Particle Probability Poems

Henry Wotton, Walter Raleigh

Particle Probability Poems:

Particle and Probability Aidan Thompson, 2002 Poetry Aidan Thompson's prose poems revel in both chance and design these seemingly infinite potential of syntactic particles At times evoking Stein and Picasso's cubism these noun populated portraits of 21st century mind show us the interstices of the world within and outside us Her new sentences move forward at the speed of light becoming thought sound thinking itself As reading traveling the distance of a book as narrative turned on its literal ear as words taking place in the action syntax discovers might now be not only possible but probable moving to enact what happens when mind's eye meets material visible world of particular things head on Don't miss this wonderfully daring first book

The Poetry of Physics and the Physics of Poetry Robert K. Logan, 2010 This is a textbook for a survey course in physics taught without mathematics that also takes into account the social impact and influences from the arts and society It combines physics literature history and philosophy from the dawn of human life to the 21st century It will also be of interest to the general reader

Particles: New and Selected Poems Dan Gerber, 2018-05-01 Gerber has a gentle touch and an unaffected articulate voice that can be smart funny wise sometimes all at the same time Library Journal Gerber is one of the most adept and accessible of the poets who explore the meaning of humans relation with earth and existence itself ForeWord Into a frenzied world that hurtles ever faster somewhere Dan Gerber's poetry offers a necessary and reflective presence Drawing upon eight previous collections and including a book length selection of new poems this retrospective tunes its senses to the natural world and a provenance that includes the influence of Buddhism English Romanticism and a deep reading of Rainer Maria Rilke's oeuvre Pastoral and expansive Gerber's poetry is concerned with the universe just outside each of our windows the immediately viewable landscape in front of us and the mysterious vastness beyond From Dark Matter The visible drapes itself around the invisible the way my jacket takes its shape from my shoulders An unseen gravity whirls near the center of our galaxy an unseen heart near the center of the bodies in which we desire I seldom think of Neptune out there way beyond my pointing to it on a summer night Dan Gerber is the author of eight collections of poetry three novels a book of short stories and two books of nonfiction A former professional race car driver he has traveled extensively as a journalist particularly in Africa He lives in Santa Ynez California

Neurophilosophy of Consciousness, Vol. Vi Dr. Angell O. de la Sierra ESQ., 2013-05-23

Anyone who has ever enjoyed the honor to lecture a graduate school audience will tell you that simplicity in delivery as a goal

is a worthwhile pragmatic and theoretical virtue if and only the expected and appropriate cognitive content are aimed at the student and not for self indulgence independent of the corresponding level of complexity to be communicated There is a tacit presumption that selling marketing an idea by a professor implies there must be a buyer student purchase for a pedagogical transaction to be completed Unless of course the professor consciously knowing or not is engaged in a self serving soliloquy assuming as primitive self evident complex propositions and often expressed as either inspired on a radical conceptual theosophy or based on a radical empirical probable statistical scientific lab result as characterized by extremist pronouncements Yet the very complex and changing nature of the object event in its dynamic evolutionary progression in our Minkowsky 4 d space time existential reality opts to reveal its complexity to human audiences in the form of the simplest possible model poems solution that are compatible with the students undeveloped brain dynamics phenomenology and combinatorial limitations as amply detailed in our other publications We now expand further on the justifications for our general poem on the evolution of complexity as discussed under The Immanent Invariant and the Transcendental Transforming Horizons We need to harmonize integrative the exotic idealistic speculations and conjectures of conceptual models with the empirical pragmatic measurements coming out of the lab See Ch 12 Neurophilosophy of Consciousness Vol IV and Vol V
