**The Social Organization of Disease** Jochen Kleres, 2017-07-06 Empirically this book is a case study analysis of dissolution processes in German AIDS organizations. Indeed, why is it that civic organizers start out with a commitment to a cause but end up dissolving their organization? This question is exactly what Kleres seeks to tackle within *The Social Organization of Disease*. Focusing on the emotional bases of dissolved German AIDS organizations to develop a typology of civic action and organizing, Kleres presents a perspective on non-profit organizations that analyses organizational development through the emotional sense-making of individual organizers within the light of larger political processes and cultural contexts. To this end, this volume develops and applies a new methodology for researching emotions empirically, expanding the scope of narrative analysis. However, parallel to this, *The Social Organization of Disease* also explores how shifting discursive processes establish emotional climates and thus impact on state policies and the evolution of AIDS organizing. The book would appeal to sociologists and political scientists working in the field of social movements and non-profit organisations but it would also appeal to those who are interested in the sociology of emotions. It would potentially be of interest to non-profit scholars who consider community-based organizations, volunteerism and advocacy and secondarily to medical sociologists interested in AIDS service organizations. Sociology, International relations, Social Work, Political Science. May be of interest for NGO activists and/or employees and leadership.

**Contested Epidemics: Policy Responses In Brazil And The Us And What The Brics Can Learn** Eduardo J Gomez, 2014-09-17 Despite their similar political and economic structures, Brazil and the United States have contrasting relationships with the international community as well as different policy approaches to the prevention and treatment of epidemics. In this regard, an interesting empirical puzzle arises: how and why was Brazil able to outpace the United States in its health policy response to epidemics? The aim of this book is to introduce a new comparative area of scholarly research combining for the first time international relations and domestic institutional theory to examine the United States and Brazil's health policy systems and their respective responses to epidemics. Conclusions are drawn from an in-depth examination of the actions taken and policies made with regard to tuberculosis, polio and HIV/AIDS epidemics in the two countries. Finally, the questions of what emerging BRICS nations can learn from the case of Brazil and to what extent they can adopt Brazil's innovative institutional and policy response to epidemics is considered with a look to the future of global health diplomacy. This is the first book of its kind to compare the United States and Brazil in such a way as well as the first to consider what other emerging BRICS countries can learn from Brazil. This fascinating comparison is a must-read for health policy and medical practitioners, academic scholars and students and the general public with an interest in the international and

domestic political conditions leading to policy adoption and implementation      **Restoring Civil Societies** Kai J. Jonas, Thomas A. Morton, 2012-08-08 Breakdowns in civil societies can be catalyzed by factors ranging from war and genocide to natural disaster disease and economic downturns *Restoring Civil Societies* examines social processes related to civic engagement in the wake of these societal ruptures The authors show how crises in civil society can be both pervasive and localized broad based and limited to defined social sub groups Whatever their scale *Restoring Civil Societies* identifies models that analyze the social psychology of crises in order to devise ways of re activating civic engagement and safeguarding civil society Focusing on these positive interventions the authors identify a number of key strategies ranging from the simplicity and directness of bystander interventions to the volunteer armies mobilized in the wake of natural disasters They include collective action organized to redress systemic inequalities and the vital healing role played by truth commissions in Rwanda and elsewhere *Restoring Civil Societies* fills the gap between basic research on social issues and translation into social policies and programs an area which in light of current economic and social unrest is more important now than ever      *The Psychology of Prosocial Behavior* Stefan Stürmer, Mark Snyder, 2009-10-08 The Psychology of Prosocial Behavior provides original contributions that examine current perspectives and promising directions for future research on helping behaviors and related core issues Covers contributions which deal explicitly with interventions designed to foster out group helping and to improve its quality in real world settings Provides the reader with a cohesive look at helping and prosocial behaviors using a combination of theoretical work with research on interventions in applied settings Examines helping from multiple perspectives in order to recognize the diverse influences that promote actions for the benefit of others Contributors to this volume include cutting edge researchers using both field studies and laboratory experiments      **Contemporary Readings in Globalization** Scott Sernau, 2008 Cutting edge reader featuring a diverse selection of edited and prefaced articles from both the academic and non academic press      **Thinking Politically about HIV** Kent Buse, Dennis Altman, 2016-04-08 AIDS has a unique political history As fears grew of a global pandemic on the scale of AIDS in sub Saharan Africa AIDS was briefly treated as an issue of high politics in the international arena and generated significant resources for country programmes That initial commitment is now declining and if AIDS is to maintain its visibility and contribution to global solidarity human rights and dignity its politics will have to evolve to reflect the profound geo political economic and social transformations underway today This volume brings together leading scholars from a variety of disciplines who work at the intersection of politics and HIV They reflect on the lessons learned from the past thirty years of the politics of AIDS and how political science writ large can further contribute to the understanding and practice of political mobilization around AIDS Through case studies and analysis new insights into identity politics and social movements in countries as diverse as Brazil Switzerland Vietnam and Zambia are offered alongside new approaches to understanding the determinants and incentives which generate political will and commitment This book was published as a special issue of

Contemporary Politics      The Anthropology of AIDS Patricia Whelehan, 2009 The Anthropology of AIDS synthesizes data from anthropology psychology sociology biology and medicine and incorporates the author's more than two decades of work as a medical anthropologist HIV test counselor and sex therapist Designed for use in a range of college courses this volume combines a solid introduction to the epidemiology of HIV and AIDS with a wealth of material exploring the cross cultural societal impact of the disease      *Without Condoms* Michael Shernoff, 2013-01-22 After years of activism risk awareness and AIDS prevention increasing numbers of gay men are not using condoms and new infections of HIV are on the rise Using case studies and exhaustive survey research this timely groundbreaking book allows men who have unprotected sex a practice now known as barebacking to speak for themselves on their willingness to risk it all Without Condoms takes a balanced look at the profound needs that are met by this seemingly reckless behavior while at the same time exposing the role that both the Internet and club drugs like crystal methamphetamine play in facilitating high risk sexual encounters The result is a compassionate sophisticated and nuanced insight into what for many people is one of the most perplexing aspects of today's gay male culture and life style Michael Shernoff digs deep and forces us to see that the AIDS epidemic is not over We must now ask the hard questions and listen to the voices that answer The stakes are too high to ignore      **Diskriminierung und Toleranz** Andreas Beelmann, Kai J.
