Parental Loss Of A Child

Jhodie R. Duncan, Roger W. Byard

Parental Loss Of A Child:

Parental Loss of a Child Therese A. Rando, 1986 Parental loss of a child is unlike any other loss The grief of parents is particularly severe complicated and long lasting with major and unparalleled symptom fluctuations over time Parental Loss of a Child investigates this specific and quite unique case of bereavement *Surviving the Loss of a Child* Elizabeth B. Brown, 2010-03-01 Nothing can steal peace and joy and undermine the very foundation of someone's life like losing a child It is devastating on a level that most of us can't imagine Written after the loss of the author's own child *Surviving the Loss of a Child* offers encouragement and hope to those who may think they will never be able to live fully after such tragedy Bereaved parents as well as friends counselors pastors and caregivers will find this book a source of comfort and discover coping mechanisms as they move through their grief Revised and updated it has short chapters that are easy to take in perfect for people going through this difficult time *When Children Die* Institute of Medicine, Board on Health Sciences Policy, Committee on Palliative and End-of-Life Care for Children and Their Families, 2003-02-09 The death of a child is a special sorrow No matter the circumstances a child's death is a life altering experience Except for the child who dies suddenly and without forewarning physicians nurses and other medical personnel usually play a central role in the lives of children who die and their families At best these professionals will exemplify medicine with a heart At worst families encounters with the health care system will leave them with enduring painful memories anger and regrets *When Children Die* examines what we know about the needs of these children and their families the extent to which such needs are and are not being met and what can be done to provide more competent compassionate and consistent care The book offers recommendations for involving child patients in treatment decisions communicating with parents strengthening the organization and delivery of services developing support programs for bereaved families improving public and private insurance training health professionals and more It argues that taking these steps will improve the care of children who survive as well as those who do not and will likewise help all families who suffer with their seriously ill or injured child Featuring illustrative case histories the book discusses patterns of childhood death and explores the basic elements of physical emotional spiritual and practical care for children and families experiencing a child's life threatening illness or injury SIDS Sudden infant and early childhood death Jhodie R. Duncan, Roger W. Byard, 2018-03-31 This volume covers aspects of sudden infant and early childhood death ranging from issues with parental grief to the most recent theories of brainstem neurotransmitters It also deals with the changes that have occurred over time with the definitions of SIDS sudden infant death syndrome SUDI sudden unexpected death in infancy and SUDIC sudden unexpected death in childhood The text will be indispensable for SIDS researchers SIDS organisations paediatric pathologists forensic pathologists paediatricians and families in addition to residents in training programs that involve paediatrics It will also be of use to other physicians lawyers and law enforcement officials who deal with these cases and should be a useful addition to all medical examiner

forensic paediatric and pathology departments hospital and university libraries on a global scale Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade a text such as this is very timely and is also urgently needed *Grieving Parents* Kat Biggie Press,Nathalie Himmelrich,CarlyMarie Dudley,2014-09-28 This book is not about one story of loss or one grief therapy approach This book contains exactly what grieving couples have asked for what they wanted to know in exactly your situation what they have mentioned and pointed out they would need or would have needed in that horrendous time of loss Books written by bereaved parents often follow the formula My life was beautiful then my child or baby died and then my life was never the same again I had to write a book about it These books are usually self therapy rather than a way to help others Books by therapists often talk about their work from a theoretical basis that lacks personal experience They discuss people who experience complicated or chronic grief as opposed to encouraging the resilience that lies within each and every one of us I have experienced the loss of a child and I am a grief therapist but this book is not a memoir about my loss Neither is it just a book written from the perspective of a therapist having worked with countless clients experiencing loss This book focuses on the effect parental bereavement has on the parents and their relationship It is about surviving loss as a couple and the re emerging from grief into a life of joy and melancholy laughter and tears happiness and sadness Not either or but BOTH AND This book will teach you understanding and acceptance of the grieving process each and everyone chooses In a relationship each partner is equally responsible to take part in sailing the ship together Surviving Loss as a Couple is about how you can re emerge from this crazy ride through the darkness of grief with renewed depth and understanding with your partner This book is based on bereaved parents needs challenges and what they said has helped them based on a worldwide survey I have conducted It contains detailed descriptions of what has helped eighteen individuals and couples that I have interviewed couples in varying situations and at different stages of their journey with grief *When Children Grieve* John W. James,Russell Friedman,Dr. Leslie Matthews,2002-06-04 To watch a child grieve and not know what to do is a profoundly difficult experience for parents teachers and caregivers Yet there are guidelines for helping children develop a lifelong healthy response to loss In *When Children Grieve* the authors offer a cutting edge volume to free children from the false idea of not feeling bad and to empower them with positive effective methods of dealing with loss There are many life experiences that can produce feelings of grief in a child from the death of a relative or a divorce in the family to more everyday experiences such as moving to a new neighborhood or losing a prized possession No matter the reason or degree of severity if a child you love is grieving the guidelines examined in this thoughtful book can make a difference **After the Death of a Child** Ann K. Finkbeiner,1996 For a parent losing a child is the most devastating event that can occur Most books on the subject focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond

Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Refusing to fall back on pop jargon about recovery or to offer easy suggestions or standardized timelines Finkbeiner's is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived Continuing Bonds

Dennis Klass, Phyllis R. Silverman, Steven Nickman, 2014-05-12 First published in 1996 This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased thereby freeing the survivor to reinvest in new relationships in the present Pathological grief has been defined in terms of holding on to the deceased Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do Presenting data from several populations 22 authors among the most respected in their fields demonstrate that the health resolution of grief enables one to maintain a continuing bond with the deceased Despite cultural disapproval and lack of validation by professionals survivors find places for the dead in their on going lives and even in their communities Such bonds are not denial the deceased can provide resources for enriched functioning in the present Chapters examine widows and widowers bereaved children parents and siblings and a population previously excluded from bereavement research adoptees and their birth parents Bereavement in Japanese culture is also discussed as are meanings and implications of this new model of grief Opening new areas of research and scholarly dialogue this work provides the basis for significant developments in clinical practice in the field **The Goodbye Book**, 2015-11-03 From bestselling

without As any grieving parent will tell you there are no words to describe the hell one experiences after the death of a child Many men have no clue how to deal with or understand the myriad emotional mental and physical responses experienced after the death of a child Stories appearing in the book have been carefully selected to represent a cross section of fathers as well as a diverse portrayal of loss This approach helps reflect the full spectrum of grief from the early days of shock and trauma to the long view after living with loss for many years Any bereaved father will find brotherhood in these pages and will feel that someone understands them While there is plenty of raw emotion in this book the stories are not exercises in self pity nor are they studies in grief They are survival stories instead Some are testimonies to hope Some are gut wrenching accounts of overwhelming despair But all of them are real life stories from real life grieving dads and they show that even if one reaches his physical and emotional bottom it is possible although not easy to live through that pain and find one s way to the other side of grief Most dads in this book found themselves in a state of physical mental and emotional collapse after the death of their child As if the losses alone weren t enough to drive these men to the brink most try to deal with their grief according to the conventional wisdom so many men are brought up with which perversely increases their suffering all the more We all know the party line about how men are supposed to deal with loss or even disappointment toughen up get back to work take it like a man support your wife don t talk about your emotions don t lose control and if you must cry by all means do so in private **Bereavement: Reactions, Consequences and Care** Institute of Medicine (U.S.).
