Participation And Policy Making In The European Union:

European E-Democracy in Practice Leonhard Hennen,Ira van Keulen,Iris Korthagen,Georg Aichholzer,Ralf Lindner,Rasmus Øjvind Nielsen,2019-11-06 This open access book explores how digital tools and social media technologies can contribute to better participation and involvement of EU citizens in European politics By analyzing selected representative e participation projects at the local national and European governmental levels it identifies the preconditions best practices and shortcomings of e participation practices in connection with EU decision making procedures and institutions The book features case studies on parliamentary monitoring e voting practices and e publics and offers recommendations for improving the integration of e democracy in European politics and governance Accordingly it will appeal to scholars as well as practitioners interested in identifying suitable e participation tools for European institutions and thus helps to reduce the EU s current democratic deficit This book is a continuation of the book Electronic Democracy in Europe published by Springer

Citizen Participation in Democratic Europe Alberto Alemanno,James Organ,2024-07-31 As the European Union undergoes a major self proclaimed democratic exercise the Conference on the Future of Europe and approaches Treaty change this volume offers a new model of citizen participation to address Europe s long standing democracy challenge and respond to the aftermath of the COVID 19 pandemic Proposed are a set of democratic innovations ranging from citizens assemblies to regulatory gaming to citizens initiatives and lobbying which are complementary not antagonistic to existing representative democracy across the European continent These innovations are emerging bottom up across the continent and getting traction at local national and EU level in a new era powered by technology This book brings together academics as well as practitioners to give a forward looking holistic view of the realities of EU citizen participation across the spectrum of participatory opportunities They all converge in arguing that after many years of proven experimentation the EU must institutionalize supranational participative and deliberative democratic channels to complement representative democracy and each other and ultimately improve the effectiveness of EU citizen participation While this institutional approach will not magically treat the EU democratic malaise it should make the system more intelligible accessible and ultimately responsive to citizen demand without necessarily undertaking Treaty reform The attempt to harness citizen participation to help address the current EU crisis needs the type of multi faceted approach presented in this book One that recognises the potential of existing and new democratic mechanisms and also importantly the links between different instruments of citizen participation to improve the overall quality of EU s democratic system

The Making of the European Union Sten Berglund,2006-01-01 The Making of the European Union argues that the process of European integration has drifted into serious crisis perhaps the most serious since the Danes voted against the Treaty of the European Union in 1992 Analysing the conditions for European integration this book applies a citizens or bottom up perspective on the integration process The difficulties that the constitutional process has encountered illustrate

the relevance of bringing public opinion into the analysis of the prospects for European integration The book describes and analyses the historical mental intellectual and attitudinal denominators of European integration denominators that have shaped the processes so far and will continue to do so in the future The authors apply a broad comparative perspective where European nation states constitute the primary units of analysis The focus is on the foundations of European integration public views about the EU including various shades of Euroscepticism and the long term prospects of the EU This book will appeal to a wide audience including scholars and researchers in the social sciences particularly political science comparative politics and European studies The book will also be of great interest to journalists and all those involved in the EU including policy makers and civil servants throughout the EU itself

Policy-making in the European Union Laura Cram,1997 This book takes a fresh view at attempts to conceptualize the process of European integration It highlights the often neglected but crucial role of European institutions in understanding major constitutional decisions in the European Union

Civil Society Participation in European and Global Governance J. Steffek,C. Kissling,P. Nanz,2007-12-04 It is often argued that the enhanced consultation of civil society contributes to the democratization of European and global governance This collection investigates whether this theoretical argument is supported by empirical evidence Ten original essays analyze current patterns of civil society consultation in 32 intergovernmental organizations

Europeanization and the European Economic Area Johanna Jonsdottir,2013 This book examines Europeanization in the European Economic Area EEA exploring whether non member states can have an input into EU decision making and whether the EU can successfully export its policies within the framework of the EEA Iceland Norway and Liechtenstein while not EU member states are members of the European Free Trade Association EFTA and signatories of the EEA Agreement The Agreement allows participation in the EU s internal market but also requires extensive and continuous adaptation to EU rules Whilst existing literature is limited mainly to the EU s impact on its own member states or neighbours to the east this book extends the study of Europeanization to the EEA exploring whether Iceland as a non member state can have an input into EU decision making and conversely whether the EU can ensure that its policies are adhered to outside of its borders The author argues that although the EEA Agreement is not without its challenges it has proved considerably more resilient than originally expected This raises the question of whether the EEA provides a realistic alternative to EU membership for other states with close ties to the EU Delving into the largely unknown intersection between the EU and the EEA and providing important new insights into the Europeanization process Europeanization and the European Economic Area will be of strong interest to students and scholars of European Union politics and policy making European Union Enlargement Nordic politics and comparative politics

Policy-making in the European Union Helen S. Wallace,Mark A. Pollack,Alasdair R. Young,2010 The policies of the European Union profoundly affect the lives of people in Europe and around the world The new edition of this highly successful textbook outlines how and why such decisions are made as well as the key challenges faced by policy makers in

the current political and economic climate Policy Making in the European Union begins by clarifying the institutional framework of the EU and the analytical approaches used to understand it A wide range of crucial and illustrative policies are then explored in detail by subject experts This volume includes new chapters on ways of analyzing the EU s policy process and on energy policy A central theme to the volume is how the recent expansion to twenty seven member states has affected policy making across the different policy sectors The conclusion reflects on how this challenge and the protracted constitutional stalemate have affected policy making in the EU It also explores the impact of the financial and economic crises that have struck Europe over the past several years The sixth edition is fully up to date and is the ideal text for all those with an interest in the policy making of the European Union

The European Union and Multilateral Governance

Hans Bruyninckx, Sudeshna Basu, 2012-04-11 An interdisciplinary approach to the study of the EU in UN human rights and environmental governance which addresses the legal and political science dimensions With contributions from academics and policy makers this volume is a comprehensive analysis of how the challenges it faces impact on the EU s position in UN fora

Local Government in the European Union Marius Guderjan, Tom Verhelst, 2021-09-30 This book addresses the bigger picture of local European relations and adds a new dimension to existing studies on multilevel governance and the Europeanisation of local government Drawing from a combination of European integration theories and operational approaches it introduces the idea of an integration cycle in which local government responds to the top down impact of the EU internally horizontally and vertically This volume presents a wide range of empirical examples to demonstrate how local authorities across Europe have changed their practices orientation and preferences and adapted their institutions and organisation Not only do cities towns and counties cooperate with each other across borders and through transnational networks and partnerships but by mobilising formally and informally local actors participate in and influence European governance and contribute to the future trajectories of European integration thereby completing the integration cycle

Democracy in the European Union Liana Giorgi, Ingmar von Homeyer, Wayne Parsons, 2006-09-27 An invaluable exploration of the concern that transfers of power to European Union institutions are producing a worrying new form of democratic deficit While ongoing reforms of these institutions promise to render decision processes at European level more transparent and accountable these expert authors examine whether there is a European public sphere for citizens and their representatives to discuss deliberate and evaluate issues of public relevance They show how the process of European integration has given rise to a new object of study European society and why key questions concerning identity citizenship democracy government and institutions are being raised anew and are major political concerns at European and Member State level With six case studies of EU policy making and representative institutions they analyze the intensity of participatory practices in four dimensions mobilization of societal actors public contestation and debate openness of decision making and responsiveness of policy makers This book will be of strong interest to students and researchers of the European

Union European politics European studies as well as those concerned with more theoretical aspects of governance and the public sphere The Politics of the European Union Herman Lelieveldt, Sebastiaan Princen, 2023-04-20 An introduction to the European Union from a comparative politics perspective systematically analysing its functioning through comparison with national political systems *Interest Representation in the European Union* Justin Greenwood, 2017-09-16 Why is the EU so reliant upon exchanges with interest organisations What safeguards have been developed to prevent capture by special interests and how effective are these How does the EU system of interest representation compare with those of other systems and what are its unique features The fully revised fourth edition of this highly acclaimed book provides an authoritative and comprehensive assessment of the role of organized interests in the EU Showing that interest representation is a key aspect of the European project it examines the significance of interests for everyday policy making for European integration and for the democratic legitimacy of the EU Accessibly written and thoroughly updated the new edition contains additional material on the regulation of lobbying and the European Transparency Register Democratic Empowerment in the European Union David Levi-Faur, Frans van Waarden, 2018 This book looks at democratic empowerment via institutional designs that extend the political rights of European citizens It focuses on three themes first the positive and negative effects of the European Union institutional design on the political rights of its citizens second challenges for democratic regimes across the world in the 21st century in the context of regionalism and globalization third the constraints of neoliberalism and capitalist markets on the ability of citizens to effectively achieve their political rights within the Union Participation and Policy-making in the European Union Helen S. Wallace, Alasdair R. Young, 2023 Based on a range of case studies of regulatory and industrial policies this study shows that the European policy process provides access points for a wide variety of interests and that interplay between these influences the policy process itself **From the "Democratic Deficit" to a "Democratic Surplus"** Athanasios Psygkas, 2017-10-17 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities into individual loci of experimentation that might in turn develop innovative results It thus contributes to debates about federalism governance and public policy as well as about deliberative and participatory democracy in the United States and Europe This book informs current understandings of

regulatory agency operations and institutional design by drawing on an original dataset of public consultations and interviews with agency officials industry and consumer group representatives in Paris Athens Brussels and London The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy accountability and efficiency Lobbying in the European Union Heike Klüber,2013-02-28 Why can some interest groups influence policy making while others cannot Even though this question is central to the study of politics we know little about the factors explaining interest group influence Understanding lobbying success should be of particular concern to scholars of European politics since the European Union constitutes a promising political opportunity structure for organized interests This book sheds light on the impact of interest groups on European policy making and makes a major contribution to the study of both European Union politics and interest groups more generally Klüber develops a comprehensive theoretical model for understanding lobbying success and presents an extensive empirical analysis of interest group influence on policy making in the EU The book relies on a large new and innovative dataset that combines a wide variety of data sources including a quantitative text analysis of European Commission consultations an online survey of interest groups information gathered on interest group websites and legislative data retrieved from EU databases This book analyzes interest group influence across 56 policy issues and 2 696 interest groups and shows that lobbying is an exchange relationship in which the European institutions trade influence for information citizen support and economic power Importantly this book demonstrates that it is not sufficient to solely focus on individual interest groups but that it is crucial how interest groups come together in issue specific lobbying coalitions Lobbying is a collective enterprise in which information supply citizen support and economic power of entire lobbying coalitions are decisive for lobbying success OECD Studies on Public Engagement Focus on Citizens Public Engagement for Better Policy and Services OECD,2009-06-19 This book provides information on government performance in fostering open and inclusive policy making in 25 countries **Engaging Citizens in Policy Making** Randma-Liiv, Tiina,Lember, Veiko,2022-02-15 This is an open access title available under the terms of a CC BY NC ND 4 0 License It is free to read download and share on Elgaronline com Exploring academic and policy thinking on e participation this book opens up the organizational and institutional black box and provides new insights into how public administrations in 15 European states have facilitated its implementation Partnerships in International Policy-Making Raffaele Marchetti,2016-10-26 This book analyzes how international organizations and the European Union engage with civil society to pursue their policy goals Multi stakeholder initiatives private public partnership sub contracting political alliances hybrid coalitions multi sectoral networks pluralist co governance and indeed foreign policy by proxy are all considered Bringing together the most advanced scholarship the book examines trade environment development security and human rights with reference to both EU and global institutional settings such as the WTO UN Climate Summits FAO IFAD ICC UNHRC UNSC and at the EU level the DG

FISMA TRADE CLIMA DEVCO HOME and ECHO The book also studies the use of NGOs in the foreign policy of the EU USA and Russia This changing politics and the polarized debate it has generated are explored in detail **Democracy in Motion** Tina Nabatchi,John Gastil,G. Michael Weiksner,Matt Leighninger,2012-11-01 Although the field of deliberative civic engagement is growing rapidly around the world our knowledge and understanding of its practice and impacts remain highly fragmented Democracy in Motion represents the first comprehensive attempt to assess the practice and impact of deliberative civic engagement Organized in a series of chapters that address the big questions of deliberative civic engagement it uses theory research and practice from around the world to explore what we know about how we know it and what remains to be understood More than a simple summary of research the book is designed to be accessible and useful to a wide variety of audiences from scholars and practitioners working in numerous disciplines and fields to public officials activists and average citizens who are seeking to utilize deliberative civic engagement in their communities The book significantly enhances current scholarship serving as a guide to existing research and identifying useful future research It also has promise for enhancing practice for example by helping practitioners public officials and others better think through and articulate issues of design and outcomes thus enabling them to garner more support for public deliberation activities In addition by identifying what remains to be learned about public deliberation practitioners and public officials may be inspired to connect with scholars to conduct research and evaluations of their efforts
