Noblit, 2015-03-17 This book is written for the Millennial Generation to educate them about what school desegregation was actually about the struggle over white domination in the United States The textbooks they read as high school students describe the heroic efforts of African Americans to achieve civil rights but do not describe who was denying them these rights white Americans The oral histories in this book reveal how individuals navigated efforts to achieve educational equity amidst efforts to reassert white domination These accounts counter the textbook history the Millennial Generation read which omits the massive white resistance to school desegregation the various ways whites used subterfuge to slow down and redirect school desegregation in what would more benefit whites and the concerted white political backlash that has been ensconced in educational policy and reform beginning with *A Nation at Risk* and continuing in *No Child Left Behind* That is educational policy as we know it is all about asserting white domination and not about educating children and thus the Millennial Generation is faced with undoing what their parents and grandparents have done *Handbook of Interview Research* Jaber F. Gubrium, James A. Holstein, 2002 The Handbook of Interview Research is the most ambitious attempt yet at examining the place of the interview in contemporary society Interviewing is the predominant mode of research in the social sciences It is also the stock in trade of information seekers in organizations and institutions of all kinds as well as in the mass media Across the board interviews provide today's leading window on the world of experience The Handbook offers a comprehensive examination of the interview at the cutting edge of information technology Drawing upon leading experts from a wide range of professional disciplines this book addresses conceptual and technical challenges that confront both academic researchers and interviewers with more applied goals From interview theory to the nuts and bolts of the interview process the coverage is impressively broad and authoritative The Handbook of Interview Research is both encyclopedic and

thematic As an encyclopedia it provides extensive discussions of the methodological issues now surrounding interview practice offering a multi faceted assessment of what has become the method of choice for obtaining personal information in today s society But the Handbook also is a story which spins a particular tale of interviewing one that moves from the commonly recognized individual interview to what is called the interview society The gist of the presentation is that we can no longer regard the interview as simply an instrument for gathering data but must now also view it an integral part of society *Deterritorializing/Reterritorializing* Nancy Ares,Edward Buendía,Robert Helfenbein,2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform In particular they situate their work in present day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities States cities and school boards are being given more responsibility and power in determining curriculum content and standards accompanied by increasing privatization of public education through the rise of charter schools and for profit organizations incursion into managing schools Given these pressures critical geography s unique approach to spatial constructions of schools is crucially important Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial forces operating on such things as schools communities people and culture Authors from multiple fields of study contribute to this book s examination of how social political and historical dimensions of spatial forces especially racial ethnic and other markers of difference shape are shaped by processes and outcomes of school reform

Kincheloe, 2005 The Critical Constructivism Primer introduces education students to the study of knowledge how it is inscribed by particular values and produced in problematic ways whose interests it serves and how it shapes the identities of those who consume it Critical constructivism is an epistemological position that examines the process by which knowledge is socially constructed Joe L.
