Children's Adaptation to Elementary School Philip A. Cowan,Carolyn Pape Cowan,Jennifer C. Ablow,Vanessa Kahn Johnson,Jeffrey R. Measelle,2005-05-06 The Family Context of Parenting in Children s Adaptation to Elementary School is a result of a longitudinal prevention study of 100 families begun the year before their first children entered kindergarten Each family went through an assessment and then a subset was randomly chosen for group intervention The children in both groups were then studied as they progressed through kindergarten and first grade to assess the quality of their adaptation to the school environment The text focuses on how parent child relationships are only one determinant of a child s academic competence social competence and behavior Rather these relationships must be understood in the context of the role they play within the family as a system It also addresses the recent challenges to claims about the impact of parents on their

children's development The book sheds additional light on family influences within the larger social environment as a key determinant of the quality of children's adjustment to schooling It appeals to scientists professionals and parents alike
