Technical Challenges of Multipollutant Air Quality Management George M. Hidy, Jeffrey R. Brook, Kenneth L. Demerjian, Luisa T. Molina, William T. Pennell, Richard D. Scheffe, 2011-07-30 Recent critiques of air quality management approaches currently employed in developed and many developing countries have suggested that efficiencies could be achieved if air quality management practices shifted from pollutant by pollutant approaches to a comprehensive multipollutant approach in which emission reduction decisions are based on relative risk and evaluated on their effectiveness in meeting environmental and health goals This book assesses our technical readiness to undertake such an approach and it outlines the technical developments that will be needed to achieve a risk based approach air quality management that includes means for measuring the effectiveness of management decisions Treatise on Geochemistry, 2013-10-19 This extensively updated new edition of the widely acclaimed Treatise on Geochemistry has increased its coverage beyond the wide range of geochemical subject areas in the first edition with five new volumes which include the history of the atmosphere geochemistry of mineral deposits archaeology and anthropology organic geochemistry and analytical geochemistry In addition the original Volume 1 on Meteorites Comets and Planets was expanded into two separate volumes dealing with meteorites and planets respectively These additions increased the number of volumes in the Treatise from 9 to 15 with the index appendices volume remaining as the last volume Volume 16 Each of the original volumes was scrutinized by the appropriate volume editors with respect to necessary revisions as well as additions and deletions As a result 27% were republished without major changes 66% were revised and 126 new chapters were added In a many faceted field such as Geochemistry explaining and understanding how one sub field relates to another is key Instructors will find the complete overviews with extensive cross referencing useful additions to their course packs and students will benefit from the contextual organization of the subject matter Six new volumes added and 66% updated from 1st edition The Editors of this work have taken every measure to include the many suggestions received from readers and ensure comprehensiveness of coverage and added value in this 2nd edition The esteemed Board of Volume Editors and Editors in Chief worked cohesively to ensure a uniform and consistent approach to the content which is an amazing accomplishment for a 15 volume work 16 volumes including index volume Air Quality Guidelines World Health Organization. Regional Office for Europe, World

Health Organization,2006 This book presents revised guideline values for the four most common air pollutants particulate matter ozone nitrogen dioxide and sulfur dioxide based on a recent review of the accumulated scientific evidence The rationale for selection of each guideline value is supported by a synthesis of information emerging from research on the health effects of each pollutant As a result these guidelines now also apply globally They can be read in conjunction with Air quality guidelines for Europe 2nd edition which is still the authority on guideline values for all other air pollutants As well as revised guideline values this book makes a brief yet comprehensive review of the issues affecting the application of the guidelines in risk assessment and policy development Further it summarizes information on pollution sources and levels in various parts of the world population exposure and characteristics affecting sensitivity to pollution methods for quantifying the health burden of air pollution and the use of guidelines in developing air quality standards and other policy tools Finally the special case of indoor air pollution is explored Prepared by a large team of renowned international experts who considered conditions in various parts of the globe these guidelines are applicable throughout the world They provide reliable guidance for policy makers everywhere when considering the various options for air quality management

Urbanization, Energy, and Air Pollution in China Chinese Academy of Sciences,Chinese Academy of Engineering,National Academy of Engineering,National Research Council,Policy and Global Affairs,Development, Security, and Cooperation,2005-01-04 In October 2003 a group of experts met in Beijing under the auspices of the Chinese Academy of Sciences Chinese Academy of Engineering and National Academy of Engineering NAE National Research Council NRC of the National Academies to continue a dialogue and eventually chart a rational course of energy use in China This collection of papers is intended to introduce the reader to the complicated problems of urban air pollution and energy choices in China
