agreements issued by the Secretary of State as United States treaties and other international agreements      *Knowledge Systems and Translation* Helle V. Dam, Jan Engberg, Heidrun Gerzymisch-Arbogast, 2011-12-22 It is generally agreed that knowledge plays an important role in translation and interpreting and that it should therefore be of central concern to translation and interpreting studies However there is no general agreement about what is actually meant by the term knowledge in this context nor about in exactly what ways it is relevant Also present day translation and interpreting studies offer only a limited amount of research specifically dedicated to knowledge systematization and other knowledge related issues This book is one of the first to systematically and exclusively address the question of knowledge in translation and interpreting It is a collection of papers by leading scholars both from the field of translation and interpreting and from adjacent fields where knowledge also plays an important role such as linguistics and computer science The experts present a wide variety of conceptions of knowledge and a number of different approaches to the study of knowledge in translation and interpreting some of them draw on concepts such as scenes and frames mental spaces and semantic networks some discuss knowledge systems from an ontological point of view and some present more general concepts of knowledge in translation and interpreting Along the same lines some of the contributors deal mainly with theoretical and conceptual aspects others focus on methodological issues and again others report on empirical studies What brings them together however is their common focus on the interface between knowledge and translation interpreting and their main achievement is that by joining forces they manage to present to their readers a state of the art report which offers both a clearer delimitation of the concept of knowledge and a better understanding of its role in translation and interpreting
