The Promise of

Adolescence National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Neurobiological and Socio-behavioral Science of Adolescent Development and Its Applications, 2019-07-26 Adolescence beginning with the onset of puberty and ending in the mid 20s is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied both to promote adolescent well-being, resilience, and development and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish. **Adolescents, Families, and Social**

Development Judith G. Smetana, 2010-12-13 This book provides an in-depth examination of adolescents' social development in the context of the family. Grounded in social domain theory, the book draws on the author's research over the past 25 years. It draws from the results of in-depth interviews with more than 700 families, explores adolescent parent relationships among ethnic majority and minority youth in the United States, as well as research with adolescents in Hong Kong and China. It discusses extensive research on disclosure and secrecy during adolescence, parenting autonomy, and moral development. It considers both popular sources such as movies and public surveys as well as scholarly sources drawn from anthropology, history, sociology, social psychology, and developmental psychology. It explores how different strands of development, including autonomy, rights, and justice, and society and social convention, become integrated and coordinated in adolescence. *The New Adolescence* Christine Carter, 2020-02-18 Parents of teenagers need a new playbook, one that addresses the new challenges they face today. Teens are growing up in an entirely new world, and this has huge implications for our parenting. Understandably, many parents are baffled by problems that didn't exist less than a decade ago, like social media and video game obsession, sexting, and vaping. *The New Adolescence* is a realistic and reassuring handbook for parents. It offers road-tested, science-based solutions for raising happy, healthy, and successful teenagers. Inside, you'll find practical guidance for providing the support and structure teens need while still giving them the autonomy they seek; influencing and motivating teenagers; helping kids overcome distractions that hinder their learning; protecting them from anxiety, isolation, and depression; fostering the real-world face-to-face social connections they desperately need; having effective conversations about tough subjects including sex, drugs, and money. A highly acclaimed sociologist and coach at UC Berkeley's Greater Good Science Center and the author of *Raising Happiness*, Dr. Christine Carter melds research, including the latest findings in

neuroscience sociology and social psychology with her own often hilarious real world experiences as the mother of four teenagers
