**Business and Non-profit Organizations Facing Increased Competition and Growing Customers' Demands** Adam Nalepka, Anna Ujwary-Gil, 2017 From the perspective of commercial and non commercial organizations this monograph with contemporary organizational and management problems focus on four thematic areas Traditionally the first one is concentrating the reader's attention on the internal aspects of the organization's functioning as an object of research In this regard articles related to the concept of corporate social responsibility in two ways organizational research and bibliometric analysis The authors used an analogical bibliometric approach to examine trends in publishing for the concept of learning organizations In this part of the discussion the social aspect has been strongly displayed also thanks to the social capital and enterprise Another topic in this section is the role of the workers knowledge in creating innovative solutions emphasizing the role of trust and culture rich collaboration between employees employees participation in creating projects and organizational change In addition it discusses the role of information and knowledge networks and sharing knowledge among employees which does remain without influence on the shaping of

individual employees careers Slightly different from the other articles though set in this section there is an article referring to the organizational pathology These considerations are much more valuable usually because of the difficult access to negative information The next section presents articles in the context of the modern tools used in the management of commercial and non commercial organizations This part of the discussion starts an article about forecasting methods and modern models of business management In opposition to these considerations the problem of unused modern management methods in the local government sector remains valid Also it refers to social media as a source of customer knowledge and management control which should be considered as a strong and innovative determinant influencing the development of contemporary management methods of a modern enterprise Interesting considerations are included in the article on the process management with emphasis on the dynamic management of business processes and IT systems that go with it The other articles present the concepts of the risk management model in a technology project business model used in franchising and the concept of accountability in conjunction with the development of innovation thanks to negotiating the role of intellectual capital The modern market economy forces organizations to develop their ability to adapt to the conditions by improving their organization continually It shows how modern day commercial and non commercial organizations are competing in a competitive market This section opens the article referring to the social competences of students developed during their studies and the competences of the future which were studied and compared in two universities The integral part of the organization s functioning of the organization in the environment is their broadly understood cooperation for the implementation of the objectives and achieving a competitive advantage in the market This trend covers articles referring to the participation of county in networking modeling synergistic interrelations within the business association or the conditions that should be met between enterprises and institutions supporting the technological development of the organization Other considerations concern customer preferences concerning their choice of commercial banks the factors that determine the choice of financial instruments by small and medium enterprises or the demands of sustainable family business development The final part of the articles is related to a broader perspective and so the functioning of the organization from a sectoral perspective and across industries A distinctive feature is a sectoral approach to knowledge based business services the determinants of knowledge based products in the pharmaceutical industry and the behavior of competing companies in the chocolate and confectionery industry A separate topic in this section is the concept of capturing value or the value in a sectoral approach The issues related to the protection of personal data in the healthcare sector patent activity of enterprises in the technology park as well as the management of resources in the cluster The prepared monograph is an interdisciplinary compendium of knowledge on the functioning of both commercial and non commercial organizations in the context of three perspectives micro meso and macro The advantage of this type of studies is modern and up to date look at the problems of management organization behavior or the functioning of the organizations in the sector

**Strategies for e-Business**

Tawfik Jelassi, Francisco J. Martínez-López, 2020-06-28 This is the fourth edition of a unique textbook that provides extensive coverage of the evolution the current state and the practice of e business strategies It provides a solid introduction to understanding e business and e commerce by combining fundamental concepts and application models with practice based case studies An ideal classroom companion for business schools the authors use their extensive knowledge to show how corporate strategy can imbibe and thrive by adopting vibrant e business frameworks with proper tools Students will gain a thorough knowledge of developing electronic and mobile commerce strategies and the methods to deal with these issues and challenges Sustainability Challenges and Solutions at the Base of the Pyramid Prabhu Kandachar, Minna

Halme, 2017-09-08 Around the turn of the millennium it had become painfully evident that development aid charity or global business as usual were not going to be the mechanisms to alleviate global poverty Today there is little dispute that poverty remains the most pressing global problem calling for innovative solutions One recent strategy is the Base of the Pyramid BoP concept developed by Prahalad and Hart which relies on entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged It is a process requiring innovations in several disciplines technological social and business This book covers a number of areas First much of the current BoP discussion emphasises targeting products to the needs of the poor But do we actually know what the real needs of the poor are This book takes a bottom up human centred approach and examines examples that truly engage the poor in BoP product and service development What types of needs assessment methodologies are indicated considering the cultural differences in BoP countries Are the existing methodologies adequate Do they need to be redefined and redeveloped Second the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem Tragically the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages climate change or the destruction of habitats While the economic welfare of the poor is critical the BoP approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability The link between the BoP approach and sustainable development is a key feature of this book Third it looks at innovation and asks what kinds of bottom up innovation open source technological social and business support BoP initiatives and sustainable development Fourth the book deals with the relationship between development assistance and BoP Is a BoP strategy the antithesis to development aid or can these two co exist or even complement each other Finally the book raises questions about the relationship between corporate responsibility and BoP Is BoP a new form of corporate neo colonialism or a new form of corporate responsibility Although the BoP concept has unleashed an extensive and generally enthusiastic response from academics businesses NGOs and governments the knowledge domain around this concept is still in the early stages of development This book addresses that need with a focus on the needs of the end users the poor as a starting point for BoP products and innovations With contributions from both supporters and critics it provides a treasure trove of global knowledge on how the concept has

developed what its successes and failures have been and what promise it holds as a long term strategy for alleviating poverty and tackling global sustainability

**The Business Developer's Playbook** Peter Nixon, 2018-09-18 This book is not about selling products it is about selling yourself your ideas and your services This book explains an innovative dialogue sales process and the relationship sales principles that underpin it In every sales situation there is both a seller and a buyer and at different times either the buyer or the seller may take the lead The dance they perform may or may not lead to a deal but it will leave them knowing a little more about each other's strengths and weaknesses These two dancers are connected and follow the same steps The five steps they follow are to plan connect dialogue record and follow up The five steps are the basis of the dialogue process In addition this book provides easy to follow guidance for three groups of people 1 Professionals wanting to sell their services and improve their business development 2 Thought leaders change agents innovators entrepreneurs senior public servants and advocates wanting to sell their ideas to others 3 Mid career job seekers and recent graduates aiming to sell themselves into a dream job role either full or part time
