Partisans of Error Michael Davies, 1983-01-01 This book has the modest aim of explaining why Modernism is the most dangerous of all heresies and the steps taken by St Pius X to suppress it The author rarely refers to the contemporary Church and yet on page after page the reader will cry out But this is just what is happening today Those who read this book will know all they need to know about Modernism and will certainly understand why they have a duty to help defend the Faith against it

An Heretical Heir Of The Enlightenment Harry Redner, 2019-03-11 This is primarily but not exclusively a book on Lindblom All the pieces in it bear on his work either as direct commentary on it or criticism of it or as extensions of his ideas But at the same time every piece follows the trajectory of its own ideas into the subject matter in which it delves And these subjects are many and varied Indeed the prime purpose of this volume is to make the broad public aware of the full scope and amplitude of Lindblom's thought and to convey something of the inner coherence that governs it Anyone who has previously encountered Lindblom only in one manifestation of his multifaceted mind might be surprised to learn that there are so many other facets as well Merely to list the disciplines to which he has contributed threatens to extend into an academic catalogue of ships But the truth is that his work is not docilely academic it refuses to lie down neatly and supinely into the procrustean beds of the established disciplines Like his closest predecessor Veblen he offers a comprehensive treatment of social reality as a whole together with something of the same heretical thrust against the academic establishment

Islam, Christianity and Tradition Ian Richard Netton, 2006-12-22 Offers a unique comparative exploration of the role of tradition in Islam and Christianity The idea of tradition has enjoyed a variety of senses and definitions in Islam and Christianity but both have

cleaved at certain times to a supposedly golden age of tradition from the past The author suggests there has been a chain of thinkers from classical Islam to the twentieth century who share a common interest in *ijtihad* or independent thinking Drawing on past and present evidence and using Christian tradition as a focus for contrast and comparison the author highlights the seemingly paradoxical harmony between tradition and *ijtihad* in Islam The author draws on a variety of primary and secondary sources including contemporary newspaper and journal

Partisan Hearts and Minds Donald P. Green, Bradley Palmquist, Eric Schickler, 2004-01-01 A treatment of party identification in which three political scientists argue that identification with political parties powerfully determines how citizens look at politics and cast their ballots They build a case for the continuing theoretical and political significance of partisan identities

The Third World Council James Chrystal, 1904

Partisan Linkages in Southern Politics Michael A. Maggiotto, Gary D. Wekkin, 2000 Interpreting extensive data gathered in eleven southern states during the 1992 presidential election this book addresses a critical question about the democratic process Do political parties still have a meaningful role to play in linking government and the governed While some observers have written off modern parties arguing that they have been supplanted by political action committees social movements candidate organizations and the like Michael Maggiotto and Gary Wekkin find that parties remain viable mediators between the wishes and values of the electorate and the policy behavior of those whom they elect The authors base their conclusions on surveys conducted among a wide range of southern political participants in the 1992 election from the eligible electorate to those constituting the various party elites such as chairs and members of party committees and delegates to the national conventions In analyzing the data the authors proceed in three steps First they define party masses by party identification and expected vote and compare them to party elites using demographic socioeconomic and ideological factors Second they identify issue and ideological connections between party elites and masses Third they contextualize their findings by exploring the various political and socioeconomic environments within which elite mass interaction occurs This study is valuable for several reasons Its southern focus adds to our understanding of a dynamic political culture in which patterns of party competition and loyalty have changed rapidly in recent decades Also it is the first such study to take into account the influence of demographic institutional and cultural variables on the ways in which parties cohere on issues Finally it reaches some intriguing conclusions The authors find for example that issue congruence within parties often has as much to do with internal factors such as the strength of the party organization as it does with external variables such as race religion or level of education In illuminating the continuing vitality of partisanship in American political life this book will be studied and debated for years to come The Authors Michael A Maggiotto is professor of political science and dean of the School of Letters and Sciences at the State University of New York Brockport He is co editor with Gary D Wekkin Donald E Whistler and Michael A Kelley of *Building Democracy in One Party Systems* Gary D Wekkin is professor of political science at the University of Central Arkansas and author of *Democrat versus Democrat The National Party's Campaign to Close the*
