*Parent-teen Communication* James Jaccard, Patricia Dittus, 1991-01-01      **Parent-Teen Communication** James Jaccard, Patricia Dittus, 2012-12-06 The problem of unintended pregnancies among adolescents is a serious one Millions of dollars have been spent and hundreds of social science investigations have been conducted in the attempt to address the problem The present book reports the results of a federally funded research project on parent teenager communication about premarital sex and birth control Both the role and potential of parents in influencing the sexual behavior of their teenagers has been questioned by many social scientists The literature is characterized by studies that tend to observe little relationship between measures of parent teen communication and teen sexual behavior Many of our colleagues informally express the viewpoint that parents have little to do with the sexual behavior of their teens and that attempts to reduce unintended pregnancies through parental involvement will be futile Indeed when we first sought funding for the present research several reviewers were skeptical for just this reason It is our belief that parents can play an important role in preventing unintended pregnancies In our opinion past research has failed to make important conceptual distinctions which has resulted in an underestimation of the potential utility of parent teen communication We believe that the study reported here is consistent with this opinion We have written the book with two goals First we wanted to identify important conceptual and methodological points that future researchers can consider in exploring this important area of inquiry Second we wanted to develop some of the applied implications of these points vis a vis our data      *Current Catalog* National Library of Medicine (U.S.), 1992      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1992

Handbook of Adolescent Behavioral Problems Thomas P. Gullotta, Gerald R. Adams, 2007-08-26 As we enter the new millennium promoting

sound mental health and positive behavior of adolescents has undeniably taken on greater significance than ever before. To that end, more and more research is confirming what many have suspected for years: environment and community surroundings have a major effect on an adolescent's well-being and overall mental health. And because no single causal agent triggers teenage pathology and no one-size-fits-all treatment is available, the *Handbook of Adolescent Behavior Problems* offers a comprehensive and integrative biopsychosocial approach to effective practice. This volume examines not only the psychological and genetic factors underlying dysfunction; it also explores the critical roles that family members, peers, and the larger community play in an adolescent's life. It offers current interdisciplinary perspectives on adolescent development, both functional and pathological, and provides coverage that is clear, accessible, and practical on such topics as major disorders including depression, anxiety, schizophrenia, ADHD, PTSD, developmental delays, and conduct disorders. Behavior problems such as substance abuse, sexual offenses, teen pregnancy, school failure, gambling, and gang violence. Best practices reviewing what works, i.e., interventions that have been rigorously validated; what might work, i.e., those in need of further study; and what doesn't work. Residential interventions as well as community treatment. Risk and resiliency factors. Ongoing and emerging pharmaceutical issues. Each chapter focuses on a specific behavior or disorder and is formatted to help readers quickly locate needed information. The *Handbook of Adolescent Behavior Problems* provides a solid foundation for understanding the adolescent experience and the influence of the family and community, as well as much needed information on the development of evidence-based practices. It is designed to be a one-stop reference for anyone working with adolescents: developmental psychologists, clinical and school psychologists, and education specialists, as well as for graduate students in these areas.

**Community Collaborative Partnerships** Mary M. McKay, Roberta L. Paikoff, 2012-12-06. Find out how best to develop HIV prevention programs that work. Community Collaborative Partnerships. The Foundation for HIV Prevention Research Efforts is a must-read for anyone interested in developing prevention programs within high-risk urban environments. Illustrative case studies, quality research revealing personal stories, and helpful tables and figures provide valuable insights on innovative ways to partner in the prevention of the spread of HIV in youths. Leading experts in the field offer practical strategies to dissolve the distrust individuals in a community hold for researchers not a part of that community, fostering an effective collaboration to deal with problems. The book also describes ways to go beyond the United States model to reveal how to replicate the same dynamic relationships in international communities. Active participation with the community and families has been found to be vital for the success of HIV/AIDS prevention efforts. Community Collaborative Partnerships. The Foundation for HIV Prevention Research Efforts solves the common problem of forcing ineffective program models onto an unreceptive community. Program

developers get the necessary tools to develop relationships and cultivate substantive input from those in the community to help ensure better program results The research here is up to date and the suggestions invaluable Topics in Community Collaborative Partnerships The Foundation for HIV Prevention Research Efforts include the role of parenting in mental health and HIV risk research findings about frequency of sexual intercourse among adolescents racial socialization and family role in HIV knowledge family influences on exposure to situations of sexual possibility preadolescent risk behavior influence on parental monitoring strategies for collaboration between community and academic HIV prevention researchers involving urban parents as collaborators in HIV prevention research motivators and barriers to participation of minority families in a prevention program transferring a university led HIV prevention program to the community Trinidad and Tobago HIV AIDS prevention using a family based program and much more Community Collaborative Partnerships The Foundation for HIV Prevention Research Efforts is valuable reading for researchers program developers community based organizations public policy advocacy organizations community organizers educators and students in the fields of social work public health public administration and community medicine

Handbook of Adolescent Health Psychology William T. O'Donohue, Lorraine T. Benuto, Lauren Woodward Tolle, 2014-07-08 Adolescence is a pivotal period of development with respect to health and illness It is during adolescence that many positive health behaviors are consolidated and important health risk behaviors are first evident thus adolescence is

a logical time period for primary prevention In addition the predominant causes of morbidity and mortality in adolescence are quite different from those of adults indicating that early identification and treatment of adolescent health problems must be directed to a unique set of targets in this age group Moreover because of the particular developmental issues that characterize adolescence intervention efforts designed for adults are often inappropriate or ineffective in an adolescent population Even when chronic illnesses are congenital or begin in childhood the manner in which the transition from childhood to adolescence to young adulthood is negotiated has important implications for disease outcomes throughout the remainder of the person s life span Organized in five major sections General Issues Developmental Issues Treatment and Training Mental Health and Physical Health and 44 chapters Handbook of Adolescent Health Psychology addresses the common and not so common health issues that tend to affect adolescents Coverage includes Context and perspectives in adolescent health psychology Health literacy health maintenance and disease prevention in adolescence Physical disorders such as asthma obesity physical injury and chronic pain Psychological disorders such as substance abuse attention deficit hyperactivity disorder depression and eating disorders Congenital chronic diseases such as type 1 diabetes and spina bifida Handbook of Adolescent Health Psychology is the definitive reference for pediatricians family physicians health psychologists clinical social workers rehabilitation specialists and all practitioners and researchers working with adolescents
