**Parricide and Violence against Parents** Marianna Muravyeva, Phillip Shon, Raisa Maria Toivo, 2020-12-30 Parricide and Violence Against Parents takes a historical and criminological approach to the research on parricide and violence against parents placing the research in the context of social development from the 1500s to contemporary society and giving a global overview and comparison The book examines parricide and violence against parents as historically and culturally sensitive phenomena It offers evidence on a seemingly rare subject from different eras areas and cultures and then uses the cross disciplinary data to produce a new systematic insight for the reader Case studies shift the discussion from the contemporary focus on adolescent to parent abuse to examining the sources of conflict during life cycles of parents and their offspring A historical approach illuminates the variations in conflicts between parents and their offspring that are shaped by the life stages of the victims and offenders themselves across time The book argues that parental authority has been marked by property ownership and tax paying responsibilities throughout history The continued possession of property resulted in power the reluctance to part with it becoming a notable source of conflict across generations within families Parental authority was protected by means of heavy penalties and punishments and didactic teachings in almost every society at every stage of historical development It was also challenged constantly by children as a part of their coming into adulthood The

abuse of parents has often been connected to situations where adult children were prevented from gaining the amount of independence appropriate to their position in life This led to disputes over authority and the legitimate grounds for that authority Offering an insight into complicated and interconnected histories of generational conflicts and how they affect modern families in different parts of the world this book will be of great interest to students and scholars of criminology history of crime history of the family family violence homicide studies gender studies history of emotions political violence and social work **Reassessing Social Work Practice with Children** John Pardeck,Martha Markward,1997-07-21

Physical and mental abuse gang related violence homelessness and neglect are just a few of the dangers that a child must face Child welfare officers school social workers and family service providers have been the primary line of defense against these hazards but in order to provide a more effective form of social care these fields must be seen as an integrated whole They must also have the skill to act as multidisciplinary teams Taken from an issue of the journal Early Child Development and Care *Reassessing Social Work Practice with Children* provides professionals with a dynamic orientation that offers a holistic approach to social work practice with children This view encompasses any and all measures of practice designed to protect and promote the bio psycho social development of children including education protective services and substitutive services *Human Services and the Media* Edward Allan Brawley,1995 This practical guide demonstrates how to work with newspapers magazines radio and television to promote social programs and to shape public policy It includes numerous examples of how cooperative efforts with the media have improved the public s understanding of the helping profession educated the community about social problems and spread preventive messages An informed and supportive public at large is critical to the success of programs promoting health and mental health and the mass media are the most powerful means of reaching the public Yet few human services professionals know how to tap into this power Psychological Perspectives on Understanding and Addressing Violence Against Children Scott L. Moeschberger,Laura E. Miller-Graff,2023 Violence against children is one of the most significant widespread and preventable threats to human development in our world today Children are the future of our society and understanding and addressing violence against children is critical to building cultures and systems that promote a just and sustainable peace This edited volume aims to provide an integrative review of psychological research on violence against children from a global perspective Drawing from frameworks in both psychology and peace studies contributors focus on the psychological research across global settings to illustrate the nature and effects of violence against children in various settings and examine recommendations for prevention practice and policy

**Child-to-Parent Violence: Challenges and Perspectives in the Current Society** Lourdes Contreras,M. Carmen Cano-Lozano,Francisco Javier Rodríguez-Díaz,Melanie Simmons,2021-08-25 **Parenting Matters** National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Supporting the Parents of Young Children,2016-11-21 Decades of research have demonstrated that

the parent child dyad and the environment of the family which includes all primary caregivers are at the foundation of children's well being and healthy development From birth children are learning and rely on parents and the other caregivers in their lives to protect and care for them The impact of parents may never be greater than during the earliest years of life when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment Parents help children build and refine their knowledge and skills charting a trajectory for their health and well being during childhood and beyond The experience of parenting also impacts parents themselves For instance parenting can enrich and give focus to parents lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger Parenting of young children today takes place in the context of significant ongoing developments These include a rapidly growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U S population and greater diversity of family structure Additionally parenting is increasingly being shaped by technology and increased access to information about parenting Parenting Matters identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0-8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents use of practices that lead to healthy child outcomes as well as their participation in effective programs and services This report makes recommendations directed at an array of stakeholders for promoting the wide scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States

Gangs in America's Communities James C. Howell, Elizabeth Griffiths, 2015-03-04 Gangs in America's Communities offers a comprehensive up to date and theoretically grounded approach to gangs and associated youth violence Authors Dr James C Howell and Dr Elizabeth Griffiths introduce readers to the foundations of gang studies through the origins of gangs definitions and categories of youth street gangs transnational as well as prison gangs and the distinctions between these arguably different types national trends in gang presence and gang related violence across American cities distinguishing attributes of serious street gangs and myths and realities Students and instructors will benefit from the Second Edition's comprehensive treatment of the state of the literature on individual level causes and consequences of gang membership Going beyond the traditional topics covered in most texts in the market this book uniquely describes

specific gang patterns trends and cultures within a group based structure while illuminating the most promising avenues for reducing the presence and seriousness of gangs in American communities      **Ecological Contexts of Delinquency** Ishien Li,1996      **How Children Learn from Parents and Parenting Others in Formal and Informal Settings:**

**International and Cultural Perspectives, 2nd Edition** Yvette Renee Harris,Claudio Longobardi,2020-07-28 For several decades parent child cognitive interaction researchers have acknowledged that children learn cognitive skills in the context of their social and early environments These cognitive skills are often imparted to the children by parents or parenting others in formal or informal settings Thus for example such informal settings as dinner table conversations walks through grocery stores museums or neighborhoods become rich laboratories for children to learn varied cognitive skills ranging from numeracy concepts and language The way in which those learning opportunities are provided by parents structured by parents and scaffolded by parents may well vary depending on culture and other socio demographic variables and may well vary depending on formal or informal settings The aim of this Research Topic is to bring together scholarship from both global north and global south contexts which explores how children learn via parental involvement in formal and informal settings Publisher s note In this 2nd edition the following article has been added Harris YR and Longobardi C 2020 Editorial How Children Learn From Parents and Parenting Others in Formal and Informal Settings International and Cultural Perspectives Front Psychol 11 1026 doi 10 3389/fpsyg 2020 01026      **The Primordial Violence** Murray A. Straus,Emily M. Douglas,Rose Anne Medeiros,2013-09-11 A CHOICE Outstanding Academic Title 2014 Why do parents hit those they love What effect does it have on children What can be done to end this pattern These are some of the questions explored in The Primordial Violence Featuring longitudinal data from over 7 000 U S families as well as results from a 32 nation study the book presents the latest research on the extent to which spanking is used in different cultures and the subsequent effects of its use on children and on society Evidence that shows the relationship between spanking and the subsequent slowing of cognitive development and increase in antisocial and criminal behavior is shown Both cross sectional and longitudinal studies are explored in an accessible fashion An abundance of high quality research has produced findings that are highly consistent from study to study which show that spanking is a risk factor for aggressive behavior and other social and psychological problems Because of these findings the authors argue for policy changes and recommend a drastic reduction in the use of spanking Policy and practical implications are explored in most chapters The Primordial Violence highlights The benefits of avoiding spanking such as the development of better interpersonal skills and higher academic achievement The link between spanking and behavioral problems and crime The extent to which spanking is declining and why despite the unusually high level of agreement between numerous studies which found harmful effects from spanking most parents continue to spank Part 1 documents the worldwide use of spanking and why parents spank The possible adverse effects of spanking on children s behavior and academic achievement and the potential for violence and criminal behavior in later life are explored in Parts 2

3 and 4 Part 5 examines trends in spanking and suggests what can be done to lower the percent of parents who spank Contradictory opinions about whether to spank are explored The book concludes with a call for change in this aspect of parenting which will have profound benefits for the children and families involved and society as a whole Intended for a general audience of readers who are interested in child development and parenting and for advanced undergraduate and or graduate courses in child abuse family violence juvenile delinquency criminal behavior social development sociology of the family or parenting and family relations taught in psychology human development family studies criminology education social work sociology and social policy *Childhood Trauma in Mental Disorders* Gianfranco Spalletta,Delfina Janiri,Federica Piras,Gabriele Sani,2020-08-29 This volume presents a comprehensive overview of childhood trauma considering the psychopathological definition and its neurobiological implications as well as its impact on different psychiatric disorders The focus on childhood trauma rather than that occurring in adulthood is important due to its general neuro psycho socio and its specific biological implications since trauma during childhood impacts directly on neurodevelopment It has been suggested that early life stress increases vulnerability to psychiatric disorders however the exact mechanisms of this association are not yet completely understood Although childhood trauma could be considered too unspecific to be an important risk factor for individual psychiatric disorders since it seems to occur across the board it impacts differently on different psychiatric disorders and it can modulate their clinical expression Therefore the assessment of early trauma needs to be included in the clinical evaluation of patients with psychiatric disorders The volume will be an invaluable tool for psychiatrists helping them to select suitable pharmacological psychotherapeutic and rehabilitative treatments [Social Control and Self-Control Theories of Crime and Deviance](#) L. Edward Wells,2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi s seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency **The Routledge International Handbook of Biosocial Criminology** Matt DeLisi,Michael G Vaughn,2014-12-05 Biosocial criminology is an interdisciplinary field that aims to explain crime and antisocial behavior by exploring both biological factors and environmental factors Since the mapping of the human genome scientists have been able to study the biosocial causes of human behaviour with the greatest specificity After decades of almost exclusive sociological focus criminology has undergone

a paradigm shift where the field is more interdisciplinary and this book combines perspectives from criminology and sociology with contributions from fields such as genetics neuropsychology and evolutionary psychology The Routledge International Handbook of Biosocial Criminology is the largest and most comprehensive work of its kind and is organized into five sections that collectively span the terrain of biosocial research on antisocial behavior Bringing together leading experts from around the world this book considers the criminological genetic and neuropsychological foundations of offending as well as the legal and criminal justice applications of biosocial criminological theory The handbook is essential reading for students researchers and practitioners from across the social behavioural and natural sciences who are engaged in the study of antisocial behaviour
