Participation And The Quality Of Environmental Decision Making:

Participation and the Quality of Environmental Decision Making F. Coenen, D. Huitema, Laurence J. O'Toole Jr., 2012-12-06

It is clear that our society must become a more sustainable one. To that end we must change both our production and our consumption patterns. Some argue that this implies the abolition of democratic processes and thus of citizens participation in environmental policy. Others argue the opposite: the only way to avoid impending environmental disaster is by engaging in common deliberation and contemplation. Is participation then a negative force or not? This volume is one of the first coordinated attempts to study the relationship between democratic participatory forms of decision making and the quality of environmental decisions. The central question is how can the normatively desirable practice of participatory decision making be combined with an effective approach to environmental issues. Guided by a theoretical introduction by the editors, the 15 chapters deal with topics ranging from the scale of environmental problems (local agenda 21, infrastructural decisions, strategic planning) to environmental policy in developing countries. Three chapters are devoted to each of these broad themes. Each presents either a theoretical or an empirical argument about the central research question, shedding light on such issues as the measurement of decision quality, participation techniques, and the link between participation and decision quality, drawing on experience gained in Europe, North and South America, Asia, and Africa. The introductions to the individual parts of the book have been collectively written by the contributors, who represent a range of professional disciplines including political science, public policy, and planning.

Public Participation and Better Environmental Decisions

Frans H. J. M. Coenen, 2008-12-12. Public Participation and Better Environmental Decisions is about a specific promise that participation holds for environmental decision making. Many of the arguments for public participation in international environmental policy documents are functional: that is to say, they see public participation as a means to an end. Sound solutions to environmental problems require participation beyond experts and political elites. Neglecting information from the public leads to legitimacy questions and potential conflicts. There is a discourse in the literature and in policy practice as to whether decision making improves in quality as additional relevant information by the public is considered. The promise that public participation holds has to be weighed against the limitations of public participation in terms of costs and interest conflicts. The question that Public Participation and Better Environmental Decisions seeks to answer for academics, planners, and civil servants in all environmental relevant policy fields is: What restricts and what enables information to hold the promise that public participation leads to better environmental decision making and better outcomes.

Public Participation in Environmental Assessment and Decision Making National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, Panel on Public Participation in Environmental Assessment and Decision Making, 2008-11-07. Federal agencies have taken steps to include the public in a wide range of environmental decisions. Although some form of public participation is often required by law, agencies usually

have broad discretion about the extent of that involvement Approaches vary widely from holding public information gathering meetings to forming advisory groups to actively including citizens in making and implementing decisions Proponents of public participation argue that those who must live with the outcome of an environmental decision should have some influence on it Critics maintain that public participation slows decision making and can lower its quality by including people unfamiliar with the science involved This book concludes that when done correctly public participation improves the quality of federal agencies decisions about the environment Well managed public involvement also increases the legitimacy of decisions in the eyes of those affected by them which makes it more likely that the decisions will be implemented effectively This book recommends that agencies recognize public participation as valuable to their objectives not just as a formality required by the law It details principles and approaches agencies can use to successfully involve the public

Democracy in Practice Thomas C. Beierle, 2010-09-30 In spite of the expanding role of public participation in environmental decisionmaking there has been little systematic examination of whether it has to date contributed toward better environmental management Neither have there been extensive empirical studies to examine how participation processes can be made more effective Democracy in Practice brings together for the first time the collected experience of 30 years of public involvement in environmental decisionmaking Using data from 239 cases the authors evaluate the success of public participation and the contextual and procedural factors that lead to it Thomas Beierle and Jerry Cayford demonstrate that public participation has not only improved environmental policy but it has also played an important educational role and has helped resolve the conflict and mistrust that often plague environmental issues Among the authors findings are that intensive problem solving processes are most effective for achieving a broad set of social goals and participant motivation and agency responsiveness are key factors for success Democracy in Practice will be useful for a broad range of interests For researchers it assembles the most comprehensive data set on the practice of public participation and presents a systematic typology and evaluation framework For policymakers political leaders and citizens it provides concrete advice about what to expect from public participation and how it can be made more effective Democracy in Practice concludes with a systematic guide for use by government agencies in their efforts to design successful public participation efforts

GIS for Group Decision Making Piotr Jankowski, Timothy Nyerges, 2001-01-18 In today's society it is very common for decisions that influence us all to be made by a combination of interested parties all with their own agenda In this instance how can we be sure that the decision is the correct one not just decided by the group with the most political influence or most money Such groups have now become fundamental deci

Negotiating Environmental Change F. Berkhout, 2003-01-01 The ESRC GEC programme has made a major contribution in terms of environmental social science research The chapters in this book provide incisive detailed and reflective critiques of the development of knowledge over the last ten years and provide powerful and important messages about the challenges presented by the complex relationship between environmental and

social change The book should be essential reading for all researchers and also for all policymakers who are grappling with questions about how to respond to environment society controversies Judith Petts Birmingham University UK and Member of the Royal Commission on Environmental Pollution Global environmental change will be with us forever But how it happens in the future and with what effect on the planet and its peoples depends to a large extent on how the international agreements national politics and local actions play out This collection provides the most comprehensive assessment yet of these critical interconnections and reveals how social scientists are making an invaluable contribution to the creation of more science and just livelihoods in a future world Tim O Riordan University of East Anglia UK An aphrodisiac to the tepid response of positivist social science People are not merely actors perpetrators and victims in an environmental drama The critical social theorists in this book constructively show us how people are improvising the stage and the script as we update our understanding of nature what constitutes a good life and our individual and collective options Richard B Norgaard University of California Berkeley US Negotiating Environmental Change is a child of the ESRCs Global Environmental Change Programme by far the biggest piece of work by social scientists in the United Kingdom during the 1990s At the beginning of the twenty first century the balance sheet needs to be drawn up what do our policies insights and values owe to the collaborative efforts of social scientists This book suggests that ideas and approaches that were conceived at a time when the Ozone Hole Global Warming and Biodiversity Losses were beginning to resonate in academic and policy circles have now entered the British and European psyche The challenge of forward thinking in the twenty first century in which the environment is central to most of the issues that concern social science is to demonstrate that the environment is not a separate territory Environmental thinking and practice affects us in various guises governance and democracy business and management risk and everyday consumption the substance of this book Negotiating Environmental Change makes clear the contribution that new thinking is making to problems that were not looked upon as environmental a decade ago but which we now see as being at the forefront of global research and policy agendas Michael Redclift King s College London UK Major advances have been made recently in environmental social science but the context and importance of this research has also changed Social and natural science studies of the environment have begun to interact more closely with each other and many analysts now agree that an understanding of environmental problems often depends on an understanding of the attitudes and behaviour of people and organisations Moreover policy and public debates have also shown that many assumptions that underpin arguments about sustainable development need to be reconsidered and re framed This book by leading researchers presents a critical review of debates in environmental social science over the past decade Three broad areas are covered in ten chapters the problems of scientific uncertainty and its role in shaping environmental policy and decisions the development of institutional frameworks for governing natural resources and the link between economic and technological change and the environment The book begins with an overview essay exam **The Challenge of Organising and**

Effective Judicial Protection and the Environmental Impact Assessment Directive in Ireland Aine Ryall, 2009-06-23 This work is concerned with enforcement of the Environmental Impact Assessment EIA directive in Ireland and by extension in the European Union more widely As a case study it delves into the complex situation pertaining in Ireland At a more general level it offers an up to date theoretically rich and critically incisive examination of the enforcement of the EIA directive in Europe with the main focus being on the role of the national courts in overseeing the correct application of the directive by the competent authorities via the judicial review process The procedural requirements set down in the EIA directive are examined against the backdrop of the role played by the public in environmental decision

making Amendments to the directive prompted by the Aarhus Convention are explained and their impact in practice is assessed The core elements of the concept of effective judicial protection developed by the European Court of Justice are explored Following an analysis of the EIA case law from the Irish Superior Courts to date the work examines the extent to which Irish planning and administrative law meets the requirements of the principle of effective judicial protection and the access to justice provisions articulated in the Aarhus Convention

Sustainable Values, Sustainable Change Bryan G. Norton, 2015-12-16 Systematically investigates the philosophical foundations of sustainable development in the context of the history of environmental policy Compelling Choice Sustainability is a nearly ubiquitous concept today but can we ever imagine what it would be like for humans to live sustainably on earth One of the most trafficked terms in the press on university campuses and in the corridors of government sustainability has risen to prominence as a buzzword before the many parties laying claim to it have agreed on how to define it But the term's political currency urgently demands that we develop an understanding of this elusive concept While economists philosophers and ecologists argue about what in nature is valuable and why in *Sustainable Values Sustainable Change* Bryan Norton offers an action oriented pragmatic response to the disconnect between public and academic discourse around sustainability Looking to the arenas in which decisions are made and the problems driving these decisions Norton reveals that the path to sustainability cannot be guided by fixed objectives sustainability will instead be achieved through experimentation incremental learning and adaptive management Drawing inspiration from Aldo Leopold's famed metaphor of thinking like a mountain for a spatially explicit pluralistic approach to evaluating environmental change Norton outlines a new decision making process guided by deliberation and negotiation across science and philosophy Looking across scales to today's global problems Norton urges us to learn to think like a planet An excellent distillation of Norton's extensive and groundbreaking work Ben Minteer Arizona State University author of *Refounding Environmental Ethics* Engaging and important Sahotra Sarkar University of Texas at Austin author of *Environmental Philosophy From Theory to Practice*

Managing Facts and Feelings in Environmental Governance Lorenzo Squintani, Jan Darpö, Luc Lavrysen, Peter-Tobias Stoll, 2019 This timely book brings to the foreground the considerable tensions between the need to engage the public in the importance of environmental governance and the need of professional expertise to address the issues which arise In doing so it highlights that not only can public opinion deviate from scientific knowledge but scientific knowledge itself can be lacunose or contradicting Drawing together insights from some of the leading scholars this engaging work will provide guidance to decision makers including judges on how to govern public participation procedures and professional expertise and the role that the precautionary principle can play in this regard

Groundwater Science and Policy Philippe Quevauviller, 2008 This book offers an overview of key findings in groundwater management in context against the legislative milestones Until recently focus on groundwater mainly concerned its use as drinking water and as an important resource for industry e g cooling waters and agriculture irrigation It has however become increasingly obvious that groundwater should not only be viewed as a drinking water reservoir but that it should also be protected for its environmental value In this respect groundwater represents an important link of the hydrological cycle through the maintenance of wetlands and river flows acting as a buffer through dry periods Hence deterioration of groundwater quality may directly affect other related aquatic and terrestrial ecosystems The groundwater legislative framework under the EU Water Framework Directive and the newly adopted Groundwater Directive establishes criteria linked to environmental objectives which have to be met by 2015 following successive operational steps including characterisation risk assessment analysis of pressures and impacts monitoring and design of programmes of measures These milestones require that sound technical and scientific information be made accessible to water managers which is so far still not sufficiently streamlined In this context this book describes the groundwater legislative milestones and presents series of research and development activities that aim to directly support them It has therefore the ambition to become a vehicle liaising policy requirements and available scientific knowledge in this area
