Language Parasites: Of Phorontology Sean Braune, 2017 What we call Being infects us and speaks through us it treats us as a host to a linguistic and experiential parasite Ontology the study of Being has primarily dealt with human questions regarding Being at the expense of the non human inhuman and posthuman Language Parasites works against this tendency by offering a phorontology a theory of Being inspired by phoronts which are tiny organisms that engage in parasitic migration lice mites ticks fleas etc What is the Being of a parasite and how can that complicated non human ontology influence human definitions of Being Gradually the anthropocentric distinction of subject and object fades away in favor of the emergence of a strange new philosophical entity called the transject a being that is thrown far afield from the more normative notions of the subject that can be found in Hegel Kant Lacan or even Foucault Nietzsche and Deleuze A pataphysical excursion into the intricate world of philosophical ontology Language Parasites presents the initial discoveries of a much larger project that seeks to redefine the boundaries of Being This book is the result of a parasitic infection of continental philosophy in which the various parasites of German and French philosophy all meet at one locale for one express purpose to eat together feed together and think together Back cover
