This volume is a direct outgrowth of the growing professional recognition of the importance of parents in nearly all psychological and educational interventions with children. PARENT EDUCATION AND INTERVENTION HANDBOOK will serve as a major reference for all professionals involved in training parents and parent surrogates to be the primary therapeutic force for their children. The examination of various types of parent-child interactions, approaches to intervention with a wide array of parent-child populations, and reviews of available training materials will aid professionals in preparing for their new role as parent educators.
