Parrot Who Owns Me The Story Of A Relationship:

The Parrot Who Owns Me Joanna Burger, 2001-07-03 Birds are my passion says Joanna Burger but parrots are my weakness Fifteen years ago when she adopted a neglected orphaned thirty six year old parrot named Tiko she entered on of the most complex relationships of her life Sullen and hostile when he entered Dr Burger s home Tiko gradually warmed as she carefully persuaded him of her good intentions Eventually he courted her building nests inside household furniture during mating season and trying to coax her into them He nursed her vigilantly through a bout with Lyme disease regularly preening each strand of hair on the pillow as she slept For a while he even fought her husband for her attentions but eventually theirs became a relationship of deep mutual trust The Parrot Who Owns Me is also the story of the science of birds and of parrots in particular America s third most commonly owned pet after cats and dogs Woven into the narrative are insights and fascinating revelations from Joanna Burger s work not only about parrots but about what it means to be human By turns delightful hilarious touching and enlightening The Parrot Who Owns Me introduces us to an unforgettable bird and his human companion whose friendships tells us much about ourselves

Alex & Me Irene Pepperberg, 2013 A moving tribute that beautifully evokes the struggles the initial triumphs the setbacks the unexpected and often stunning achievements while uncovering cognitive abilities in Alex that no one believed were possible Publishers Weekly On September 6 2007 an African Grey parrot named Alex died prematurely at age thirty one His last words to his owner Irene Pepperberg were You be good I love you What would normally be a quiet very private event was in Alex s case headline news Over the thirty years they had worked together Alex and Irene had become famous two pioneers who opened an unprecedented window into the hidden yet vast world of animal minds Alex s brain was the size of a shelled walnut and when Irene and Alex first met birds were not believed to possess any potential for language consciousness or anything remotely comparable to human intelligence Yet over the years Alex proved many things He could add He could sound out words He understood concepts like bigger smaller more fewer and none He was capable of thought and intention Together Alex and Irene uncovered a startling reality We live in a world populated by thinking conscious creatures The fame that resulted was extraordinary Yet there was a side to their relationship that never made the papers They were emotionally connected to one another They shared a deep bond far beyond science Alex missed Irene when she was away He was jealous when she paid attention to other parrots or even people He liked to show her who was boss He loved to dance He sometimes became bored by the repetition of his tests and played jokes on her Sometimes they sniped at each other Yet nearly every day they each said I love you Alex and Irene stayed together through thick and thin despite sneers from experts extraordinary financial sacrifices and a nomadic existence from one university to another The story of their thirty year adventure is equally a landmark of scientific achievement and of an unforgettable human animal bond
