**Paris** Patrice L. R HIGONNET,2009-06-30 In an original and evocative journey through modern Paris from the mid eighteenth century to World War II Patrice Higonnet offers a delightful cultural portrait of a multifaceted continually changing city In examining the myths and countermyths of Paris that have been created and re created over time Higonnet reveals a magical urban alchemy in which each era absorbs the myths and perceptions of Paris past adapts them to the cultural imperatives of its own time and feeds them back into the city creating a new environment Paris was central to the modern world in ways internal and external genuine and imagined progressive and decadent Higonnet explores Paris as the capital of revolution science empire literature and art describing such incarnations as Belle Epoque Paris the Commune the surrealists city and Paris as viewed through American eyes He also evokes the more visceral Paris of alienation crime material excess and sensual pleasure Insightful informative and gracefully written Paris illuminates the intersection of collective and individual imaginations in a perpetually shifting urban dynamic In describing his Paris of the real and of the imagination Higonnet sheds brilliant new light on this endlessly intriguing city

*Dividing Paris* Esther da Costa Meyer,2022-02-15 A groundbreaking work of scholarship that sheds critical new light on the urban renewal of Paris under Napoleon III In the mid nineteenth century Napoleon III and his prefect Georges Eug ne Haussmann adapted Paris to the requirements of industrial capitalism endowing the old city with elegant boulevards an enhanced water supply modern sewers and public greenery Esther da Costa Meyer provides a major reassessment of this ambitious project which resulted in widespread destruction in the historic center displacing thousands of poor residents and polarizing the urban fabric Drawing on newspapers memoirs and other archival materials da Costa Meyer explores how people from different social strata both women and men experienced the urban reforms implemented by the Second Empire As hundreds of tenements were destroyed to make way for upscale apartment buildings thousands of impoverished residents were forced to the periphery which lacked the services enjoyed by wealthier parts of the city Challenging the idea of Paris as the capital of modernity da Costa Meyer shows how the city was the hub of a sprawling colonial empire extending from the Caribbean to Asia and exposes the underlying violence that enriched it at the expense of overseas territories This marvelously illustrated book brings to light the contributions of those who actually built and maintained the impressive infrastructure of Paris and reveals the consequences of colonial practices for the city s cultural economic and political life

**Paris-Edinburgh** Siân Reynolds,2016-05-13 By the end of the nineteenth century Paris was widely acknowledged as the cultural capital of the world the home of avant garde music and art symbolist literature and bohemian culture Edinburgh by contrast may still be thought of as a rather staid city of lawyers and Presbyterian ministers academics and doctors While its great days as a centre for the

European Enlightenment may have been behind it however late Victorian Edinburgh was becoming the location for a new set of cultural institutions with its own avant garde that corresponded with a renewed Scottish national consciousness While Morningside was never going to be Montparnasse the period known as the Belle Epoque was a time in both French and Scottish society when there were stirrings of non conformity which often clashed with a still powerful establishment And in this respect French bourgeois society could be as resistant to change as the suburbs of Edinburgh With travel and communication becoming ever easier a growing number of international contacts developed that allowed such new and radical cultural ideas to flourish In a series of linked essays based on research into contemporary archives documents and publications in both countries as well as on new developments in cultural research this book explores an unexpected dimension of Scottish history while also revealing the Scottish contribution to French history In a broader sense and particularly as regards gender it considers what is meant by modern or radical in this period without imposing any single model In so doing it seeks not to treat Paris Edinburgh links in isolation or to exaggerate them but to use them to provide a fresh perspective on the internationalism of the Belle Epoque

*A Walk Through Paris* Eric Hazan, 2018-03-27 A walker's guide to Paris taking us through its past present and possible futures Eric Hazan author of the acclaimed *Invention of Paris* takes the reader on a walk from Ivry to Saint Denis roughly following the meridian that divides Paris into east and west and passing such familiar landmarks as the Luxembourg Gardens the Pompidou Centre the Gare du Nord and Montmartre as well as forgotten alleyways and arcades Weaving historical anecdotes geographical observations and literary references Hazan's walk guides us through an unknown Paris With the aid of maps he delineates the most fascinating and forgotten parts of the city's past and present Planning and modernization have accelerated the erasure of its revolutionary history yet through walking and observation Hazan shows how we can regain our knowledge of the city of Robespierre the Commune Sartre and the May 68 uprising Drawing on his own life story as surgeon publisher and social critic Hazan vividly illustrates the interplay and concord between a city and the personality it forms

French Literature In/and the City Buford Norman, 1997

The production of Urban Space, Temporality, and Spatiality Bernard Gauthiez, 2020-05-05 The production of urban space in scarcely studied

by scholars in historical and urban studies the city being still predominantly seen as a frame in which activities and social relationship develop not a produce in itself The scope of the book is the comprehension of this production This implies an adequate conceptualisation of the way urban space can be measured and broken down in units which can be put in relation with social processes and agents A first part examines the concepts and their implications The second part deals with the anthropology and typology of architectural production considered in relation to demography The third part develops on the rhythms of the space production at Lyon from the late 15th century to the 19th The temporalities and spatialities of the production are determined and examined The agents of the production are studied all along the period in parallel to the market aimed at investors in real estate tenants activities Each phenomenon identified can be described and understood as in the meantime a temporal spatial and social unit

**On Both Sides of the Tracks** Morgane Cadieu, 2024-01-09 Social climbers have often been the core characters of novels Their position between traditional tiers in society makes them a touchstone for any political and literary moment including our own Morgane Cadieu's study looks at a certain kind of contemporary social climber in French literature whom she calls the parvenant Taken from the French term parvenu which refers to one who is newly arrived a parvenant is a character who shuttles between social groups A parvenant may reach the level of another social class but devises literary ways to come back constantly undoing any fixed ideas of social affiliation Focusing on recent French novels and autobiographies *On Both Sides of the Tracks* speaks powerfully to issues of emancipation and class Cadieu offers a fresh critical look at tales of upward mobility in the work of Annie Ernaux Kaoutar Harchi Michel Houellebecq douard Louis and Marie NDiaye shedding fascinating light on social mobility today as a formal literary problem

**Paris as Revolution** Priscilla Parkhurst Ferguson, 2023-11-15 In nineteenth century Paris passionate involvement with revolution turned the city into an engrossing object of cultural speculation For writers caught between an explosive past and a bewildering future revolution offered a virtuoso metaphor by which the city could be known and a vital principle through which it could be portrayed In this engaging book Priscilla Ferguson locates the originality and modernity of nineteenth century French literature in the intersection of the city with revolution A cultural geography *Paris as Revolution* reads the nineteenth century city not in literary works alone but across a broad spectrum of urban icons and narratives Ferguson moves easily between literary and cultural history and between semiotic and sociological analysis to underscore the movement and change that fueled the powerful narratives defining the century the city and their literature In her understanding and reconstruction of the guidebooks of Mercier Hugo Vall's and others alongside the novels of Flaubert Hugo Vall's and Zola Ferguson reveals that these works are themselves revolutionary performances ones that challenged the

*Art Nouveau* Gabriel P. Weisberg,Elizabeth K. Menon,2013-09-05 First published in 1998 Design reform in the fields of architecture and the decorative or applied arts became objectified through writings published during the period of 1885 to 1910 This investigation includes but is not limited to Art Nouveau in France and Belgium and the arts and crafts movement in England and the United States Even though the similar processes of creativity and shared goals of Art Nouveau and the arts and crafts movement have long been recognized attempts to explore their origins and their points of interrelation with the broader scope of art history have been largely unsuccessful until now

*Transforming Paris* David P. Jordan,1995-01-01 The Paris we know today with its grand boulevards its bridges and parks its monumental beauty was essentially built in only seventeen years in the middle of the nineteenth century In this brief period whole neighborhoods of medieval and revolutionary Paris over crowded dangerous and filthy were razed and from the rubble a modern city of light and air emerged This triumphant rebuilding was chiefly the work of one man Baron Georges Haussmann Napoleon III s Prefect of the Seine It was Haussmann s task to assert in stone the power and permanence of Paris to show the world that it was the seat of an empire of mythic proportions To this end he imposed grand visual perspectives as when he transformed Napoleon I s Arc de Triomphe into a magnificent twelve armed star from which radiated the broadest boulevards of Europe Below ground his modern sewer system became one of the wonders of the civilized world eagerly toured by royalty and commoners alike Haussmann s mandate was not only to create an impression of grandeur but to secure the city for better control by government By creating formal spaces where there had previously been a maze of chaotic streets Haussmann

opened Paris to effective police control and thwarted the recurrent demonstration of its well known revolutionary fervor The determined and autocratic Haussmann imprinted rational order and bourgeois civility on the unruly city which had for so long simmered with riot and insurrection Though he planted chestnut trees installed gas lights rebuilt the water supply and improved transportation and housing Haussmann s labors were and remain controversial He forced tens of thousands of the poor from the center of the city and destroyed significant parts of old Paris But in this important new biography David Jordan reminds us that Haussmann was not immune to the charms of the old city By leaving some areas intact the Baron achieved the grand effect of implanting a modern city boldly within an ancient one Here at last Haussmann s labors are given the aesthetic as well as the historical appreciation they deserve

**The Personality of Paris** Alan R. H. Baker, 2021-01-28 What was the personality of 19th century Paris To answer that question this book eschews the conventional narrative and chronological route taken by most histories of Paris Instead it thematically analyses the complex personality traits of Paris from the onset of the Revolution of 1789 to the beginning of the Great War Starting with the topographical and cultural legacies that late 18th century Paris inherited from its foundation in pre Roman and Roman times and from its medieval infancy and early modern adolescence The Personality of Paris unpacks the social and material complexity of the 19th century city It considers the role of immigration in the making of Parisians and in the city s growth from half a million in 1801 to almost three million in 1911 It examines the making of its distinctive landscape through the construction of monuments and architectural icons through its massive re modelling by Napol on III and Baron Haussmann through its five world exhibitions through its emphasis on food fashion and leisure and through the ways in which Parisians sought rural release from urban pressure Finally the book considers the self harm done to the person of 19th century Paris by revolutions and wars and the damage inflicted on it by 20th century hubristic politicians and architects

Addressing the Climate in Modern Age's Construction History Carlo Manfredi, 2019-04-08 This book sheds light on environmental control in buildings from the 17th century onwards Even before building services became a hallmark of buildings in order to address increasing sanitary and comfort needs pioneering experiences had contributed to improve design skills of professionals After long being determined by passive features indoor climate became influenced by installations and plants representing the most significant shift of paradigm in the modern age s construction history This change was not without consequences and the book presents contributions showing the deep connection between architectural design comfort requirements and environmental awareness throughout the 19th century Taking into account the differences between different European countries the book is a valuable resource for architects designers and heritage professionals who are interested in environmental design enabling them to develop a deeper knowledge of heritage in order to address to climate demands particularly going towards a future in which energy savings and fuel consumption reduction will dictate our behaviour It includes contributions by leading international experts Melanie Bauernfeind Marco Cofani Lino Vittorio Bozzetto Emmanuelle
