Partners In Learning Teachers And Children In Reading Recovery:

Partners in Learning Carol A. Lyons, Gay Su Pinnell, Diane E. DeFord, 1993 Reading Recovery a focused one on one program for children who have difficulty learning to read has shown an astounding level of effectiveness for a relatively new educational intervention In Partners in Learning Teachers and Children in Reading Recovery authors Carol A Lyons Gay Su Pinnell and Diane E DeFord look thoroughly at this effective new program the results of which have shown a greater than 90% success rate at raising at risk learners to an average level of literacy in approximately 16 to 20 weeks of individualized instruction Literacy Lessons Designed for Individuals: Teaching procedures Marie M. Clay, 2005 Responding to the wealth of new evidence on reading and teaching that s appeared since the publication of Reading Recovery Marie Clay has revised and updated her classic Expanded into two new volumes and renamed Literacy Lessons this powerful pair of companion books will help teachers and administrators understand and implement Reading Recovery New features include new teaching procedures based on crossdisciplinary research implementations from a variety of international settings and in three languages new emphases on oral language early writing phonemic awareness and spelling updated lists of reading books

Preventing Reading Difficulties in Young Children National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Prevention of Reading Difficulties in Young Children, 1998-07-22 While most children learn to read fairly well there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive technology driven society This book explores the problem within the context of social historical cultural and biological factors Recommendations address the identification of groups of children at risk effective instruction for the preschool and early grades effective approaches to dialects and bilingualism the importance of these findings for the professional development of teachers and gaps that remain in our understanding of how children learn to read Implications for parents teachers schools communities the media and government at all levels are discussed The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field In a clear and readable narrative word identification comprehension and other processes in normal reading development are discussed Against the background of normal progress Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades including evaluation of philosophies systems and materials commonly used to teach reading

Thinking Through the Curriculum Robert Burden, Marion Williams, 2002-01-04 This book tackles the contentious issue of whether and how thinking should be taught in schools It explores how best to help children become effective thinkers and learners The book also examines whether there is one set of underlying cognitive skills and strategies which can be applied across all the curriculum subjects and beyond Its main thrust however is a detailed examination of approaches to developing cognitive skills which are specific to the National Curriculum

The book provides chapters from both generalists and subject specialists to illustrate how teachers in different subject areas can benefit from taking a cognitive approach to their subject. It will give teachers a clear understanding of different approaches to teaching thinking and how these fit together.

Instructional Models in Reading Steven A. Stahl, David A. Hayes, 2013-04-03 This book started with a simple idea: examine models of reading instruction that have emerged during the past 20 years. These models span a wide range of instruction, representing a continuum from highly structured task-analytic instruction to child-centered and holistic instruction. Each model has its own epistemology or views on how reading and instruction are to be defined. The different epistemologies indicate different principles of instruction, which in turn indicate different practices in the classroom. Each model is also supported by a different research base. In this volume, leading proponents of these different models discuss their ideas about reading instruction, thereby encouraging readers to make their own comparisons and contrasts. The chapter authors seem to adopt the editors' eclectic approach to some greater or lesser extent, incorporating aspects of other models into their instruction as they see other goals. Thus, models of reading instruction are complex. Complicating matters further is the fact that teachers hold their own models of reading, which may or may not be congruent with those discussed here. Although academically developed models influence college preservice and in-service instruction, teachers' own models of reading filter the information that they take from what they learn from these perspectives. By carefully examining these variables, this book makes a firm contribution toward disciplined inquiry into what it means to teach reading.

The Administration and Supervision of Reading Programs Shelley B. Wepner, Joan T. Feeley, Dorothy S. Strickland, 2002 Now in its Third Edition, this popular textbook offers valuable information about administering effective reading programs from the pre-elementary through the college level. All chapters have been revised to include the most current information, trends, and research, and a new chapter has been added on college/university reading programs.

Every Young Child a Reader Sharan A. Gibson, Barbara Moss, 2016 This resource will help K-2 teachers revitalize and restructure their classroom literacy instruction based on Marie Clay's groundbreaking and transformative literacy processing theory. Clay's theories have created literacy success for more than 2 million struggling first-grade readers in the United States and internationally through the Reading Recovery program. This practical volume gives primary grade teachers specific suggestions for using these principles and includes rich, robust instructional examples to ensure that all children meet new and rigorous standards in all facets of literacy learning. Replete with explicit depictions of classroom practice, the book addresses the following critical aspects of K-2 literacy instruction: Teaching foundational skills in brief skills lessons and as children learn strategic activity to read and write text; Teaching for children's fast progress in increasingly complex literacy tasks; Understanding the role of complex, frustration instructional, familiar and easy texts in reading instruction; Teaching for knowledge building, comprehension, and writing for narrative and informational text. Reader-friendly chapters include Focus questions to target readers' anticipation of topics discussed; Illustrative examples of powerful teacher-student

interaction Connections between Clay s comprehensive theory of children s literacy development literacy standards and children s fast progress to literacy proficiency The combination of Marie Clay s research and theory with the authors understanding of these principles in today s classroom is what sets this book apart Lisa Lenhart director Center for Literacy Curricular Instructional Studies The University of Akron Gibson and Moss provide a resource for classroom teachers to support the continued learning of all their students especially those who need an aware and skilled teacher to keep them on track across the primary grades Robert M Schwartz professor Oakland University and trainer of teacher leaders Reading Recovery Center for Michigan This comprehensive and well designed book will be an excellent professional development resource for classroom teachers Reading Recovery teachers literacy coaches specialists and site administrators Kathleen Brown Reading Recovery teacher leader Long Beach Unified School District CA I am eager to use this book with my colleagues as we work to transform early literacy learning in our primary classrooms Terry MacIntyre Reading Recovery teacher leader Boulder Valley School District CO Literacy David Wray,2004 This four volume collection reprints key debates about exactly what it means to be literate and how literacy can best be taught Rather than centering on the emotional reaction of mass media debates this set focuses on research findings into processes and pedagogy The themes covered include Literacy its nature and its teaching Reading processes and teaching Writing processes and teaching and New Literacies the impact of technologies *Handbook of Research on Teacher Education* John P. Sikula,Association of Teacher Educators,1996 The first edition of this text sought to provide a basis for improving the education of teachers at every level Committed to the idea that the betterment of teacher education is essential to the improvement of schools it provided understanding of the research so that professionals could compare evaluate and create effective programmes
