Hidalgo, 2018-11-07 States restrict immigration on a massive scale Governments fortify their borders with walls and fences authorize border patrols imprison migrants in detention centers and deport large numbers of foreigners Unjust Borders Individuals and the Ethics of Immigration argues that immigration restrictions are

systematically unjust and examines how individual actors should respond to this injustice Javier Hidalgo maintains that individuals can rightfully resist immigration restrictions and often have strong moral reasons to subvert these laws This book makes the case that unauthorized migrants can permissibly evade deceive and use defensive force against immigration agents that smugglers can aid migrants in crossing borders and that citizens should disobey laws that compel them to harm immigrants Unjust Borders is a meditation on how individuals should act in the midst of pervasive injustice

Latvian-Russian Relations Nils Muižnieks,2006 **Migration and Small Towns in Pakistan** Arif Hasan,Mansoor Raza,2013-03-07 The book deals with the causes repercussions social physical economic and demographic and processes of national and international migration within and from Pakistan in general and three very different towns Mithi Uch and Chiniot from each other in particular Migrations to Pakistan from India and Afghanistan are also dealt with along with their socio economic and demographic repercussions **Border Deaths** Paolo Cuttitta,Tamara Last,2019-12-12 Border deaths are a result of dynamics involving diverse actors and can be interpreted and represented in various ways Critical voices from civil society including academia hold states responsible for making safe journeys impossible for large parts of the world population Meanwhile policy makers argue that border deaths demonstrate the need for restrictive border policies Statistics are widely mis used to support different readings of border deaths However the way data is collected analysed and disseminated remains largely unquestioned Similarly little is known about how bodies are treated and about the different ways in which the dead also including the missing and the unidentified are mourned by familiars and strangers New concepts and perspectives contribute to highlighting the political nature of border deaths and finding ways to move forward The chapters of this collection co authored by researchers and practitioners provide the first interdisciplinary overview of this contested field *The Elusive Quest for Growth* William R. Easterly,2002-08-02 Why economists attempts to help poorer countries improve their economic well being have failed Since the end of World War II economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America Attempted remedies have included providing foreign aid investing in machines fostering education controlling population growth and making aid loans as well as forgiving those loans on condition of reforms None of these solutions has delivered as promised The problem is not the failure of economics William Easterly argues but the failure to apply economic principles to practical policy work In this book Easterly shows how these solutions all violate the basic principle of economics that people private individuals and businesses government officials even aid donors respond to incentives Easterly first discusses the importance of growth He then analyzes the development solutions that have failed Finally he suggests alternative approaches to the problem Written in an accessible at times irreverent style Easterly s book combines modern growth theory with anecdotes from his fieldwork for the World Bank *The New Zealand Official Year-book* New Zealand. Department of Statistics,1928 *Mathematics in the Real World* W.D. Wallis,2013-09-20 Mathematics in the Real World is a

Migrants Before the Law Tobias G. Eule,Lisa Marie Borrelli,Annika Lindberg,Anna Wyss,2018-11-19 This book

traces the practices of migration control and its contestation in the European migration regime in times of intense politicization. The collaboratively written work brings together the perspectives of state agents, NGOs, migrants with precarious legal status and their support networks collected through multi-sited fieldwork in eight European states: Austria, Denmark, Germany, Italy, Latvia, Lithuania, Sweden, and Switzerland. The book provides knowledge of how European migration law is implemented, used, and challenged by different actors and of how it lends and constrains power over migrants' journeys and prospects. An ethnography of law in action, the book contributes to socio-legal scholarship on migration control at the margins of the state. This book is a major achievement: A remarkable and insightful study that through close analysis of the practices of migration control in 8 European countries (Austria, Denmark, Germany, Italy, Latvia, Lithuania, Sweden, and Switzerland) provides powerful new insight into the power of the state at its margins and over those that are marginalised.

Andrew Geddes, Director, Migration Policy Centre, European University Institute, *Migrants Before the Law* provides a much needed account of the dizzying legal labyrinth that migrants navigate as they seek to survive in Europe. Based on multi-sited ethnography in detention centres, migration offices, police stations, and non-governmental organizations, as well as on interviews with key government actors, advocates, and migrants themselves, this book explores the systems of control and forms of migrant precarity that operate along Europe's internal borders in multiple national and transnational contexts. Readers will come away with a deepened understanding of the perverse workings of power, the ways that the uncertainty and unpredictability of law foster both despair and hope, the degree to which the immigration crisis is both manufactured and experienced as real, and the ingenuity of migrants themselves in the face of Kafkaesque state practices.

Susan Bibler Coutin, Professor of Criminology, Law and Society and Anthropology, University of California, Irvine, USA, *Migrants Before the Law* is an excellent exposition of the dispersed sites of the law and the hinges and junctions through which this apparatus is actualized in the lives of migrants facing deportation, contesting their status as illegal migrants or seeking to regularize their precarious position. Written with great sensitivity and an eye to minute details, this book is also an achievement in furthering the method of collaborative ethnography and new ways of staging comparisons.

Veena Das, Krieger-Eisenhower Professor of Anthropology, Johns Hopkins University, USA, Statistics in Medical Research E.A. Gehan, N.A. Lemak, 2012-12-06. In 1890, General Francis A. Walker, president of both the Massachusetts Institute of Technology and the American Statistical Association, wrote: "There is reason to wish that all citizens from the highest to the lowest might undergo so much of training in statistics as should enable them to detect the errors lurking in quantitative statements regarding social and economic matters which may be addressed to them as voters or as critics of public policies." E.A. Walker, 1890, reprinted in Noether, 1989. It has been more than a century since Walker stated his wish, but progress has been slow. Just as advancement in the establishment of statistical principles and methodology has been laborious and difficult over the centuries, we have tried to describe the milestones in this development and how each generation of scientists built on the heritage and foundations laid

by their predecessors Many historians dismiss the great man theory which alleges that giant leaps of human knowledge are made by great thinkers who transcend the boundaries of their times great scientists don't leap outside their time but somewhere else in their own time Hevly 1990 We found this to be the case in the history of statistics Even the innovative writings of Karl Pearson and Sir Ronald Fisher that became the foundation of modern mathematical statistics were the outcome of two centuries of antecedent ideas and information *International Immigration Policy* Eytan Meyers, 2004-04-02 Numerous studies explore immigration policies of individual receiving countries But these studies share several weaknesses First and foremost they are empirically orientated and lack a general theory Second most examine the policy of single country during a limited period or in a few cases are contributed volumes analyzing each country separately In general immigration policy literature tends to be a theoretic to focus on specific periods and particular countries and constitutes an array of discrete bits This book is a response to this trend offering a theoretical approach to immigration policy It explains how governments decide on the number of immigrants they will accept whether to differentiate between various ethnic groups whether to accept refugees and on what basis and whether to favour permanent immigration over migrant workers The book also answers such questions as How much influence do extreme right parties have on the determination of immigration policy Why do anti immigration parties and initiatives enjoy greater success in local state elections and in the elections for the European Parliament than in national elections And under what circumstances does immigration policy become an electoral issue Meyers draws on a wide array of sources on migration policy making and using them derives proposed models in a way that few others have done before him In addition the book interrelates global and domestic factors that jointly influence government policy making on international migration in a way that helps to clarify both spheres Lastly the work combines historical data with contemporary processes in a way that draws lessons from the past while recognizing that changing circumstances usually revise governmental responses **The Politics of Immigration** James

Hampshire, 2014-01-28 Immigration is one of the most contested issues on the political agenda of liberal states across Europe and North America While these states can be open and inclusive to newcomers they are also often restrictive and exclusionary The Politics of Immigration examines the sources of these apparently contradictory stances locating answers in the nature of the liberal state itself The book shows how four defining facets of the liberal state representative democracy constitutionalism capitalism and nationhood generate conflicting imperatives for immigration policymaking which in turn gives rise to paradoxical even contradictory policies The first few chapters of the book outline this framework setting out the various actors institutions and ideas associated with each facet Subsequent chapters consider its implications for different elements of the immigration policy field including policies towards economic and humanitarian immigration as well as citizenship and integration Throughout the argument is illustrated with data and examples from the major immigrant receiving countries of Europe and North America This book will be essential reading for students and researchers in
