PARAPSYCHOLOGICAL REVIEW **Parapsychology: Sources of Information** American Society for Psychical Research,1973 325 annotated references to English language books 282 encyclopedias 30 and periodicals 13 Also covers organizations scientific recognition of parapsychology by academic institutions and by other disciplines opportunities for graduate work and listings of dissertations and theses Glossary Name and subject index Index of book and periodical titles Miscellaneous appendixes **Parapsychology : sources of information** Rhea A. White,1973 First Sight James C. Carpenter,2015-07-08 Often seen as supernatural unpredictable illusory and possibly dangerous ESP telepathy clairvoyance and other parapsychological activities are actually happening all the time and help us make sense of everyday experiences First Sight provides a new way of understanding such experiences and describes a way of thinking about the unconscious mind that makes it clear that these abilities are not rare and anomalous but instead are used by all of us all the time unconsciously and efficiently Drawing upon a broad array of studies in contemporary psychology the author integrates a new model for understanding these unusual abilities with the best research in psychology on problems as diverse as memory perception personality creativity and fear In doing so he illustrates how the field of parapsychology which historically has been riddled with confusion skepticism and false claims can move from the edges of science to its center where it will offer fascinating new knowledge about unmapped aspects of our nature The author demonstrates that the new model accounts for accumulated findings very well and explains previous mysteries resolves apparent contradictions and offers clear directions for further study First Sight also ventures beyond the laboratory to explain such things as why apparent paranormal experiences are so rare why they need not be feared and how they can be more intentionally accessed Further study of this theory is likely to lead to a technology of parapsychological processes while drastically revising our conception of the science of the mind toward a new science more humane and more replete with possibility than we have imagined in the past

*Philosophical Interactions with Parapsychology* H. Price,1995-10-13 This is a collection of the most important writings of Oxford philosopher H H Price on the topics of psychical research and survival of death collected from a wide variety of sources unavailable to most interested readers Included are discussions of telepathy clairvoyance telekinesis precognition hauntings and apparitions the impact of psychical research on western philosophy and science and what afterlife is probably

like Few twentieth century English speaking philosophers have written much on these topics Of those who did so and whose writings have not been collected and published in a single source H H Price was the most important **700**

**Conscientiology Experiments** Waldo Vieira,2018-08-22 A reference work on conscientiology this treatise with more than 5 000 entries in the bibliography first published in Portuguese in 1994 presents the reader with the bases of the neoscience conscientiology The author proposes 300 tests for self application dealing with topics of great relevance such as assistance the theory of thosene thought sentiment and energy and the theories of inversion and existential recycling among others The work presents conscientiology as the science applied to the study of consciousness ego personality in an integral approach with all its vehicles of manifestation bodies previous existences and attributes The content being deepened and presented in a theoretical and practical way so a reader understands the importance of this knowledge to their life The science of conscientiology utilizes the best of the main lines of human knowledge common sense religion philosophy political ideology and conventional science and is based on multidimensional self experience having consciousness as both the instrument and object of research Margins of Reality Robert G. Jahn,Brenda J. Dunne,2009-04 WHAT HAS MODERN SCIENCE SWEPT UNDER THE RUG This pioneering work which sparked intense controversy when it was first published two decades ago suggests that modern science in the name of rigor and objectivity has arbitrarily excluded the role of consciousness in the establishment of physical reality Drawing on the results of their first decade of empirical experimentation and theoretical modeling in their Princeton Engineering Anomalies Research PEAR program the authors reach provocative conclusions about the interaction of human consciousness with physical devices information gathering processes and technological systems The scientific personal and social implications of this revolutionary work are staggering MARGINS OF REALITY is nothing less than a fundamental reevaluation of how the world really works **Parapsychology** Rhea A. White,1988

**Parapsychology** Caroline Watt,2017-07-05 Many people believe that they have experienced paranormal phenomena and others claim to possess psychic abilities For the past hundred years or so researchers have undertaken systematic and scientific work into these alleged experiences and abilities This collection of articles provides readers with a general sense of the methods used in this research the findings that have been obtained and the controversies generated by this work They cover a wide range of issues including the psychology of paranormal belief investigations into ghosts and hauntings laboratory research into extra sensory perception and psychokinesis and controlled tests of psychics and mediums An introductory essay sets each of the selected papers in context and provides additional references for those wishing to delve deeper into the issues surrounding each of the areas covered *The Journal of Parapsychology* Joseph Banks Rhine,Charles Edward Stuart,William McDougall,1989 Parapsychology and Religion Everton de Oliveira Maraldi,2021-06-29 Parapsychology and Religion is perhaps the most controversial research area in the psychology of religion However in recent decades psychology of religion has witnessed a growing literature bearing on ontological issues including parapsychological

topics such as distant healing and near death experiences This book argues that despite the methodological and theoretical controversies that still surround the field of parapsychology the findings of research on alleged anomalous processes can inform the study of religious spiritual experiences Psychological literature on the paranormal is critically reviewed and it is argued that it became less a scientific endeavor and more an ideological program devised to denigrate paranormal believers and experiencers This volume explores how an open minded dialogue between parapsychology and psychology of religion might help us move beyond the present ideological disputes and reviews the complex relations between parapsychology and religion over time as well as their implications for interdisciplinary research on religion and spirituality

*Soviet and Czechoslovakian Parapsychology Research: The DIA Report from 1975 with New Addenda* Mr. Louis F. Maire III, Major J.D. LaMothe, MSC, 2014-01-25 The men who stared at goats in the U S Army in the 1970s were trying to pull ahead of Soviet psychic research initiatives many of which are described in this unique volume They involve telepathy psychotronics psychokinesis and out of body experiences such as remote viewing This is the widely cited and quoted report prepared by U S Army Medical Intelligence and Information Agency for the Defense Intelligence Agency in 1975 Recently released through the FOIA it has only been available in nearly illegible PDF editions This transcription presents the full report with four major new addenda biographical trace data on the researchers and subjects named relevant imagery a complete study done by members of the Hungarian Academy of Sciences on the Pavlita psychotronic generator with Pavlita s participation in 1987 and a recent Pravda news article on weaponizing psychotronic research An excellent set of bibliographic endnotes is provided for those interested in further information

*The Future of the Body* Michael Murphy, 1993-04-21 In the oral and written histories of every culture there are countless records of men and women who have displayed extraordinary physical mental and spiritual capacities In modern times those records have been supplemented by scientific studies of exceptional functioning Are the limits of human growth fixed Are extraordinary abilities latent within everyone Is there evidence that humanity has unrealized capacities for self transcendence Are there specific practices through which ordinary people can develop these abilities Michael Murphy has studied these questions for over thirty years In *The Future of the Body* he presents evidence for metanormal perception cognition movement vitality and spiritual development from more than 3 000 sources Surveying ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into

a coherent program of transformative practice A few of Murphy's central observations and proposal include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In *The Future Of The Body* Murphy states that such practices can carry forward Earth's evolutionary adventure and lead humanity to the next step in its development **National Library of**
