Paribas 1872-1992 Europe And The World:

Paribas, 1872-1992 Eric Bussière, 1992 **For Peace and Money** Jennifer Siegel, 2014-11-03 From the late imperial period until 1922 the British and French made private and government loans to Russia making it the foremost international debtor country in pre World War I Europe To finance the modernization of industry the construction of public works projects the building of railroads and the development of the military industrial complex Russia's ministers of finance municipal leaders and nascent manufacturing class turned time and time again to foreign capital From the forging of the Franco Russian alliance onwards Russia's needs were met first and foremost by France and Great Britain its allies and diplomatic partners in the developing Triple Entente Russia's continued access to those ready lenders ensured that the empire of the Tsars would not be tempted away from its alliance and entente partners This web of financial and political interdependence affected both foreign policy and domestic society in all three countries The Russian state was so heavily indebted to its western creditors rendering those western economies almost prisoners to this debt that the debtor nation in many ways had the upper hand the Russian government at times was actually able to dictate policy to its French and British counterparts Those nations investing classes which in France in particular spanned not only the upper classes but the middle rentier class as well had such a vast proportion of their savings wrapped up in Russian bonds that any default would have been catastrophic for their own economies That default came not long after the Bolshevik Revolution brought to power a government who felt no responsibility whatsoever for the debts accrued by the tsars for the purpose of oppressing Russia's workers and peasants The ensuing effect on allied morale the Anglo French relationship and ultimately on international relations in the twentieth century was grim and far reaching Jennifer Siegel narrates a classic tale of money and power in the modern era an age of economic interconnectivity and great power interdependency involving such figures as Lord Revelstoke chairman of Baring Brothers the British and French Rothschild cousins and Sergei Witte Russia's authoritative finance minister during much of this age of expansion *For Peace and Money* highlights the importance of foreign capital in policymaking on the origins and conduct of World War I *The Free-standing Company in the World Economy, 1830-1996* Mira Wilkins, Harm G. Merchant Kings Albert Schrauwers, 2021-04-02 In the nineteenth century the Netherlands and its colonial holdings in Java were the sites of dramatically increased industrialization Led by a group of merchant kings who exemplified gentlemanly capitalism this ambitious trading project transformed the small economically moribund Netherlands into a global power Merchant Kings offers a fascinating interdisciplinary exploration of this episode and reveals not only the distinctive nature of the Dutch state but the surprising extent to which its nascent corporate innovations were rooted in early

welfare initiatives By placing colony and metropole into a single analytical frame this book offers a bracing new approach to understanding the development of modern corporations **High Financier** Niall Ferguson,2012-10-25 In this groundbreaking biography based on more than 10 000 hitherto unavailable letters and diary entries Niall Ferguson returns to his roots as a financial historian to tell the story of the extraordinary Siegmund Warburg A refugee from Hitler s Germany Warburg rose to become the dominant figure in the post war City of London and one of the architects of European financial integration Seared by events in the 1930s when the long established Warburg bank was first almost destroyed by the Depression and then Aryanized by the Nazis Warburg was determined that his own bank would learn from the past and contribute to the economic recovery of Britain the unity of Western Europe and the birth of globalization Siegmund Warburg was a complex and ambivalent man as much a psychologist politician and actor manager as a banker In *High Financier* Niall Ferguson reveals Warburg s idiosyncracies but above all he recaptures the meticulous business methods and strict ethical code that set Warburg apart from the mere speculators and traders who inhabit today s financial world **A Century of Banking Consolidation in Europe** Manfred Pohl,Teresa Tortella,2017-03-02 From the late nineteenth century to the late twentieth century the European banking sector experienced countless mergers and acquisitions The outcome of this century of consolidation is strikingly similar across the continent with the banking sector of each country now dominated by a handful of giant banking corporations Consolidation and concentration trends in banking was the theme of the Academic Archive Colloquium of the European Association for Banking History held in Madrid in June 1997 This volume is comprised of the 18 papers and responses presented at the Colloquium by a truly international group of delegates Some of the themes explored in the book include the significance of mergers for bank archives the regulation of mergers and their impact on banking legislation reactions to consolidation from within and without the banking industry case studies of particular mergers and their impact on the wider banking community Youssef Cassis s introductory chapter provides a general survey of trends in the consolidation process and suggests that the advent of the Euro may herald a new era in the history of European banking consolidation **Europe Since 1914** John M. Tortella,J. García Ruiz,2015-12-11 This book incorporates advances in financial and monetary history and theory and shows the relevance of Spain s story to modern banking monetary and development theory It studies the early development of banking and monetary institutions and shows how financial and monetary mismanagement contributed to the decline of Spain in the early modern era **International Banking for a New Century** Irene Finel-Honigman,Fernando B. Sotelino,2015-06-12 This new textbook provides an up to date overview of international banking as the second decade of the twenty first century unfolds Integrating geo economic operational institutional and regulatory changes in the financial sector

the volume's methodology incorporates specific case studies and research combining theory with practical examples to illustrate the impact and consequences of past and present financial crises. The volume considers the core aspects of international banking including its structural and technical features, historical context, institutional evolution in core markets and wholesale retail investment and private banking. It uses specific examples from past and present literature, post 2008 case studies and histories and research materials offering a fully updated overview of how international banks respond to global crises, the origin, efficacy and evolution of financial markets and the regulatory framework within which they function. One chapter is devoted to the evolution and potential of new markets including the financial sectors of the BRICS and other emerging economies. Each chapter examines background, causes, impact and resolution, focusing on specific cases and their broader implications for the sector. This textbook is a guide to the new and at times uncharted landscape to be navigated by large domestic, cross-regional and global banks and will be invaluable reading for students of finance, business and economics as well as for those in the financial sector.

Banking and Finance in the Mediterranean John A. Consiglio, Juan Carlos Martinez Oliva, Gabriel Tortella, Monika Pohle Fraser, Iain L. Fraser, 2016-12-05. This volume presents a panoramic picture of the many national and international trends and developments, factors, customs and events that have characterised banking in the Mediterranean area over the past two centuries. During this period, banking in the Mediterranean evolved distinct characteristics, several going well beyond the restricted realities of colonial relations. The range of issues covered by the book is extensive and includes both national banking evolution and pan-regional topics. The chapters touch upon various aspects of Iberian, Italian, French, Greek, Maltese, Moroccan and Ottoman banking history, focusing particularly on issues relating to central banking, numismatics, archival recording and pan-Mediterranean economic dynamics. The history of certain specific institutions is also considered, including the Imperial Ottoman Bank, The Ionian Bank, The Banque d'Etat du Maroc and others. Bringing together papers by leading banking and finance historians, which were first presented at the European Association for Banking History conference held in Malta in June 2007, this volume offers an invaluable insight towards a wider and more detailed understanding of the roles of banking and finance in Mediterranean economic history. Seen in a context of what has hitherto been something of a historical vacuum in terms of the coverage of much writing on European banking and financial history and the importance given to the Mediterranean region's banking history in its own right, this is an innovative book that both contributes towards our knowledge of the subject and establishes a pattern for further work in this important area of European economic history.

European Banks and the American Challenge Stefano Battilossi, Youssef Cassis, 2002. The book provides a fresh historical perspective on the internationalization of banking, business and the emergence of the Euro, Dollar and Euro Bond markets from the late 1950s to the early 1970s, a process which laid the foundations of the subsequent financial globalization. Since the mid-1950s, multilateralism and rapidly growing trade among OECD countries, the gradual though asymmetrical relaxation of exchange controls and the return to external convertibility had sowed the seeds of

economic interdependence and financial integration All these factors actively encouraged American and European banks to pursue the expansion of their international business largely free of regulations and controls affecting their domestic activity International banking of the 1960s was also the forge of a restless wave of financial innovations In fact Euro Dollars along with other minor Euro Currencies and Euro Bonds fostered the emergence of fast growing international money and capital markets mainly based in the City of London which rapidly became the new frontier of growth for banking business Aggressive behaviour of American banks in Europe coupled with an efficient multinational structure and a remarkable degree of financial creativity added a sharp competitive edge to Euro banking Following their multinational customers as much as escaping from cumbersome domestic regulation US banks rapidly attained a dominant position in London while establishing at the same time their footholds on the Continent This volume is based primarily upon largely unexplored archive records and addresses original issues The causes of the primacy of London as an international financial centre are investigated as well as the impact of Euro banking on British clearing banks as a boost towards liability management and business diversification Some wider perspectives are also included which focus on innovative strategies designed by European banks such as consortium banking and other cooperative ventures in response both to the American challenge and to the establishment of the European Community

Management and Business in Britain and France Youssef Cassis, François Crouzet, Terence Richard Gourvish, 1995 A comparison of economic and business development in Britain and France in the 19th and 20th centuries With a mixture of case studies sectoral analysis and comparison this book is a useful addition to an understanding of the evolution of business organization competitiveness and performance Grand Fortunes Michel Pinçon, 1999 Going back for generations the fortunes of great families consist of far more than money they are also symbols of culture and social interaction They are at the heart of dense family and extra family networks of international coalitions and divisions The authors elucidate the mechanisms by which they accumulate and expand their wealth status and influence even while staying out of the public eye Paradoxically there is a quasi collective nature to these private fortunes as families enjoy sojourns at each other's estates help each other weather difficult times and intermarry *Banking, Trade and Industry* Alice Teichova, Ginette Kurgan-van Hentenryk, Dieter Ziegler, 1997-05-15 An account of the rise of banking since the Middle Ages and its place in the modern international economy first published in 1997 Big Business Youssef Cassis, 1999 This is a major comparative study of big business in the three dominant European nations across the 20th century In particular the author looks at the character and performance of the major companies in each country at five snapshot moments through the century In so doing he offers a broad and sweeping analysis of European business amply supported by a wealth of empirical data Cassis view often challenges widely held assumptions about for example entrepreneurial failure in Britain the relationship between big business and the Nazis in Germany and the rebuilding of France in the post war period To fill out his story Cassis looks closely at the role and character of the business elites in each country and their

relationship with wider social and political developments The book will be essential reading for anyone interested in the development of European business and the links between business practice and the wider social and political environment in each country
