Partners In The Research Enterprise University Corporate Relations In Science And Technology:

Partners in the Research Enterprise Thomas W. Langfitt, Sheldon Hackney, Alfred P. Fishman, M.D., Albert V. Glowasky, 2016-11-11 Major new relationships between universities and corporations in scientific research herald a potentially significant force for expediting technological innovations However a range of concerns has also been expressed on such related problems as university integrity the rate of return for business and the role of government Among areas covered in this volume are models of collaborative arrangements benefits and risks of these ventures to both universities and corporations the role of the federal government and the possible extent and importance of these kinds of activities in the future Current Catalog National Library of Medicine (U.S.), **Commercial Biotechnology**, 1984 **New Developments in Biotechnology: U.S. Investment in biotechnology (Summary)**, 1988 **The Higher Learning and High Technology** Sheila Slaughter, Sheila A. Slaughter, 1990-01-01 In this critical new work Slaughter investigates how university involvement in high technology influences higher education policy By conducting a case study of the Business Higher Education Forum a liaison organization consisting of Fortune 500 Chief Executive Officers and presidents of well known research universities the author explores the policy agenda of the Forum the historical and structural antecedents of that agenda and its organizational implications for various post secondary sectors and their faculty **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **U.S. Investment in Biotechnology** United States. Congress. Office of Technology Assessment, 1988 **Nomination** United States. Congress. Senate. Committee on Labor and Human Resources, 1993 **Entrepreneurial President** Patricia A. Pelfrey, 2012-03-06 Richard C Atkinson was named president of the University of California in August 1995 barely four weeks after the UC Regents voted to end affirmative action How he dealt with the admissions wars the political legal and academic consequences of that historic and controversial decision as well as the issue of governance is discussed in this book Another focus is the entrepreneurial university the expansion of the University s research enterprise into new forms of scientific research with industry during Atkinson s presidency The final crisis of his administration was the prolonged controversy over the University s management of the Los Alamos and Livermore nuclear weapons research laboratories that began with the arrest of Los Alamos scientist Wen Ho Lee on charges of espionage in 1999 Entrepreneurial President explains what was at stake during each of these episodes how Atkinson addressed the issues and why the outcomes matter to the University and to the people of California Pelfrey s book provides an analysis of the challenges perils and limits of presidential leadership in the nation s leading public university while bringing a historical perspective to bear on the current serious threats to its future as a university The U.S. Climate for Entrepreneurship and Innovation, 1985 *Consumer Research* Morris B. Holbrook, 1995-06-09 This collection of essays provides a personal thought provoking and often humorous documentation of the evolution of the field of consumer research The book highlights aspects of hotly debated issues that surround this field of inquiry and presents a

picture of how consumer research has grown and developed over the past 25 years **University-business Partnerships**
Norman E. Bowie, 1994 This work assesses the ethical issues arising from the proliferation of university business
partnerships Bowie pays special attention to the question of whether such partnerships are consistent with the values of
higher education and examines procedures for protecting university values The work concludes with an extensive section of
readings including articles by David Noble Nicholas Wade and Albert Gore Jr copies of historical documents and case studies
and copies of conflict of interest statements from leading universities **Information Technology R&D**, 1985

Research and Relevant Knowledge Roger L. Geiger, 2017-09-29 The rise of American research universities to
international preeminence constitutes one of the most important episodes in the history of higher education Research and
Relevant Knowledge follows Geiger's earlier volume on American research universities from 1900 to 1940 This second work
is the first study to trace this momentous development in the post World War II period It describes how the federal
government first relied on university scientists during the war and how the resulting relationship set the pattern for the
postwar mushrooming of academic research The first half of the book analyzes the development of the postwar system of
academic research exploring the contributions of foundations defense agencies and universities The second half depicts the
rise of the golden age of academic research in the years after Sputnik 1957 and its eventual dissolution at the end of the
1960s graduate education When the federal patron soon reduced its largesse university students took the lead in challenging
the putative hegemony of academic research The loss of consensus quickly brought the malaise of the 1970s stagnation
frustration and equivocation about the research role The final chapter appraises the renaissance of the 1980s based largely
on a rapprochement with the private sector and ends by evaluating the embattled status of research universities at the
beginning of the 1990s Research and Relevant Knowledge provides the first authoritative analytical account of American
research universities during their most fateful half century It will be of critical importance to all those concerned with the
future of higher education in the United States Information Technology Research and Development Sam

Stuart, 2013-09-24 Information Technology Research and Development Critical Trends and Issues is a report of the Office of
Technology Assessment of the United States Government on the research and development in the area of information
technology The report discusses information technology research and development its goals nature issues and strategies
environment and its changes the roles of the participants and the health of its field The book then goes on to four selected
case studies in information technology advanced computer architecture fiber optic communications software engineering and
artificial intelligence The text also talks about the effects of divestiture and deregulation on research education and human
resources for research and development foreign information technology research and development and technology and
industry The text is recommended for students and researchers of information technology who wish to know more about the
state of research and development in this field and the applications of this research in different areas Information

Technology and R and D États-Unis. Congress. Office of Technology Assessment,1985 *Conflicts of Interest* Don A. Moore,Daylian M. Cain,George Loewenstein,Max H. Bazerman,2005-04-18 This collection explores the subject of conflicts of interest It investigates how to manage conflicts of interest how they can affect well meaning professionals and how they can limit the effectiveness of corporate boards undermine professional ethics and corrupt expert opinion Legal and policy responses are considered some of which e g disclosure are shown to backfire and even fail The results offer a sobering prognosis for professional ethics and for anyone who relies on professionals who have conflicts of interest The contributors are leading authorities on the subject in the fields of law medicine management public policy and psychology The nuances of the problems posed by conflicts of interest will be highlighted for readers in an effort to demonstrate the many ways that structuring incentives can affect decision making and organizations financial well being *Commercial biotechnology : an international analysis.* , The Economics of American Higher Education William E. Becker Jr.,D.R. Lewis,2012-12-06 Postsecondary educational institutions in the United States are facing increasing financial stress and waning public support Unless these trends can be changed higher education can be expected to stagnate What if anything can be done As a starting point advocates of higher education need to more fully recognize the issues associated with the economic mission of higher education and how this mission gets translated into individual student gains regional growth and social equity This requires an understanding of the relationship between the outcomes of higher education and measures of economic productivity and well being This volume addresses topics related to the role of postsecondary education in microeconomic development within the United States At tention is given to the importance of colleges and universities in the enhancement of individual students and in the advancement of the com munities and states within which they work Although several of the chapters in this volume are aimed at research teaching universities much of what is presented throughout can be generalized to all of postsecondary education Little attention however is given to the role of higher education in the macroeconomic development of the United States this topic is covered in our related book American Higher Education and National Growth **Careers in Clinical Research** Institute of Medicine,Division of Health Sciences Policy,Committee on Addressing Career Paths for Clinical Research,1994-02-01 Transforming biological discoveries into medical treatment calls for a cadre of health professionals skilled in patient oriented research Yet many factors discourage talented persons from choosing clinical research as a profession This new volume lays out the problem in detail with specific recommendations to the federal government the biotechnology and pharmaceutical industries professional organizations the health care industry organized medicine and the nation s universities and academic health centers The volume explores How clinical research is conducted what human resources are available and what research opportunities lie ahead Why health professionals become discouraged about clinical research How the educational system has failed in this area and what programs stand out as models How funding affects the supply of researchers This practical book will be of immediate interest to public and private agencies

funding research research administrators medical educators health professionals and those pursuing a career in clinical investigation
