Partnership Power:

The Power of Partnership Riane Eisler, 2010-09-03 Based on the research that brought international recognition to Riane Eisler's groundbreaking work *The Chalice and the Blade* but addressing the world as it is today *The Power of Partnership* offers inspiration and guidance for moving to the better lives we yearn for Eisler offers us a new lens a new paradigm for seeing the world and living in it The Partnership Model which emphasizes mutual respect and a fundamental awareness of the sacredness of all life creates a solid foundation for families businesses communities and the world In contrast the suffocating paradigm that has guided much of recorded history what Eisler calls the Domination Model has led individuals and groups acting out of fear to oppress women wage war terrorize and subjugate others Using these simple yet far reaching models Eisler shows how political and personal relationships based on domination inevitably result in misery and violence while those founded on partnership foster respect love and an explosion of creativity *Spiritual Partnership* Gary Zukav, 2010-04-23 In his first major book since the legendary bestseller *The Seat of the Soul* Gary Zukav reveals a revolutionary new path for spiritual growth What began with an introduction to a major paradigm shift in *The Dancing Wu Li Masters* turned into a discussion of aligning our personalities with our soul in *The Seat of the Soul* finally in *Spiritual Partnership* Zukav guides the reader on this practical path to authentic power International Aid to Education Francine Menashy, 2019 Partnerships are now pervasive in global education and development but are they creating equitable cooperative and positive relationships Through case studies of prominent multistakeholder partnerships including the Education Cannot Wait Fund and Global Partnership for Education as well as a comprehensive analysis of the global education network this book exposes clear power imbalances that persist in the international aid environment The author reveals how actors and organizations from high income countries continue to wield disproportionate influence while the private sector holds a growing degree of authority in public policy circles In light of such evidence this book questions if partnerships truly ameliorate power asymmetries or if they instead reproduce the precise inequities they are meant to eliminate The use of partnerships for international aid and development has become ubiquitous and their value has been too little questioned For education Francine Menashy's book remedies this with a detailed probing analysis of such partnerships in theory and practice From the Foreword by Steven J Klees University of Maryland International Aid to Education is an urgent read for anyone working in international development Menashy's work points to ways in which all of us working in research policy and practice can rethink our own roles in perpetuating power imbalances and inequities Sarah Dryden Peterson Harvard Graduate School of Education Francine Menashy's new book provides a fresh and innovative take on power and politics within multistakeholder partnerships in international development It makes a strong new contribution to the study of global governance and education policy Karen Mundy chief technical officer Global Partnership for Education *Emerging Powers and the UN* Thomas Weiss, Adriana Abdenur, 2018-11-08 The post 2015 goals and the changing

environment of development cooperation will demand a renewed and strengthened UN development system In line with their increasing significance as economic powers a growing number of emerging nations will play an expanded role in the UN development system These roles will take the form of growing financial contributions to individual organizations greater weight in governance structures higher staff representation a stronger voice in development deliberations and a greater overall influence on the UN development agenda Emerging Powers and the UN explores in depth the relationship of these countries with and their role in the future UN development system Formally the relationship is through representation as member states first UN and UN staff second UN However the importance of the non public sector interests third UN of emerging economies is also growing through private sponsorship and NGO activities in development This book was originally published as a special issue of Third World Quarterly

Revolutionary Power Shalanda Baker, 2021-01-14 In September 2017 Hurricane Maria hit Puerto Rico completely upending the energy grid of the small island The nearly year long power outage that followed vividly shows how the new climate reality intersects with race and access to energy The island is home to brown and black US citizens who lack the political power of those living in the continental US As the world continues to warm and storms like Maria become more commonplace it is critical that we rethink our current energy system to enable reliable locally produced and locally controlled energy without replicating the current structures of power and control In Revolutionary Power Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity She argues that people of color poor people and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system Revolutionary Power is a playbook for the energy transformation complete with a step by step analysis of the key energy policy areas that are ripe for intervention Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system She draws from her experience as an energy justice advocate a lawyer and a queer woman of color to inspire activists working to build our new energy system Climate change will force us to rethink the way we generate and distribute energy and regulate the system But how much are we willing to change the system This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system and thus an opportunity to transform society Revolutionary Power shows us how
