Explaining Compliance Christine Parker, Vibeke Lehmann Nielsen, 2011 Taking a broad view of regulation and covering a wide range of issues and industries this collection is the most innovative effort to date to understand the responses of business firms to regulation The book brings together an impressive group of scholars who analyze the concept of compliance and offer theoretically informed studies of its assumed links to regulation A must read for both academics and practitioners this ground breaking collection firmly establishes a scholarly field of compliance studies Ronen Shamir Tel Aviv University Israel Business responses to regulation is a key area of social science research Parker and Nielsen s collection brings together an excellent group of scholars with innovative and I believe highly influential contributions that problematize the relations between regulation and compliance The collection is a highly welcome addition to our field that will redefine the research agenda on compliance A significant achievement that will help to improve policy making and frame the scholarly research agenda for the years to come David Levi Faur The Hebrew University of Jerusalem Israel and the Free University of Berlin Germany A timely and important set of analyses on how and why businesses respond to regulation in the way that they do from some of the leading authors in the field covering business responses to both state and non state regulatory systems Julia Black London School of Economics UK Explaining Compliance consists of sixteen specially commissioned chapters by the world s leading empirical researchers examining whether and how businesses comply with regulation that is designed to affect positive behaviour changes Each chapter consists of reflective summaries on business compliance with different state or voluntary regulation and the theoretical lessons to be drawn from it As a whole the book develops understanding and explanations of how why and in what circumstances firms come to comply with regulation and when they do not It also uncovers the complexity ambiguity and transformation of regulation as it is interpreted implemented and negotiated by firms their stakeholders and internal constituencies in everyday business life This unique and detailed resource will appeal to academics graduate students and senior undergraduates in law political science sociology criminology economics and psychology as well as business and interdisciplinary areas such as law and society and

law and economics Anyone researching business regulation corporate social responsibility regulation and compliance enforcement and compliance and public administration will also find this book beneficial **Company Law** Eva Micheler, 2021-10-21 This book advances a real entity theory of company law in which the company is a legal entity which acts autonomously in law and company law establishes procedures facilitating autonomous organisational decision making The theory builds on the insight that organisations or firms are a social phenomenon outside of the law and that these are autonomous actors in their own right They are more than the sum of the contributions of their participants and they act independently of the views and interests of their participants This occurs because human beings change their behaviour when they act as members of a group or an organisation in a group we tend to develop and conform to a shared standard and when we act in organisations habits routines processes and procedures form and a culture emerges These take on a life of their own affecting the behaviour of the participants Participants can affect organisational behaviour but this takes time and effort Company law finds this phenomenon and supplies it with a structure supporting autonomous action by organisations The real entity theory advanced in this book explains company law as it stands at a positive level Legal personality overcomes the problems that organisations are social rather than brute facts and that there is no unique physical manifestation permanently associated with an organisation The corporate constitution is not a contract it is best characterised as an instrument adopted on a statutory basis through private action Shareholders cannot limit the capacity of companies or the authority of the board to bind the company in contract and companies are liable in tort and crime The statute creates roles for shareholders directors a company secretary and auditors and so facilitates a process leading to organisational action The law also integrates the interests of creditors and stakeholders Human Rights and Corporations David Kinley, 2017-05-15 The erstwhile unlikely coupling of human rights and corporations is now a typical feature of corporate community relations High profile corporate infringements of human rights the rise and rise of corporate social responsibility CSR and on going efforts to regulate corporate behaviour through legal regimes at both domestic and international levels have spawned a mountain of academic literature and commentary This volume assembles the leading essays from this body of work Together they frame the relationship between human rights and corporations by charting its history and salient features tackle the conceptual perspectives of the relationship and detail the practice problems and potential of the relationship
