Partners Of The Heart:

Partners of the Heart Vivien Thomas,1995 **Mending a Shattered Heart** Stefanie Carnes,2011 Practical advice on how to deal with the trauma of discovering that one's spouse or partner is a sex addict *Facing Heartbreak* Stefanie Carnes,Mari A. Lee,Anthony D. Rodriguez,2012-10-16 The first workbook to help partners of sex addicts cope with discovering their loved one has compulsive sexual behaviors *Partners of the Heart* Vivien T. Thomas,1998-01-29 Visitors to the Blalock Building at the Johns Hopkins University Medical Center are greeted by portraits of two great men One of renowned heart surgeon Alfred Blalock speaks for itself The other of highschool graduate Vivien Thomas is testimony to the incredible genius and determination of the first black man to hold a professional position at one of America's premier medical institutions Thomas's dreams of attending medical school were dashed when the Depression hit After spending some time as a carpenter's apprentice Thomas took what he expected to be a temporary job as a technician in Blalock's lab The two men soon became partners and together invented the field of cardiac surgery *Partners of the Heart* is Thomas's extraordinary autobiography Trained in laboratory techniques by Alfred Blalock and Joseph W Beard Thomas remained Blalock's principal technician and laboratory chief for the rest of Blalock's distinguished career Thomas very rapidly learned to perform surgery to do chemical determinations and to carry out physiologic studies He became a phenomenal technician and was able to carry out complicated experimental cardiac operations totally unassisted and to devise new ones In addition to telling Thomas's life story *Partners of the Heart* traces the beginnings of modern cardiac surgery crucial investigations into the nature of shock and Blalock's methods of training surgeons **Archaeologies of the Heart** Kisha Supernant,Jane Eva Baxter,Natasha Lyons,Sonya Atalay,2020-02-13 Archaeological practice is currently shifting in response to feminist indigenous activist community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world to be studied and that humans must remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work

and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline

vantage point today In recent years medical science has mapped the human genome deployed robotic tools to perform delicate surgeries and developed effective vaccines against a host of deadly pathogens But this transformation could not have happened without the game changing vision talent and dedication of a small cadre of individuals who were willing to commit body and soul to the advancement of medical science education and treatment A Scientific Revolution recounts the stories of John Shaw Billings Max Br del Mary Elizabeth Garrett William Halsted Jesse Lazear Dorothy Reed Mendenhall William Osler Helen Taussig Vivien Thomas and William Welch This chorus of lives tells a compelling tale not just of their individual struggles but how personal and societal issues went hand in hand with the advancement of medicine **Blue Ocean**
