Parenting Children With Disabilities:

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21

Decades of research have demonstrated that the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children's well being and healthy development. From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills charting a trajectory for their health and well being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance parenting can enrich and give focus to parents' lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include a rapidly growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U.S. population and greater diversity of family structure. Additionally parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0-8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders for promoting the wide scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States.

Family Consequences of Children's Disabilities Denis P. Hogan, 2012-04-01 The Americans with Disabilities Act ADA and other national policies are designed to ensure the greatest possible inclusion of people with disabilities in all aspects of American life But as a matter of national policy we still place the lion's share of responsibility for raising children with disabilities on their families While this strategy largely works sociologist Dennis Hogan maintains the reality is that family financial security the parents relationship and the needs of other children in the home all can be stretched to the limit In *Family Consequences of Children's Disabilities* Hogan delves inside the experiences of these families and examines the financial and emotional costs of raising a child with a disability The book examines the challenges families of children with disabilities encounter and how these challenges impact family life The first comprehensive account of the families of children with disabilities *Family Consequences of Children's Disabilities* employs data culled from seven national surveys and interviews with twenty-four mothers of children with disabilities asking them questions about their family life social supports and how other children in the home were faring Not surprisingly Hogan finds that couples who are together when their child is born have a higher likelihood of divorcing than other parents do The potential for financial insecurity contributes to this anxiety especially as many parents must strike a careful balance between employment and caregiving Mothers are less likely to have paid employment and the financial burden on single parents can be devastating One-third of children with disabilities live in single-parent households and nearly 30 percent of families raising a child with a disability live in poverty Because of the high levels of stress these families incur support networks are crucial Grandparents are often a source of support Siblings can also assist with personal care and consequently tend to develop more helpful attitudes be more inclusive of others and be more tolerant But these siblings are at risk for their own health problems they are three times more likely to experience poor health than children in homes where there is no child with a disability Yet this book also shows that raising a child with a disability includes unexpected rewards the families tend to be closer and they engage in more shared activities such as games television and meals *Family Consequences of Children's Disabilities* offers access to a world many never see or prefer to ignore The book provides vital information on effective treatment rehabilitation and enablement to medical professionals educators social workers and lawmakers This compelling book demonstrates that every mirror has two faces raising a child with a disability can be difficult but it can also offer expanded understanding A Volume in the American Sociological Association's Rose Series in Sociology

Grandparenting Children with Disabilities Madonna Harrington Meyer, Ynesse Abdul-Malak, 2020-08-29 Childhood disabilities particularly cognitive disabilities are on the rise yet social programs and services to help US families respond to disabilities are not Many families turn to grandparents for assistance juggling work family responsibilities and specialized therapies This book is based on in-depth interviews with grandparents who are providing at least some care to grandchildren with disabilities The analyses will help to better understand 1 under what

conditions grandparents provide care and support 2 what types and intensities of care and support grandparents provide and 3 the impact of that care and support on grandparents social emotional physical and financial wellbeing In this fascinating and provocative book Madonna Harrington Meyer and Ynesse Abdul Malak take readers on a deep dive into the complex lives of grandparents who care for their disabled grandchildren In *Grandparenting Children with Disabilities* their interviews reveal the joy meaning and purpose grandparents find in caregiving the challenges and frustrations they encounter and the many ways they compromise their own health and well being for the sake of their grandchildren Drawing from theories of cumulative inequality and from their deep knowledge of the US policy context the authors lay bare the systemic failures that leave families of children with disabilities without adequate support and that place the most vulnerable among them at grave physical emotional and financial risk Jane McLeod Provost Professor Indiana University Grandparents in the U S already take on far more parenting responsibilities as compared to their peers in other countries *Grandparenting Children with Disabilities* demonstrates that the intensity of these responsibilities is compounded for those whose grandchildren have disabilities given limited policy supports and a society still largely unaccommodating to those with disabilities This book beautifully navigates the tension between the love these grandparents have for their grandchildren and the challenges they face caring for them Pamela Herd Professor Georgetown University *Grandparenting Children with Disabilities* offers important insights about the lived experience of older adults who care for and care about their grandchildren The authors skillfully integrate the stories they tell with consideration of macro social structural influences and life course perspectives I recommend it highly Eva Kahana Distinguished University Professor Case Western Reserve *Professional Collaboration with Parents of Children with Disabilities* Louise Porter, Susan McKenzie, 2000-10-23 The work of professionals with children with disabilities affects the children s family while events at home affect what professionals can achieve with the children This text describes how professionals can form collaborative relationships with the parents of the children in their care to optimise the children s development and to enable both family members and professionals to work in the children s interests It describes experiences of families who have a child with a disability and takes a new look at old assumptions that disability necessarily has a negative effect on families or that families themselves are in need of therapy simply by virtue of having a child with additional needs This text offers practical insights and guidelines for action by teachers occupational therapists physiotherapists speech pathologists and psychologists It is a practical text that enables practitioners to offer a high quality service to children while supporting the family in its role of nurturing their child with special needs Changed by a Child Barbara Gill, 1998-08-17 Raising a child with a disability can often be more isolating and frustrating than any parent ever imagines Finally here is a book that honestly describes the inner needs and range of issues parents with disabled children face *Changed by a Child* invites parents to take a moment for themselves Each of the brief readings offers comfort and hope as they capture the unique challenges and joys of raising a disabled child What I Would Tell You Julie Keon, 2015-04

A Celebration of Family Dave Matheis, 2021-07-09. *A Celebration of Family Stories of Parents with Disabilities* contains the stories of thirty families. In every family, one or both parents have disabilities: physical, mental, sensory, and/or intellectual. The stories illustrate the infinite variety of the American family. It is that variety that gives the family both its strength and its beauty. Like individuals, no two families are the same. In the course of discussing their family experiences, the parents cover a number of topics. Most stories concern having children through birth, but there are also stories about fostering and adopting. Four stories concern single parenthood. Many parents talk about adaptations and accommodations they made to be effective parents, but even more talk

about how wonderfully adaptive their children were to their disabilities Many parents talk about individual discrimination and societal bias they have faced A number of stories highlight the decision making process to have children when the possibility exists of passing on an inheritable condition Parents are included that had children before they acquired a disability and they relate how that acquired disability affected their family Several stories discuss legal and policy issues around parenting with a disability The stories contain humor compassion and gratitude They are proof that one thing you can get any parent to talk about is their children As one parent in the book puts it if you suck as a person you are going to suck as a parent whether you have a disability or not If you are compassionate and caring and nurturing as a person you will be like that as a parent too
