Edition of the book includes a new introduction by Andrew Samuels **Marxism and Psychoanalysis** David Pavon-Cuellar,2016-12-19

The methods developed by Freud and Marx have enabled a range of scholars to critically reflect upon the ideological underpinnings of modern and now postmodern or hypermodern western societies In this intriguing book the discipline of psychology itself is screened through the twin dynamics of Marxism and psychoanalysis David Pav n Cu llar asks to what extent the terms concerns and goals of psychology reflect in fact the dominant bourgeois ideology that has allowed it to flourish The book charts a gradual psychologization within society and culture dating from the nineteenth century and examines how the tacit ideals within mainstream psychology creating good citizens or productive workers sit uneasily against Marx and Freud s ambitions of revealing fault lines and contradictions within individualist and consumer oriented structures The positivist aspiration of psychology to become a natural science has been the source of extensive debate critical voices asserting the social and cultural contexts through which the human mind and behaviour should be understood This challenging new book provides another voice that in addressing two of the most influential intellectual traditions of the past 150 years widens the debate still further to examine the foundations of psychology
