**Intuition and Reflection in Self-Consciousness** Kitaro Nishida, 1987-01-01 Nishida Kitaro's reformulation of the major issues of Western philosophy from a Zen standpoint of absolute nothingness and absolutely contradictory self identity represents the boldest speculative enterprise of modern Japan continued today by his successors in the Kyoto School of philosophy This English translation of *Intuition and Reflection in Self Consciousness* evokes the movement and flavor of the original clarifies its obscurities and eliminates the repetitions It sheds new light on the philosopher's career revealing a long struggle with such thinkers as Cohen Natorp Husserl Fichte and Bergson that ended with Nishida's break from the basic ontological assumptions of the West Throughout labyrinthine arguments Nishida never loses sight of his theme the irreducibility and unobjectifiability of the act of self consciousness which constitutes the self Extensive annotation is provided for the first time in any edition of Nishida's work Historians of Japanese philosophy and culture and all those interested in the interaction of Eastern and Western thought forms now have a document which highlights many of the cultural psychological and intellectual dynamics that have shaped Japanese intellectual life in one of its most fascinating and ambitious manifestations

Adil Saribay, Onurcan Yilmaz, 2024-12-06 This book provides a definitive guide to the value of reflective thinking in the modern world showing how today's most fundamental problems are to an important degree based on citizens' thinking styles The authors highlight the importance of reflection by systematically revealing the causes underlying differences in people's thinking styles and the consequences of thinking in different ways These different ways of thinking contribute to socio-political views and can result in misunderstandings of complex issues such as beliefs in conspiracy theories and fake news anti-vaccine attitudes and even fundamentalism and extremism By training and strengthening reflective thinking in society via education and other means we can encourage individuals to challenge misinformation and their own belief systems around controversial topics The book also explores the idea that reflection is not enough on its own and examines the shortcomings of reflection and the other

skills that complement it positively especially holistic and systems thinking In doing so the authors highlight how implementing a solid science based understanding of key issues in education and society at large can contribute to the solution of problems from climate change to economic inequality By showing how we can put our reflective capacity to good use alongside critically examining reflection in relation to modern problems experienced by humanity this book is a fascinating reading for students researchers and academics in psychology politics and the broader social sciences

being opens up an entirely new philosophical dimension
