1917-1929 Roger Nichols, 2002 The Harlequin Years presents a highly readable yet thorough examination of the Parisian music scene in the decade following World War I Through Nichols s lively prose and in his accounts of institutional politics reception histories and behind the scenes debates these places and personalities spring to life Susan McClary author of Conventional Wisdom **Intellectuals in Twentieth-Century France** Jeremy Jennings, 2016-07-27 This book examines the role and place of the intellectual in twentieth century French society The essays are for the most part written by eminent French scholars and make available to the English speaking reader a growing body of research which explores the ethical and historical issues raised by the prominence of the intellectual in politics since the Dreyfus Affair The volume concludes with an examination of the contrasting and complementary roles of the French and British intellectual *The Sèvres Porcelain Manufactory* Beatrice Pannequin, Tamara Préaud, Karole Bezut, Antoine D'Albis, Bard Graduate Center for Studies in the Decorative Arts, Laurie Dahlberg, Anne Lajoix, Sylvie Millasseau, 1997-01-01 The tumultuous years of the French Revolution left France s prestigious decorative arts industries poised on the brink of ruin It was not until after the fall of the monarchy and the ascendancy of the Consulat and Empire under Napoleon that they began to recover so that by the middle of the nineteenth century they stood at the pinnacle of their achievement This book is the first in depth study of the renowned porcelain works at Sèvres during its virtual rebirth under the 47 year direction of the scientist teacher and administrator Alexandre Brongniart Some 110 working drawings from the Sèvres Archive are reproduced here for the first time in color They celebrate the high skill of the artists whose work often documented contemporary events in France There are table services in the Egyptian and Etruscan taste as well as individual pieces that recall Napoleonic military campaigns There are also exquisite Neoclassical decorations using motifs such as birds butterflies and insects that reflect the century s early fascination with the natural sciences The repertoire of nineteenth century eclecticism is evident in the output of Sèvres from the revival of Gothic and renaissance motifs to the outburst of naturalism Eleven essays by leading authorities assess this dynamic period The Problem of Democracy in Postwar Europe Pepijn Corduwener, 2016-08-25 The current perception of democratic crisis in Western Europe gives a renewed urgency to a new perspective on the way democracy was reconstructed after World War II and the principles that underpinned its postwar transformation This study accounts for the formation of the postwar democratic order in Western Europe by studying how the main political actors in France West Germany and Italy conceptualized democracy and strove over its meaning Based upon a wide range of librarian and archival sources from these countries it tracks changing conceptions of democracy among leading politicians political parties and leaders of social movements and unveils how they were deeply divided over key principles of postwar democracy such as the political party the free market economy representation and civic participation By comparing three national debates on the question what democracy meant and how it should be institutionalized and practiced this study argues that only in the 1970s

conceptions of democracy converged and key political actors accepted each other as democrats with similar conceptions of democracy This study thereby deconstructs the myth of the quick emergence of one consensual Western European model of democracy after 1945 demonstrates that its formation was a long and contentious process in which national differences were often of crucial importance and contributes to an enhanced understanding of the historical roots of the current sentiment of democratic crisis

Principles of an Epistemology of Values Marià Corbí, 2015-10-12 This book addresses the need to create an axiological epistemology This term refers to knowledge of what is axiological i e everything related to human values and the know how on how to manage the study of values In knowledge societies we know and live axiological projects that we do not receive from anyone but that we must construct ourselves in a situation of continuous change In view of the fact that the axiological crisis in which we are immersed is the most serious one that humanity has suffered over its long history the seriousness and urgency of the issue in question is evident Adequate knowledge is required to solve this problem which is at the root of all the problems we are experiencing This work offers a potential solution that in contrast to the past cannot be definitive but must be transformed throughout the continuous changes to ways of life as a result of technoscience It will prove of great value to all those who must operate within human values and motivate groups as well as to those interested in spirituality
