Parental Supervision The New Paradigm For Foreign Direct Investment And Development:

Parental Supervision Theodore H. Moran, 2001 Assesses the opportunities and dangers that foreign direct investment may present to the growth of developing countries Reviews contemporary efforts to measure the impact of simultaneous trade and investment liberalization on host country welfare finding that the magnitude of both the benefits and the costs may be far greater than conventional wisdom suggests Foreign Direct Investment and Development Theodore Moran, 2011-04-15 This volume is the culmination of Institute investigations on the relationship between foreign direct investment FDI and development Today more than one third of world trade takes place in the form of intrafirm transactions that is trade among the various parts of the same corporate network spread across borders and the bulk of technology is transferred within the confines of integrated international production systems This means that FDI and the operations of multinational corporations have become central to the world economy at large Nowhere is this more important than for developing countries But as Theodore Moran argues in this new volume FDI is not a single phenomenon FDI has such different impacts in the extractive sector infrastructure manufacturing and assembly and services and presents such distinctive policy challenges that each broad category of FDI must be treated on its own terms Indeed past studies that have aggregated all FDI flows together to try to find some unique relationship to host country growth or welfare have led to unreliable substantive findings and sometimes mistaken policy conclusions Moran examines each of the principal forms of FDI extracts the best from previous analysis and offers new findings and perspectives about how benefits from FDI in each sector can be enhanced and potential damages limited or eliminated **Harnessing Foreign Direct Investment for Development** Theodore H. Moran, 2006 Is foreign direct investment good for development Moving beyond the findings of his previous book *Does Foreign Direct Investment Promote Development* CGD and IIE 2005 Theodore H Moran presents surprisingly good and startlingly bad news The good news highlights how foreign direct investment can make a contribution to development significantly more powerful and more varied than conventional measurements indicate The bad news reveals that foreign direct investment can also distort host economies and polities with consequences substantially more adverse than critics and cynics have imagined This book rigorously examines the principal controversies and debates about FDI in manufacturing and assembly extractive industries and infrastructure in light of new evidence and analysis Written in engaging prose it identifies how developed and developing countries multilateral lending agencies and civil society can work in concert to harness foreign direct investment to promote the growth and welfare of developing countries *Nation-States and the Multinational Corporation* Nathan M. Jensen, 2008-01-21 What makes a country attractive to foreign investors To what extent do conditions of governance and politics matter This book provides the most systematic exploration to date of these crucial questions at the nexus of politics and economics Using quantitative data and interviews with investment promotion agencies investment location consultants political risk insurers and decision makers at multinational corporations

Nathan Jensen arrives at a surprising conclusion Countries may be competing for international capital but government fiscal policy both taxation and spending has little impact on multinationals investment decisions Although government policy has a limited ability to determine patterns of foreign direct investment FDI inflows political institutions are central to explaining why some countries are more successful in attracting international capital First democratic institutions lower political risks for multinational corporations Indeed they lead to massive amounts of foreign direct investment Second politically federal institutions in contrast to fiscally federal institutions lower political risks for multinationals and allow host countries to attract higher levels of FDI inflows Third the International Monetary Fund often cited as a catalyst for promoting foreign investment actually deters multinationals from investment in countries under IMF programs Even after controlling for the factors that lead countries to seek IMF support IMF agreements are associated with much lower levels of FDI inflows

Evenett, Shahid Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain growth rates far higher than those of other countries developing or industrial However the economic crisis of 1997 98 impacted the economies of these countries Although recovery began fairly quickly in some countries others have yet to regain their growth momentum *Can East Asia Compete* looks at whether or not East Asia can restore its near magical performance or is its competitive strength beginning to wane This volume argues that East Asian countries have far from exhausted their growth potential However future competitiveness will depend on much greater innovative capability in manufacturing and services innovativeness that is grounded in stronger institutions improved macroeconomic policies and closer regional coordination *Can East Asia Compete*

International Economic Law and the Digital Divide Rohan Kariyawasam,2008-01-01 In this well researched book the author explains the digital divide and its repercussions for developed and developing nations In his view the overzealous disciplining at the WTO level of instruments affecting trade notwithstanding developing countries still have important tools in their hands intellectual property protection competition policies tax regimes that can help them attract foreign direct investment a crucial ingredient in reducing the current divide Borrowing from the institutions that we have seen developed in international economic relations is highly recommended as well In short whether the divide will continue to persist or conversely whether it will gradually become a historical feature of international relations critically depends on the political will on both sides of the divide The author makes a persuasive argument to support his thesis empirically researched and with strong foundations in theory Petros C Mavroidis Columbia Law School US and University of Neuchâtel Switzerland This path breaking book focuses on the WTO e commerce and information communications technologies It sheds light on how international economic law can be used as a tool in the application of technological processes to facilitate development in developing countries Rohan Kariyawasam begins by looking predominantly at the rise of international digital networks He offers an introduction to the networks used in the delivery of electronic products and network based transactions and the application of WTO law to the sector He then suggests how developing countries can use economic law and technology to tap digital markets in the developed world The book also argues that the advance of basic living standards in some developing countries can be achieved through technological processes but that this cannot happen without such states paying greater attention to the enforcement of economic social and cultural rights at home Picking up the property rights debate including through bilateral trade the author argues that ensuring beneficial technology transfer will require balancing foreign investor rights to protect intellectual property It will also involve restrictions imposed by competition law and WTO surveillance to check the possible misuse of market power by multinational companies The proposed mixture of

measures should he argues provide incentives for Foreign Direct Investment Providing a thorough review of the application of WTO law to the telecommunications sector and the regulation of international digital networks this book will be of great interest to postgraduate students in international economic law and international development law as well as those interested in human rights law and technology It will also appeal to government regulators NGOs and technologists interested in ICTs and development
