Parallel And Constraint Logic Programming An Introduction To Logic Parallelism And Constraints:

Parallel and Constraint Logic Programming Ioannis Vlahavas,Panagiotis Tsarchopoulos,Ilias Sakellariou,2012-12-06 Constraint Logic Programming CLP an area of extreme research interest in recent years extends the semantics of Prolog in such a way that the combinatorial explosion a characteristic of most problems in the field of Artificial Intelligence can be tackled efficiently By employing solvers dedicated to each domain instead of the unification algorithm CLP drastically reduces the search space of the problem which leads to increased efficiency in the execution of logic programs CLP offers the possibility of solving complex combinatorial problems in an efficient way and at the same time maintains the advantages offered by the declarativeness of logic programming The aim of this book is to present parallel and constraint logic programming offering a basic understanding of the two fields to the reader new to the area The first part of the book gives an introduction to the fundamental aspects of conventional logic programming which is necessary for understanding the parts that follow The second part includes an introduction to parallel logic programming architectures and implementations proposed in the area Finally the third part presents the principles of constraint logic programming The last two parts also include descriptions of the supporting facilities for the two paradigms in two popular systems ECLIPSe and SICStus These platforms have been selected mainly because they offer both parallel and constraint features Annotated and explained examples are also included in the relevant parts offering a valuable guide and a first practical experience to the reader Finally applications of the covered paradigms are presented The authors felt that a book of this kind should provide some theoretical background necessary for the understanding of the covered logic programming paradigms and a quick start for the reader interested in writing parallel and constraint logic programming programs However it is outside the scope of this book to provide a deep theoretical background of the two areas In that sense this book is addressed to a public interested in obtaining a knowledge of the domain without spending the time and effort to understand the extensive theoretical work done in the field namely postgraduate and advanced undergraduate students in the area of logic programming This book fills a gap in the current bibliography since there is no comprehensive book of this level that covers the areas of conventional parallel and constraint logic programming Parallel and Constraint Logic Programming An Introduction to Logic Parallelism and Constraints is appropriate for an advanced level course on Logic Programming or Constraints and as a reference for practitioners and researchers in industry   FGCS '92 ,1992   Parallel Processing for Artificial Intelligence 3 J. Geller,H. Kitano,C.B. Suttner,1997-02-10 The third in an informal series of books about parallel processing for Artificial Intelligence this volume is based on the assumption that the computational demands of many AI tasks can be better served by parallel architectures than by the currently popular workstations However no assumption is made about the kind of parallelism to be used Transputers Connection Machines farms of workstations Cellular Neural Networks Crays and other hardware paradigms of parallelism are used by the authors of this collection The papers arise from the areas of parallel knowledge

representation neural modeling parallel non monotonic reasoning search and partitioning constraint satisfaction theorem proving parallel decision trees parallel programming languages and low level computer vision The final paper is an experience report about applications of massive parallelism which can be said to capture the spirit of a whole period of computing history This volume provides the reader with a snapshot of the state of the art in Parallel Processing for Artificial Intelligence **Parallel Symbolic Computation Pasco '94 - Proceedings Of The First International Symposium** Hoon Hong,1994-09-17 These proceedings are devoted to communicating significant developments in all areas pertinent to Parallel Symbolic Computation The scope includes algorithms languages software systems and application in any area of parallel symbolic computation where parallelism is interpreted broadly to include concurrent distributive cooperative schemes and so forth Parallel Execution of Logic Programs Anthony Beaumont,1991-12-11 Logic programming refers to execution of programs written in Horn logic Among the advantages of this style of programming are its simple declarativeand procedural semantics high expressive power and inherent nondeterminism The papers included in this volume were presented at the Workshop on Parallel Logic Programming held in Paris on June 24 1991 as part of the 8th International Conference on Logic Programming The papers represent the state of the art in parallel logic programming and report the current research in this area including many new results The three essential issues in parallel execution of logic programs which the papers address are Which form s of parallelism or parallelism and parallelism stream parallelism data parallelism etc will be exploited Will parallelism be explicitly programmed by programmers or will it be exploited implicitly without their help Which target parallel architecture will the logic program s run on *Programming Language Implementation and Logic Programming* Jan Małuszyński,Martin Wirsing,1991-08-14 This volume contains the papers which have been accepted for presentation atthe Third International Symposium on Programming Language Implementation andLogic Programming PLILP 91 held in Passau Germany August 26 28 1991 The aim of the symposium was to explore new declarative concepts methods and techniques relevant for the implementation of all kinds of programming languages whether algorithmic or declarative ones The intention was to gather researchers from the fields of algorithmic programming languages as well as logic functional and object oriented programming This volume contains the two invited talks given at the symposium by H Ait Kaci and D B MacQueen 32 selected papers and abstracts of several system demonstrations The proceedings of PLILP 88 and PLILP 90 are available as Lecture Notes in Computer Science Volumes 348 and 456 American Book Publishing Record ,1999 *Programming Language Implementation and Logic Programming* Jaan Penjam,1994-08-24 This volume constitutes the proceedings of the 6th International Symposium on Programming Language Implementation and Logic Programming PLILP 94 held in Madrid Spain in September 1994 The volume contains 27 full research papers selected from 67 submissions as well as abstracts of full versions of 3 invited talks by renowned researchers and abstracts of 11 system demonstrations and poster presentations Among the topics covered are parallelism and concurrency implementation techniques partial evaluation synthesis and

language issues constraint programming meta programming and program transformation functional logic programming and program analysis and abstract interpretation   *PARLE '93 Parallel Architectures and Languages Europe* Arndt Bode,Mike Reeve,1993-06-07 Parallel processing offers a solution to the problem of providing the processing power necessary to help understand and master the complexity of natural phenomena and engineering structures By taking several basic processing devices and connecting them together the potential exists of achieving a performance many times that of an individual device However building parallel application programs is today recognized as a highly complex activity requiring specialist skills and in depth knowledge PARLE is an international European based conference which focuses on the parallel processing subdomain of informatics and information technology It is intended to become THE European forum for interchange between experts in the parallel processing domain and to attract both industrial and academic participants with a technical programme designedto provide a balance between theory and practice This volume contains the proceedings of PARLE 93 The PARLE conference came into existence in 1987 as an initiative from the ESPRIT I programme and the format was revised in 1991 92 PARLE 93 is the second conference with the new format and was held in Munich   **Logic Programming** Maurizio Gabbrielli,Gopal Gupta,2005-09-19 This book constitutes the refereed proceedings of the 21st International Conference on Logic and Programming ICLP 2005 held in Barcelona Spain in October 2005 The 25 revised full papers and 15 revised poster papers presented together with 4 invited papers and 7 abstracts of a poster session of a doctoral consortium were carefully reviewed and selected from 104 submissions The papers cover all issues of current research in logic programming Extra attention is given to novel applications of logic programming and work providing novel integrations of different areas   **Parallel and Distributed Logic Programming** Alakananda Bhattacharya,Amit Konar,Ajit K. Mandal,2006-10-21 Foundation of logic historically dates back to the times of Aristotle who pioneered the concept of truth falsehood paradigm in reasoning Mathematical logic of propositions and predicates which are based on the classical models of Aristotle underwent a dramatic evolution during the last 50 years for its increasing applications in automated reasoning on digital computers The subject of Logic Programming is concerned with automated reasoning with facts and knowledge to answer a user s query following the syntax and semantics of the logic of propositions predicates The credit of automated reasoning by logic programs goes to Professor Robinson for his well known resolution theorem that provides a general scheme to select two program clauses for deriving an inference Until now Robinson s theorem is being used in PROLOG DATALOG compilers to automatically build a Select Linear Definite SLD clause based resolution tree for answering a user s query The SLD tree based scheme for reasoning undoubtedly opened a new era in logic programming for its simplicity in implementation in the compilers In fact SLD tree construction suffices the need for users with a limited set of program clauses But with increase in the number of program clauses the execution time of the program also increases linearly by the SLD tree based approach An inspection of a large number of logic programs however reveals that more than one pair of

program clauses can be resolved simultaneously without violating the syntax and the semantics of logic programming This book employs this principle to speed up the execution time of logic programs **Logic Programming and Automated Reasoning** Frank Pfenning,1994-06-22 This volume presents the proceedings of the 5th International Conference on Logic Programming and Automated Reasoning held aboard the ship Marshal Koshevoi on the Dnieper near Kiev Ukraine in July 1994 The LPAR conferences are held annually in the former Soviet Union and aimed at bringing together researchers interested in LP and AR This proceedings contains the full versions of the 24 accepted papers evaluated by at least three referees ensuring a program of highest quality The papers cover all relevant aspects of LP and AR ranging from theory to implementation and application *Artificial Intelligence with Machine Learning Concepts* Dr.M.Priya,Dr.R.Vijayashree,Mr.V.J.Rajakumar,Mr.S.S.Saravana Kumar,2023-10-26 Dr M PRIYA Assistant Professor Department of Computer Technology and Data Science Sri Krishna Arts and Science College Coimbatore Tamil Nadu India Dr R VIJAYASHREE Assistant Professor Department of Computer Technology and Data Science Sri Krishna Arts and Science College Coimbatore Tamil Nadu India Mr V J RAJAKUMAR Assistant Professor Department of Computer Technology and Data Science Sri Krishna Arts Science College Coimbatore Tamil Nadu India Mr S S SARAVANA KUMAR Research Scholar Department of Computer Science Sri Krishna Adithya College of Arts and Science Coimbatore Tamil Nadu India *Parallel Computing Technologies - Proceedings Of The International Conference* Nikolay N Mirenkov,1991-08-24 The proceedings of this UNESCO supported conference consist of papers covering new trends and experiences in parallel computing technologies Emphasis is made on the practical aspects of parallel programming especially all aspects of the applications of parallel computing technologies hardware languages and software tools for parallel processing operating systems general architecture concepts enabling technologies performance measurements and the teaching of parallel processing technology **Handbook of Parallel Constraint Reasoning** Youssef Hamadi,Lakhdar Sais,2018-04-05 This is the first book presenting a broad overview of parallelism in constraint based reasoning formalisms In recent years an increasing number of contributions have been made on scaling constraint reasoning thanks to parallel architectures The goal in this book is to overview these achievements in a concise way assuming the reader is familiar with the classical sequential background It presents work demonstrating the use of multiple resources from single machine multi core and GPU based computations to very large scale distributed execution platforms up to 80 000 processing units The contributions in the book cover the most important and recent contributions in parallel propositional satisfiability SAT maximum satisfiability MaxSAT quantified Boolean formulas QBF satisfiability modulo theory SMT theorem proving TP answer set programming ASP mixed integer linear programming MILP constraint programming CP stochastic local search SLS optimal path finding with A model checking for linear time temporal logic MC LTL binary decision diagrams BDD and model based diagnosis MBD The book is suitable for researchers graduate students advanced undergraduates and practitioners who wish to learn about the state of

the art in parallel constraint reasoning *Introduction of Artificial Intelligence* K.Gurnadha Gupta,C. Divya,Voruganti Ramesh,Tharini Benarji,2018-01-01 Artificial intelligence Introduction AI the power of a computer or computer controlled robot to perform tasks commonly related to intelligent beings The term is usually applied to the project of developing systems endowed with the intellectual processes characteristic of humans As well as like the power to reason discover meaning generalize or learn from experience Since the event of the computer within the 1940s it s been demonstrated that computers are often programmed to hold out very complex tasks For instance discovering proofs for mathematical theorems or playing chess with great proficiency Still despite continuing advances in computer processing speed and memory capacity there are so far no programs That will match human flexibility over wider domains or in tasks requiring much everyday knowledge Moreover some programs have attained the performance levels of human experts and professionals in performing certain specific tasks So Artificial intelligence introduction during this limited sense is found in applications as diverse as diagnosis computer search engines And also voice or handwriting recognition to all but the only human behavior is ascribed to intelligence While even the foremost complicated insect behavior isn t taken as a sign of intelligence What s the difference Consider the behavior of the sphecoid wasp Sphex ichneumoneus When the feminine wasp returns to her burrow with food she first deposits it on the edge Checks for intruders inside her burrow and only then if the coast is obvious carries her food inside The important nature of the wasp s instinctual behavior is revealed If the food is moved a couple of inches faraway from the doorway to her burrow Likewise she is inside on emerging she is going to repeat the entire procedure as often because the food is displaced Intelligence conspicuously absent within the case of Sphex must include the power to adapt to new circumstances Psychologists generally don t characterize human intelligence by only one trait but by the mixture of the many diverse abilities **Energy Research Abstracts** ,1990 *Practical Aspects of Declarative Languages* Matthew Flatt,Hai-Feng Guo,2013-12-09 This book constitutes the refereed proceedings of the 16th International Symposium on Practical Aspects of Declarative Languages PADL 2014 held in SanDiego CA USA in January 2014 co located with POPL 2014 the 41st Symposium on Principles of Programming Languages The 15 revised papers presented were carefully reviewed and selected from 27 submissions They cover a wide range of topics related to logic and functional programing including language support for parallelism and GPUs constructs and techniques for modularity and extensibility and applications of declarative programming to document processing and DNA simulation **ACM Transactions on Programming Languages and Systems** Association for Computing Machinery,2001 **Subject Guide to Books in Print** ,1997
