## Parents And The Experts:

*Raising America* Ann Hulbert, 2011-01-26 Since the beginning of the twentieth century millions of anxious parents have turned to child rearing manuals for reassurance. Instead, however, they have often found yet more cause for worry. In this rich social history, Ann Hulbert analyzes one hundred years of shifting trends in advice and discovers an ongoing battle between two main approaches: a child-centered focus on warmly encouraging development versus a sterner parent-centered emphasis on instilling discipline. She examines how pediatric psychology and neuroscience have fueled the debates but failed to offer definitive answers. And she delves into the highly relevant and often turbulent personal lives of the popular advice givers from L. Emmett Holt and Arnold Gesell to Bruno Bettelheim and Benjamin Spock to the prominent and ever-conflicting experts of today.

Great Psychologists as Parents David Cohen, 2016-09-29 Does it make you a better parent if you have pioneered scientific theories of child development? In a unique study, David Cohen compares what great psychologists have said about raising children and the way they did it themselves. Did the experts practice what they preached? Using an eclectic variety of sources from letters, diaries, autobiographies, biographies, as well as material from interviews, each chapter focuses on a key figure in historical context. There are many surprises: Was Piaget the greatest child psychologist of the 20th century, the only man to try to psychoanalyse his mother? How many sons of great gurus have had to rescue their father from a police station, as R. D. Laing's son did? And why did Melanie Klein's daughter wear red shoes the day her mother died? The book covers early scientists such as Darwin, psychoanalysts such as Freud and Jung, to founders of developmental psychology including Piaget and Bowlby, as well as Dr. Spock. It gives a vivid, dramatic and often entertaining insight into the family lives of these great psychologists. It highlights their ideas and theories alongside their behaviour as parents and reveals the impact of their parenting on their children. Close bonds, fraught relationships and family drama are described against a backdrop of scientific development as the discipline of psychology evolves. *Great Psychologists as Parents* will be absorbing reading for students in childhood studies, education and psychology, and practitioners in psychology and psychoanalysis. It will also interest general readers looking for a parenting book with a difference.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family, which includes all primary caregivers, are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can

enrich and give focus to parents lives generate stress or calm and create any number of emotions including feelings of happiness sadness fulfillment and anger Parenting of young children today takes place in the context of significant ongoing developments These include a rapidly growing body of science on early childhood increases in funding for programs and services for families changing demographics of the U S population and greater diversity of family structure Additionally parenting is increasingly being shaped by technology and increased access to information about parenting Parenting Matters identifies parenting knowledge attitudes and practices associated with positive developmental outcomes in children ages 0 8 universal preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge attitudes and practices and barriers to and facilitators for parents use of practices that lead to healthy child outcomes as well as their participation in effective programs and services This report makes recommendations directed at an array of stakeholders for promoting the wide scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice It is meant to serve as a roadmap for the future of parenting policy research and practice in the United States

**Paranoid Parenting** Frank Furedi, 2002 Furedi sociology U of Kent UK especially aims his anti advice book at the worried American parent where anxiety regarding children s safety is at an unprecedented level As evidence he cites the new child care industry that fosters paranoia and offers security companies like Kinderview and Toddlerwatch that allow parents to constantly watch their children from their personal computer Whereas parenting used to be about nurturing and socializing now writes Furedi parenting has become burdensome overparenting too much about keeping children safe from overblown harms Furedi is a frequent guest on British television The book is distributed by the Independent Publishers Group Annotation copyrighted by Book News Inc Portland OR

*3 Day Potty Training* Lora Jensen, 2014-03-04 3 Day Potty Training is a fun and easy to follow guide for potty training even the most stubborn child just 3 days Not just for pee and poop but for day and night too Lora s method is all about training the child to learn their own body signs If the parent is having to do all the work then the child isn t truly trained but with Lora s method your child will learn when their body is telling them that they need to use the potty and they will communicate that need to you
