The Origins of Attachment Beatrice Beebe, Frank M. Lachmann, 2013-12-04 The Origins of Attachment Infant Research and Adult Treatment addresses the origins of attachment in mother infant face to face communication New patterns of relational disturbance in infancy are described These aspects of communication are out of conscious awareness They provide clinicians with new ways of thinking about infancy and about nonverbal communication in adult treatment Utilizing an extraordinarily detailed microanalysis of videotaped mother infant interactions at 4 months Beatrice Beebe Frank Lachmann and their research collaborators provide a more fine grained and precise description of the process of attachment transmission Second by second microanalysis operates like a social microscope and reveals more than can be grasped with the naked eye The book explores how alongside linguistic content the bodily aspect of communication is an essential component of the capacity to communicate and understand emotion The moment to moment self and interactive processes of relatedness documented in infant research form the bedrock of adult face to face communication and provide the background fabric for the verbal narrative in the foreground The Origins of Attachment is illustrated throughout with several case vignettes of adult treatment Discussions by Carolyn Clement Malcolm Slavin and E Joyce Klein Estelle Shane Alexandra Harrison and Stephen Seligman show how the research can be used by practicing clinicians This book details aspects of bodily communication between mothers and infants that will provide useful analogies for therapists of adults It will be essential reading for psychoanalysts psychotherapists and graduate students Collaborators Joseph Jaffe Sara Markese Karen A Buck Henian Chen Patricia Cohen Lorraine Bahrack Howard Andrews Stanley Feldstein Discussants Carolyn Clement Malcolm Slavin E Joyce Klein Estelle Shane Alexandra Harrison Stephen Seligman

Parent-Child Interaction Hugh Lytton, 1980-12-31 This work is largely based on what has been a mammoth one person called it a heroic research project Both fieldwork and data analyses were laborious and time consuming and the work could not have come to fruition without the cooperation of many people Above all I owe a debt of gratitude to the mothers and fathers who recognized the importance of such an investigation in building a secure knowledge base concerning human development and who kindly allowed us to come into their homes The children at 2 V2 did not have such an appreciation but naturally I am very grateful to them for the star roles they played in the work I have to thank all my collaborators for their help in various aspects of the research Walter Zwirner was statistical consultant to the project and Pat Olsen and Arlene Grineau were the chief research assistants owe particular thanks to them Others who helped generously with data collection or data analysis including program writing were Pat Bachor Valerie Becker Rob Black Doreen Darby Judy Eser Con Ferris Susan Horsley Jagan Ann Johnson Wayne Miller Sambhu Nath Deanna Piwowar Bruce Roe Ken Ryba Laurel Saville Cecilia Schnurr Terry Taerum Debbie Twaddle and John Wrenshall Sherry Pitcher kindly prepared the index Dorice Conway and Reginald Sauve collaborated in the analysis of identical fraternal twin differences Chapter 4 Nicholas Martin and Lindon Eaves were chiefly

responsible for the biometric genetic analysis of the data Chapter 9 **Parent - Infant Interaction** Ruth Porter, Maeve O'Connor, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world **Socialization: Parent-Child Interaction in Everyday Life** Sara Keel, 2016-03-17 Adopting a conversation analytic approach informed by ethnomethodology this book examines the process of socialization as it takes place within everyday parent child interactions Based on a large audio visual corpus featuring footage of families filmed extensively in their homes the author focuses on the initiation of interactive assessment sequences on the part of young children with their parents and the manner in which by means of embodied resources such as talk gaze and gesture they acquire communicative skills and a sense of themselves as effective social actors With attention to the responses of parents and their understanding of their children s participation in exchanges and the implications of these for children s communication this book sheds new light on the ways in which parents and children achieve shared understanding how they deal with matters of alignment or disalignment and issues related to their respective membership categories As a rigorous and detailed study of children s early socialization as well as the structural and embodied organization of communicative sequences Socialization Parent Child Interaction in Everyday Life will appeal to scholars of sociology and child development with interests in ethnomethodology and conversation analysis early years socialization and the sociology of family life **Music Therapy and Parent-Infant Bonding** Jane Edwards, 2011-07-07 Music Therapy and Parent Infant Bonding is the first title in the field of music therapy to explore the contribution that music therapy can make in the very early years for instance in situations regarding adopted children or in ameliorating the effects of maternal depression on the parent infant relationship **Parenting Matters** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children s well being and healthy development From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them The impact of parents may never be greater than during the earliest years of life when a child s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment Parents help children build and refine their knowledge and skills charting a trajectory for their health and well being during childhood and beyond The experience of parenting also impacts parents themselves For instance parenting can enrich and give focus to parents lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger Parenting of young children today takes place in the context of significant ongoing developments These include a rapidly

growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U S population and greater diversity of family structure Additionally parenting is increasingly being shaped by technology and increased access to information about parenting Parenting Matters identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0 8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents use of practices that lead to healthy child outcomes as well as their participation in effective programs and services This report makes recommendations directed at an array of stakeholders for promoting the wide scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States The Earliest Relationship T. Berry Brazelton, Bertrand G.

Cramer, 2018-05-08 Never before has research on newborn behavior and parent infant interaction been fully integrated with psychoanalytic insight into parents emotions and fantasies This book provide a vivid glimpse of the parents daydreams and narcissistic wishes which grow into a desire for a child and they show how these feelings develop into important attachments to the unborn infant during pregnancy The power and competence of the newborn born then challenges parental fantasies desires wishes and expectations creating the beginnings of the bond between parent and child Using the latest research the authors clarify all the ways the infant participates in the dawning relationship and the ingredients of very early communication and interaction They then unveil the imaginary interactions which lend meaning and drama to each gesture and expression We see the baby as Tyrant as Savior or as the reincarnation of lost relationships Everyone who cares for mothers and babies pediatricians developmental and clinical psychologists psychiatrists early childhood specialists nurses and social workers as well as interested parents will find this book of immediate value **Parent-Child Interaction** Ronald

W. Henderson, 2013-10-22 Parent Child Interaction Theory Research and Prospects is intended a to provide a synthesis of a segment of this growing body of literature on interrelationships between children and their parents b to examine the theoretical implications of this research c to review and assess common methodological approaches to the study of home environmental influences on the development of children and d to identify directions future research must take if our understanding of family influences and their place in a broader sociocultural context is to be extended The book is organized into three parts Part I examines theory and research on major aspects of parent child influence processes Part II examines the methods employed in research on family environments and considers the unique features that distinguish research on home environmental influences from traditional educational research Part III provides different perspectives on the application of psychological knowledge to socialization processes This book is intended for educational and developmental psychologists with interests in socialization processes as well as for practitioners who design parental programs that

minimize discontinuities between competing socialization influences This volume will also prove useful in graduate courses in educational developmental and community psychology as a reference for professionals involved in school psychology school administration and pupil personnel work and for psychologists and social workers involved in youth service agencies child guidance diagnostic clinics parent education and family therapy

A Secure Base John Bowlby, 2005 Dr John Bowlby a truly international and outstanding writer presents the fruits of current research in attachment theory and provides an up to date outline of its main features in this new collection of lectures In this collection of lectures Dr Bowlby describes recent findings and gives an outline of the main features of attachment theory now widely recognised as a most productive conceptual framework within which to organise the evidence In the final lecture he shows how this knowledge when applied to analytically oriented psychotherapy helps both to clarify the aims of therapy and to guide the therapist in his or her own work This collection will be welcomed by students as a lucid introduction to the field by professionals who are still unfamiliar with recent developments as well as by those eager to extend their existing knowledge

Patterns of Attachment Mary D. Salter Ainsworth, Mary C. Blehar, Everett Waters, Sally N. Wall, 2015-06-26 Ethological attachment theory is a landmark of 20th century social and behavioral sciences theory and research This new paradigm for understanding primary relationships across the lifespan evolved from John Bowlby's critique of psychoanalytic drive theory and his own clinical observations supplemented by his knowledge of fields as diverse as primate ethology control systems theory and cognitive psychology By the time he had written the first volume of his classic Attachment and Loss trilogy Mary D Salter Ainsworth's naturalistic observations in Uganda and Baltimore and her theoretical and descriptive insights about maternal care and the secure base phenomenon had become integral to attachment theory Patterns of Attachment reports the methods and key results of Ainsworth's landmark Baltimore Longitudinal Study Following upon her naturalistic home observations in Uganda the Baltimore project yielded a wealth of enduring benchmark results on the nature of the child's tie to its primary caregiver and the importance of early experience It also addressed a wide range of conceptual and methodological issues common to many developmental and longitudinal projects especially issues of age appropriate assessment quantifying behavior and comprehending individual differences In addition Ainsworth and her students broke new ground clarifying and defining new concepts demonstrating the value of the ethological methods and insights about behavior Today as we enter the fourth generation of attachment study we have a rich and growing catalogue of behavioral and narrative approaches to measuring attachment from infancy to adulthood Each of them has roots in the Strange Situation and the secure base concept presented in Patterns of Attachment Its inclusion in the Psychology Press Classic Editions series reflects Patterns of Attachment's continuing significance and insures its availability to new generations of students researchers and clinicians

Interaction Between Parents and Children Laura Stafford, Cherie L. Bayer, 1993-02-25 Family communication is a topic of central interest in a large number of fields across the social and behavioural sciences for instance in the domains of language acquisition

cognitive development and socialization This concise readable book is the first to offer an interdisciplinary integration of current research on parent child interaction in the traditional family structure Examining the important variables of self control self concept and communication competencies in childhood this volume functions as a research heuristic and a vehicle for conversation between theorists researchers and practitioners *Bonding* Marshall H. Klaus, John H.

Kennell, Antonia W. Hamilton, 1983 The mighty bond between parent and child is one of the enduring wonders of psychology John Kennell and Marshall and Phyllis Klaus bring decades of research insight and clinical practice into one book that offers parents and those who care for them during pregnancy everything they need to know to enhance this essential relationship This important work explores the effects of various birth practices and situations prenatal testing labor support testing of newborns breast feeding prematurity and adoption on the parents feelings and on the development of later attachment and independence **From Gesture to Language in Hearing and Deaf Children** Virginia Volterra, Carol J. Erting, 2012-12-06

Virginia Volterra and Carol Erting have made an important contribution to knowledge with this selection of studies on language acquisition Collections of studies clustered more or less closely around a topic are plentiful but this one is unique Volterra and Erting had a clear plan in mind when making their selection Taken together the studies make the case that language is inseparable from human interaction and communication and especially in infancy as much a matter of gestural as of vocal behavior The editors have arranged the papers in five coherent sections and written an introduction to each section in addition to the expected general introduction and conclusion No introductory course in child and language development will be complete without this book Presenting successively studies of hearing children acquiring speech languages of deaf children acquiring sign languages of hearing children of deaf parents of deaf children of hearing parents and of hearing children compared with deaf children Volterra and Erting give one a wider than usual view of language acquisition It is a view that would have been impossible not many years ago when the primary languages of deaf adults had received neither recognition nor respect Parent-child Interactions and Relationships Kristin Alvarez, 2016 Positive parent

child interactions play an important role in fostering the development of pre schoolers knowledge and understandings of their world This book provides current research on parent child interactions and relationships Chapter One reviews Parent Child Interaction Therapy PCIT research conducted with diverse populations as well as adaptations that have been implemented Chapter Two describes Integration of Working Models of Attachment into Parent Child Interaction Therapy IoWA PCIT Chapter Three reports results of a small open trial of IoWA PCIT with children and their adoptive mothers Chapter Four analyses the educational representations and practices of Italian parents about childrearing Chapter Five compares mothers and fathers on a variety of parenting measures that include behavioral observations as well as self reported data Chapter Six presents how experiences of adequate quality promote metacognitive functions Chapter Seven analyses mother child interactions during the use of a touch screen tablet Chapter Eight explores the effect engagement with

media technologies has on the quality of interactions between parents and their children Chapter Nine suggests that supporting children's early writing with technologies can complete the traditional early literacy and writing support via a pencil and paper Chapter Ten examines the relationship between parent teaching of environmental print to their children child interest in environmental print and emergent literacy skills Chapter Eleven describes the longitudinal effects of parent child interactions on social competence development using the Interaction Rating Scale IRS for eighteen month olds to seven year old children

The Transition From Prelinguistic To Linguistic Communication R. M. Golinkoff, 2013-09-05 Published in the year 1983 *The Transition From Prelinguistic To Linguistic Communication* is a valuable contribution to the field of Developmental Psychology

Early Interaction and Developmental Psychopathology Gisèle Apter, Emmanuel Devouche, Maya Gratier, 2019-05-28 This first book of a two volume series describes current research and state of the art clinical practice the shed light on the developmental origins of psychopathology in the first year of life i.e. approximately up to the emergence of secondary intersubjectivity and or walking The second volume explores the interactional underpinnings of psychopathology in toddlerhood from the time of voluntarily gross motor functioning to the emergence and basic organization of symbolic language at 24-30 months A comprehensive approach is adopted focusing on the fundamentally interactive nature of early development and examining interactions both with caregivers and more broadly with the socio cultural environment The books describe the processes involved in psychopathological trajectories and provide clinical insight into tailored culturally sensitive therapeutic care in diverse environments This volume discusses in detail situations placing the infant at risk and the nature of infant development including communication intersubjectivity functional development and affective and emotional development Culturally and socially sensitive approaches to psychopathology are examined with examples of specific infant and family centered therapies Information on risk of abuse and neglect and infant protection policies is included

Mother-infant Bonding Diane E. Eyer, 1992-01-01 Guilt abounds among women who are unable for whatever reason illness of mother or child premature birth adoption to experience the required period of bonding with their babies In this absorbing book Diane E Eyer traces the history of the bonding myth and explains its continuing popularity despite its demonstrated lack of validity Most important she shows how it reflects a disturbing tendency in our society to accept scientific research without question and without awareness that it can be distorted by professional agendas and public demands Eyer argues that the concept of bonding was developed at a time then hospitals were losing their appeal for many women who wanted to deliver their babies in birthing centers or at home Hospitals seized on the bonding idea as a way to make their services more attractive to pregnant women and to reassert medical authority over the birthing process by regulating the bonding procedure

Touch in Early Development Tiffany M. Field, 2014-02-25 A symposium titled Touch in Infancy was held to celebrate the opening of the first Touch Research Institute in the world Although touch is the largest sense organ in the body it is the one that had been the most neglected and the only one to just recently have a research

institute Designed to conduct basic research on touch and on the skin the institute will work with wellness programs such as massage therapy and other kinds of touch therapies to facilitate better health and to treat various diseases The institute s opening symposium featured presentations from several of the world s leading experts in infant development Published in this volume their work addresses the relevance of touch to the neonate s well being Nonverbal Vocal Communication H. Papousek,U. Jürgens,Mechthild Papoušek,1992-05-29 Speech and culture most evidently differentiate people from animals Yet the biological precursors to verbal communication exists in animal communication and obvious links have been found between human and animal nonverbal vocal communication In Nonverbal Vocal Communication specialists from several disciplines review the present knowledge on neural substrates of vocal communication on primate vocal communication and on precursors and prerequisites of human speech Among other points the book illustrates that animal vocal signals appear to be much more complex than mere expressions of effective states The non verbal communication data is complemented by comparative and developmental research of the preverbal period of human vocal communication The book provides a forum for consideration of phylogenetic and ontogenetic continuities and precursors of verbal communication that will allow for critical interpretation of speech acquisition by a wide range of workers Treating Parent-Infant Relationship Problems Arnold J. Sameroff,Susan C. McDonough,Katherine L. Rosenblum,2005-07-12 Within a developmental framework this book presents a range of effective approaches to treating early relationship difficulties and promoting more sensitive and responsive parenting Clinicians are guided to understand the different types of problems that parents have with infants and to determine how a given family might best be served whether by addressing health concerns that are affecting infant behavior modifying parental beliefs or expectations or targeting key caregiving skills Leading experts detail their respective therapeutic models in a practical clinician friendly format including intervention guidelines and illustrative case material Special topics covered include working with families of infants with special needs and with those at risk for child maltreatment
