**The German 1918 Offensives** David T. Zabecki,2006-09-27 This is the first study of the Ludendorff Offensives of 1918 based extensively on key German records presumed to be lost forever after Potsdam was bombed in 1944 In 1997 David T Zabecki discovered translated copies of these files in a collection of old instructional material at the U S Army Command and General Staff College at Fort Leavenworth Kansas He presents his findings here for the first time with a thorough review of the surviving original operational plans and orders to offer a wealth of fresh insights to the German Offensives of 1918 David T Zabecki clearly demonstrates how the German failure to exploit the vulnerabilities in the BEF s rail system led to the failure of the first two offensives and how inadequacies in the German rail system determined the outcome of the last three offensives This is a window into the mind of the German General Staff of World War I with thorough analysis of the German planning and decision making processes during the execution of battles This is also the first study in English or in German to analyze the specifics of the aborted Operation HAGEN plan This is also the first study of the 1918 Offensives to focus on the operational level of war and on the body of military activity known as the operational art rather than on the conventional

tactical or strategic levels This book will be of great interest to all students of World War I the German Army and of strategic studies and military theory in general      **Technology Security and National Power** Stephen D. Bryen, 2017-07-05 In *Technology Security and National Power* Stephen D Bryen shows how the United States has squandered its technological leadership through unwise policies Starting from biblical times he shows how technology has either increased national power or led to military and political catastrophe He goes on to show how the US has eroded its technological advantages endangering its own security The scope of *Technology Security and National Power* extends across 3 000 years of history from an induced plague in Athens to chemical weapons at Ypres to an atomic bomb on Hiroshima to the nuclear balance of terror It describes new weapons systems and stealth jets cyber attacks on national infrastructure the looting of America s Defense secrets and much more The core thesis is supported by unique insight and new documentation that reaches into today s conflicted world More than a litany of recent failures and historical errors this book is a wake up call for political actors and government officials who seem unable to understand the threat *Technology Security and National Power* proposes that the United States can again become a winner in today s globalized environment      **World War I Fact Book** William Van der Kloot, 2010-06-15 A glimpse of this devastating war through numbers redesigned inside and out      *Dark Side of the Moon: Wernher von Braun, the Third Reich, and the Space Race* Wayne Biddle, 2012-01-23 A stunning investigation of the roots of the first moon landing forty years ago This illuminating story of the dawn of the space age reaches back to the reactionary modernism of the Third Reich using the life of rocket scientist Wernher von Braun as its narrative path through the crumbling of Weimar Germany and the rise of the Nazi regime Von Braun a blinkered opportunist who could apply only tunnel vision to his meteoric career stands as an archetype of myriad twentieth century technologists who thrived under regimes of military secrecy and unlimited money His seamless transformation from developer of the deadly V 2 ballistic missile for Hitler to an American celebrity as the supposed genius behind the golden years of the U S space program in the 1950s and 1960s raises haunting questions about the culture of the Cold War the shared values of technology in totalitarian and democratic societies and the imperatives of material progress      **Base Bleed** Kenneth K. Kuo, James N. Fleming, 1991 Includes papers presented at a symposium which represent the state of the art in the development of base bleed projectiles and related research and are from recognized experts in the field The papers have undergone a thorough review process      **Design Methodology and Relationships with Science** Marc J de Vries, Nigel Cross, D.P. Grant, 2013-03-09 Many business corporations are faced with the challenge of bringing together quite different types of knowledge in design processes knowledge of different disciplines in the natural and engineering sciences knowledge of markets and market trends knowledge of political and juridical affairs This also means a challenge for design methodology as the academic discipline that studies design processes and methods The aim of the NATO ARW of which this book is the report was to bring together colleagues from different academic fields to discuss this increasing multidisciplinary in the relationship between

design and sciences This multidisciplinary made the conference a special event At a certain moment one of the participants exclaimed This is not a traditional design methodology conference Throughout the conference it was evident that there was a need to develop a common language and understanding to enable the exchange of different perspectives on design and its relationship with science The contributions that have been included in this book show these different perspectives the philosophical the historical the engineering perspective and the practical designer s experience
