The Real World of College Wendy Fischman, Howard Gardner, 2023-08-01 Why higher education in the United States has lost its way and how universities and colleges can focus sharply on their core mission For The Real World of College Wendy Fischman and Howard Gardner analyzed in depth interviews with more than 2 000 students alumni faculty administrators parents trustees and others which were conducted at ten institutions ranging from highly selective liberal arts colleges to less selective state schools What they found challenged characterizations in the media students are not preoccupied by political correctness free speech or even the cost of college They are most concerned about their GPA and their resumes they see jobs and earning potential as more important than learning Many say they face mental health challenges fear that they don't belong and feel a deep sense of alienation Given this daily reality for students has higher education lost its way Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission Fischman and Gardner both recognized authorities on education and learning argue that higher education in the United States has lost sight of its principal reason for existing not vocational training not the provision of campus amenities but to increase what Fischman and Gardner call

higher education capital to help students think well and broadly express themselves clearly explore new areas and be open to possible transformations Fischman and Gardner offer cogent recommendations for how every college can become a community of learners who are open to change as thinkers citizens and human beings

The Years That Matter Most Paul Tough, 2019-09-12 What has gone wrong in our universities And how do we make it right When Amy applied to university she thought she d be judged purely on her merits But she never thought that her family background would have as much impact on her future as her grades When KiKi arrived at university she knew she could be the only black woman in her class But she didn t know how out of place she would feel nor how unwelcoming her peers would be When Orry graduated from university he was told he d probably land a six figure salary But he wasn t told he d end up barely scraping a living wage struggling to feed his children Drawing on the stories of hundreds of American students The Years That Matters Most is a revelatory account of a university system in crisis Paul Tough bestselling author of How Children Succeed exposes a world where small town colleges go bust while the most prestigious raise billions every year where overstretched admissions officers are forced to pick rich candidates over smart ones where black and working class students are left to sink

or swim on uncaring campuses Along the way he uncovers cutting edge research from the academics leading the way to a new kind of university one where students succeed not because of their background but because of the quality of their minds The result is a call to arms for universities that work for everyone and a manual for how we can make it happen *Letting Go* Karen Levin Coburn, Madge Lawrence Treeger, 1988 *There Is Life After College* Jeffrey J. Hamilton, 2016-04-29 Helicopter parents the kind that continue to hover even in college are one of the most ridiculed figures of twenty first century parenting criticized for creating entitled young adults who boomerang back home But do involved parents really damage their children and burden universities In this book sociologist Laura T Hamilton illuminates the lives of young women and their families to ask just what role parents play during the crucial college years Hamilton vividly captures the parenting approaches of mothers and fathers from all walks of life from a CFO for a Fortune 500 company to a waitress at a roadside diner As she shows parents are guided by different visions of the ideal college experience built around classed notions of women s work family plans and the ideal age to grow up Some are intensively involved and hold adulthood at bay to cultivate specific traits professional helicopters for instance help develop the skills and credentials that will advance their daughters careers while pink helicopters emphasize appearance charm and social ties in the hopes that women will secure a wealthy mate In sharp contrast bystander parents whose influence is often limited by economic concerns are relegated to the sidelines of their daughter s lives Finally paramedic parents who can come from a wide range of class backgrounds sit in the middle intervening in emergencies but otherwise valuing self sufficiency above all Analyzing the effects of each of these approaches with clarity and depth Hamilton ultimately argues that successfully navigating many colleges and universities without involved parents is nearly impossible and that schools themselves are increasingly dependent on active parents for a wide array of tasks with intended and unintended consequences Altogether
