Coale,2019-05-14 An examination of the American fascination with conspiracy and the distrust it sows The recent popularity of *The DaVinci Code* and *The Matrix* trilogy exemplifies the fascination Americans have with conspiracy driven subjects Though scholars have suggested that in modern times the JFK assassination initiated an industry of conspiracy i e Vietnam and the Pentagon Papers Area 51 Iran Contra Affair Samuel Chase Coale reminds us in this book that conspiracy is foundational in American culture from the apocalyptic Biblical narratives in early Calvinist households to the fear of Mormon Catholic Jewish and immigrant populations in the 19th century Coale argues that contemporary culture a landscape characterized by doubt ambiguity fragmentation information overload and mistrust has fostered a radical skepticism so pervasive that the tendency to envision or construct conspiracies often provides the best explanation for the chaos that surrounds us Conspiracy as embodied in narrative form provides a fertile field for explorations of the anxiety lying at the

heart of the postmodern experience Thomas Pynchon's *The Crying of Lot 49* Don DeLillo's *Underworld* Toni Morrison's *Jazz* and *Paradise* Joan Didion's *Democracy* Tim O'Brien's *In the Lake of the Woods* and Paul Auster's *New York City Trilogy* are some of the texts Coale examines for their representations of isolated individuals at the center of massive anonymous master plots that lay beyond their control These narratives remind us that our historical sense of national identity has often been based on the demonizing of others and that American fiction arose and still flourishes with apocalyptic visions

[Borderline \(Psychology Revivals\)](#) Peter Chadwick, 2013-12-16 Originally published in 1992 *Borderline* presents a unique study of the disturbed mind Professional psychologist Peter Chadwick draws upon his own personal experience of madness to provide a valuable exploration of the psychology of paranoia and schizophrenia The book goes beyond a narrowly focused analytical approach to examine

schizophrenia from as many perspectives as possible Using participant observation introspection case study and experimental methods Chadwick shows how paranoid and delusional thinking are only exaggerations of processes to be found in normal cognition Impressed by the similarities between the thinking of mystics and psychotics he argues that some forms of madness are closely related to profound mystical experience and intuition but that these are expressed in a distorted form in the psychotic mind He explores the many positive characteristics and capabilities of paranoid patients providing a sympathetic account which balances the heavily negative constructions usually put on paranoia in the research literature Borderline provides many novel insights into madness and raises important questions as to how psychosis and psychotics are to be evaluated It will be essential reading for all practising professionals and students in clinical psychology and psychiatry and for everyone involved in the treatment understanding and management of schizophrenia
