Parallelism And Prosody In The Processing Of Ellipsis Sentences:

Parallelism and Prosody in the Processing of Ellipsis Sentences Katy Carlson, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series This book investigates the processing of ellipsis sentences focusing on the following questions i are ellipsis sentences processed using special routines employed only for ellipsis or are they processed using the same principles needed for unelided sentences ii does parallelism influence sentence processing if so what kinds of similarities matter *Parallelism and Prosody in the Processing of Ellipsis Sentences* Katy Carlson, 2001 **The Oxford Handbook of Ellipsis** Jeroen van Craenenbroeck, Tanja Temmerman, 2019 This handbook is the first volume to provide a comprehensive in depth and balanced discussion of ellipsis a phenomena whereby expressions in natural language appear to be incomplete but are still understood It explores fundamental questions about the workings of grammar and provides detailed case studies of inter and intralinguistic variation *Bare Argument Ellipsis and Focus* Andreas Konietzko, 2016-12-15 This monograph explores the syntax and information structure of bare argument ellipsis The study concentrates on stripping which is identified as a subtype of bare argument ellipsis typically associated with focus sensitive particles or negation This monograph presents a unified account of stripping located at the syntax information structure interface and argues for a licensing mechanism which is strongly tied to the focus properties of the construction Under this view types of bare argument ellipsis such as stripping and pseudostripping which have received different treatments in the literature are shown to be subject to the same licensing mechanism This analysis is also extended to instances of bare argument ellipsis in embedded contexts which have received little attention in the literature so far Integrating theoretical and experimental reasoning this study presents a series of experiments investigating the extraction prosody and context properties of stripping and thus arrives at a comprehensive and unified account **Semantics - Sentence and Information Structure** Paul Portner, Claudia Maienborn, Klaus von Stechow, 2019-02-19 Read this book to get a deeper understanding of a wide range of semantics research on complex sentences and meaning in discourse These in depth articles from leading names in their fields cover the core concepts of sentential semantics such as tense modality conditionality propositional attitudes scope negation and coordination The highly cited material covers questions imperatives copular clauses and existential sentences It also includes essential research on sentence types and explains central concepts in the theory of information structure and discourse structure such as topics cohesion and coherence accessibility and discourse particles **Sentence Processing** Roger P. G. van Gompel, 2013-09-11 What are the psychological processes involved in comprehending sentences How do we process the structure of sentences and how do we understand their meaning Do children bilinguals and people with language impairments process sentences in the same way as healthy monolingual adults These are just some of the many questions that sentence processing researchers have tried to answer by conducting ever more sophisticated experiments making this one of the most productive and exciting areas in experimental

language research in recent years This book is the first to provide a comprehensive state of the art overview of this important field It contains 10 chapters written by world leading experts which discuss influential theories of sentence processing and important experimental evidence with a focus on recent developments in the area The chapters also analyse research that has investigated how people process the structure and meaning of sentences and how sentences are understood within their context This comprehensive and authoritative work will appeal to students and researchers in the field of sentence processing as well anyone with an interest in psychology and linguistics

Grammatical Approaches to Language

Processing Katy Carlson, Charles Clifton, Jr., Janet Dean Fodor, 2019-01-28 This book contains papers that were written to honor Professor Lyn Frazier on the occasion of her retirement from the University of Massachusetts Amherst Some were presented at the Lynschrift on May 19 20 2018 others were written especially for this volume The papers report original research on or research based theoretical analyses of several of the domains that Professor Frazier contributed to during her career The volume begins with a brief overview of Professor Frazier's research contributions and an appreciation of the contributions she has made to the field of psycholinguistics and to her students and colleagues The next several chapters discuss the roles that prosody plays in language processing and the volume continues with chapters on the topic that established Professor Frazier as a major psycholinguistic theorist syntactic processing The volume then explores the roles semantics and pragmatics play in language comprehension and concludes with reports of applications and extensions of research on language processing All chapters were contributed by current and former students and colleagues of Professor Frazier in gratitude for the impact she has had on their lives and careers

Explicit and Implicit Prosody in Sentence

Processing Lyn Frazier, Edward Gibson, 2015-06-23 Top researchers in prosody and psycholinguistics present their research and their views on the role of prosody in processing speech and also its role in reading The volume characterizes the state of the art in an important area of psycholinguistics How are general constraints on prosody timing and intonation melody used to constrain the parsing and interpretation of spoken language How are they used to assign a default prosody intonation in silent reading and more generally what is the role of phonology in reading Prosody and intonation interact with phonology syntax semantics and pragmatics and thus are at the very core of language processes

Prosody in Syntactic Encoding

Gerrit Kentner, Joost Kremers, 2020-07-06 What is the role of prosody in the generation of sentence structure A standard notion holds that prosody results from mapping a hierarchical syntactic structure onto a linear sequence of words A radically different view conceives of certain intonational features as integral components of the syntactic structure Yet another conception maintains that prosody and syntax are parallel systems that mutually constrain each other to yield surface sentential form The different viewpoints reflect the various functions prosody may have On the one hand prosody is a signal to syntax marking e.g. constituent boundaries On the other hand prosodic or intonational features convey meaning the concept intonational morpheme as e.g. an exponent of information structural notions like topic or focus puts prosody and

intonation squarely into the syntactic representation The proposals collected in this book tackle the intricate relationship of syntax and prosody in the encoding of sentences The contributions build their cases on the basis of solid empirical evidence adducing data from experiments or from the careful analysis of natural speech The volume thus represents a state of the art survey of research on the syntax phonology interface *Romance Languages and Linguistic Theory 2017* Alexandru Nicolae,Adina Dragomirescu,2021-12-15 This volume contains a selection of 18 peer reviewed papers presented at the 31st edition of Going Romance Phenomena found in Romance languages European Portuguese French Italian Spanish Romanian in Romance dialects Cosentino Salentino southern Calabrese Neapolitan and Trevisano and even in creoles with a Romance lexifier Makista and Kristang either benefit from in depth analyses confined to one single variety or are subjected to comparative analysis dialect vs standard language dialect vs different major language s cross dialectal comparison cross Romance comparison and even comparison of language families Theoretical and experimental approaches complement one another as do diachrony and synchrony Individually and as a whole these contributions show how the Romance languages contribute to a better understanding of issues which are relevant in the current linguistic landscape acquisition n words ellipsis phenomena focus and polarity ditransitive constructions grammaticalization theory differential object marking language ecology event structure cyclicity passives and many more The Fruits of Empirical Linguistics: Product Sam Featherston,Susanne Winkler,2009 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century This branch of linguistics broadly known as Generative Grammar is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the language organ The series comprises high quality monographs and collected volumes that address such issues The topics in this series range from phonology to semantics from syntax to information structure from mathematical linguistics to studies of the lexicon **Product** Susanne Winkler,Sam Featherston,2009-06-02 The second volume of the two volume set The Fruits of Empirical Linguistics focuses on the linguistic outcomes of empirical linguistics The contributions present some of the insights that linguists can gain by applying the new methods progress within language study is accelerated by the new evidence since language systems are more precisely captured Readers will enjoy the fresh perspective on linguistic questions made possible by the evidence based approach Parallelism and Prosody in the Processing of Ellipsis Sentences Katy Carlson,2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series This book investigates the processing of ellipsis sentences focusing on the following questions i are ellipsis sentences processed using special routines employed only for ellipsis or are they processed using the same principles needed for unelided sentences ii does parallelism influence sentence processing if so what kinds of similarities matter **Strategies of Ambiguity** Matthias Bauer,Angelika Zirker,2023-09-13 There has been a growing awareness that ambiguity is not just a necessary evil of the language system resulting for instance from its need for economy

or by contrast a blessing that allows writers to involve readers in endless games of assigning meaning to a literary text The present volume contributes to overcoming this alternative by focusing on strategies of ambiguity and the strategic avoidance of ambiguity both at the production and the reception end of communication The authors examine ways in which speakers and hearers may use ambiguous words structures references and situations to pursue communicative ends For example the question is asked what it actually means when a listener strategically perceives ambiguity which may happen both synchronically e g in conversations as well as diachronically e g when strategically ambiguating biblical texts in order to make them applicable to moral lessons Another example is the question of whether ambiguity awareness increases the strategic use of ambiguity in prosody Moreover the authors enquire not only into the effects of ambiguous meanings but also into the strategic use of ambiguity as such for example as a response to censorship or as a means of provoking irritation This volume brings together several contributions from linguistics literary studies rhetoric psychology and theology and it aims to provide a systematic approach to the strategic production and perception of ambiguity in a variety of texts and contexts The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Working Memory in Sentence Comprehension

Shravan Vasishth, 2003-05-09 The first ever investigation of sentence processing in Hindi Working Memory in Sentence Comprehension studies the predictions of three existing wide coverage sentence processing models In experiments that apply these models to Hindi Shravan Vasishth develops a new sentence processing model that builds on existing theories and overcomes their empirical problems Advancing the understanding of human parsing processes this book is a landmark in cross linguistic research presenting a challenging set of sentence processing facts that will impact future theories

Ambiguity Susanne Winkler, 2015-03-30 This edited volume investigates the concept of ambiguity and how it manifests itself in language and communication from a new perspective The main goal is to uncover a great mystery why can we communicate effectively despite the fact that ambiguity is pervasive in the language that we use And conversely how do speakers and hearers use ambiguity and vagueness to achieve a specific goal Comprehensive answers to these questions are provided from different fields which focus on the study of language in particular linguistics literary criticism rhetoric psycholinguistics theology media studies and law By bringing together these different disciplines the book documents a radical change in the research on ambiguity The innovation is brought about by the transdisciplinary perspective of the individual and co authored papers that bridge the gaps between disciplines The research program that underlies this volume establishes theoretical connections between the areas of psycho linguistics that concentrate on the question of how the system of language works with the areas of rhetoric literary studies theology and law that focus on the question of how communication works in discourse and text from the perspective of both production and perception A three dimensional Ambiguity Model is presented that serves as a theoretical anchor point for the analyses of the different types of ambiguities

by the contributors of this volume The Ambiguity Model is a hybrid model which brings together the different perspectives on how language and the language system work with respect to ambiguity as well as the question of how ambiguity is employed in communication and in different communicational settings A set of specific features that are relevant for the description of ambiguity such as whether the ambiguity arises in the production or perception process and whether it occurs in strategic or nonstrategic communication are defined The research program rests on the assumption that both the production and the perception of ambiguity as well as its strategic and nonstrategic occurrence can only be understood by exploring how these factors interact with each other and a reference system when ambiguity is generated and resolved The collection Ambiguity Language and Communication constitutes a superb introduction to the workings of ambiguity in language and communication along with extensive analyses of many different examples from different fields As such it is relevant for students of linguistics literary studies rhetoric law and theology and at the same time there is sufficient quality analysis and new research questions to benefit advanced readers who are interested in ambiguity

Experimental Syntax and Island Effects Jon Sprouse, Norbert Hornstein, 2013-10-17 This volume brings together cutting edge experimental research from leaders in the fields of linguistics and psycholinguistics to explore the nature of a phenomenon that has long been central to syntactic theory island effects The chapters in this volume draw upon recent methodological advances in experimental methods in syntax also known as experimental syntax to investigate the underlying cognitive mechanisms that give rise to island effects This volume presents a comprehensive empirical review of a contemporary debate in the field by including contributions from researchers representing a variety of points of view on the nature of island effects This book is ideal for students and researchers interested in cutting edge experimental techniques in linguistics psycholinguistics and psychology

On Invisible Language in Modern English Evelyn Gandón-Chapela, 2020-01-09 Winner AEDEAN Leocadio Mart n Mingorance Book Award for Theoretical and Applied English Linguistics 2020 This book investigates the syntactic phenomenon of ellipsis and the linguistic forces that trigger it It presents the results of a corpus based study which takes into account grammatical semantic discursive usage related and processing variables Evelyn Gand n Chapela builds upon the few empirical works on ellipsis in Present day English to offer the first comparative analysis of ellipsis and its development throughout the recent history of the English language Moreover the book also provides a complex query algorithm which automatically detects and retrieves cases of ellipsis leading to successful recall ratios applicable to a wide range of parsed corpora

The Wiley Blackwell Companion to Syntax, 8 Volume Set Martin Everaert, Henk Van Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics The Wiley Blackwell Companion to Syntax Second Edition has been updated to incorporate the last 10 years of syntactic research and expanded to include a wider array of important case studies in the syntax of a broad array of languages A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics now incorporating the last 10 years of syntactic research Contains

Experiments in Focus Sam Featherston, Robin Hörnig, Sophie von Wietersheim, Susanne Winkler, 2019-11-05
This volume presents new and cutting edge research on the question of how we parse interpret and understand language in more complex discourse settings
The challenge is to find empirical evidence on how information structure and semantic processing are related
Comprehensible answers are provided by showing how syntax phonology semantics and pragmatics interact and how they influence semantic processing and interpretation
The analysis of core information structural concepts that contribute to processing such as focus and contrast the specific discourse status of referents that add to the common ground context dependency and markedness as well as prosodic prominence and givenness marking has added new and convincing evidence to the research of information structure and semantic processing
