Partners Not Rivals Privatization And The Public Good:

Partners, Not Rivals Martha Minow, 2002 Renowned legal scholar Martha Minow takes on this unexamined change in our public life She acknowledges that private commercial interests are here to stay and that religious providers have long played crucial roles in health care social services and schooling New arrangements expanding these trends are not necessarily bad market forces can be useful in improving public services and the motivation and know how of religious groups can help many of the most needy Minow shows us how to guard against the dangers of privatization and preserve essential public values of due process freedom from discrimination and democratic participation **BOOK JACKET** **Religious Freedom and the**

Constitution Christopher L. Eisgruber, Lawrence G. Sager, 2010-04-10 Eisgruber offers practical moderate and appealing terms for the settlement of many hot button issues that have plunged religious freedom into controversy He calls Americans back to the project of finding fair terms of cooperation for a religiously diverse people and it offers a valuable set of tools for working toward that end *Innovating Democracy* Robert E. Goodin, 2008-07-10 In recent years democratic theory has

taken a deliberative turn Instead of merely casting the occasional ballot deliberative democrats want citizens to reason together They embrace talk as a decision procedure But of course thousands or millions of people cannot realistically talk to one another all at once When putting their theories into practice deliberative democrats therefore tend to focus on mini publics usually of a couple dozen to a couple hundred people The central question then is how to connect micro deliberations in mini publics to the political decision making processes of the larger society In *Innovating Democracy* Robert Goodin surveys these new deliberative mechanisms asking how they work and what we can properly expect of them Much though they have to offer they cannot deliver all that deliberative democrats hope Talk Goodin concludes is good as discovery procedure but not as a decision procedure His slogan is First talk then vote Micro deliberative mechanisms should supplement not supplant representative democracy Goodin goes on to show how to adapt our thinking about those familiar institutions to take full advantage of deliberative inputs That involves rethinking who should get a say how we hold people accountable how we sequence deliberative moments and what the roles of parties and legislatures can be in that Revisioning macro democratic processes in light of the processes and promise of micro deliberation *Innovating Democracy* provides an integrated perspective on democratic theory and practice after the deliberative turn *Building for the Arts* Peter

Frumkin, Ana Kolendo, 2014-03-06 Over the past two decades the arts in America have experienced an unprecedented building boom with more than sixteen billion dollars directed to the building expansion and renovation of museums theaters symphony halls opera houses and centers for the visual and performing arts Among the projects that emerged from the boom were many brilliant successes Others like the striking addition of the Quadracci Pavilion to the Milwaukee Art Museum brought international renown but also tens of millions of dollars of off budget debt while offering scarce additional benefit to the arts and embodying the cultural sector s worst fears that the arts themselves were being displaced by the big status

driven architecture projects built to contain them With Building for the Arts Peter Frumkin and Ana Kolendo explore how artistic vision funding partnerships and institutional culture work together or fail to throughout the process of major cultural construction projects Drawing on detailed case studies and in depth interviews at museums and other cultural institutions varying in size and funding arrangements including the Art Institute of Chicago Atlanta Opera and AT T Performing Arts Center in Dallas Frumkin and Kolendo analyze the decision making considerations and challenges and identify four factors whose alignment characterizes the most successful and sustainable of the projects discussed institutional requirements capacity of the institution to manage the project while maintaining ongoing operations community interest and support and sufficient sources of funding How and whether these factors are strategically aligned in the design and execution of a building initiative the authors argue can lead an organization to either thrive or fail The book closes with an analysis of specific tactics that can enhance the chances of a project s success A practical guide grounded in the latest scholarship on nonprofit strategy and governance Building for the Arts will be an invaluable resource for professional arts staff and management trustees of arts organizations development professionals and donors as well as those who study and seek to understand them

The Oxford Handbook of Public Policy Michael Moran, Martin Rein, Robert E. Goodin, 2008-06-13 The Oxford Handbooks of Political Science is a ten volume set of reference books offering authoritative and engaging critical overviews of the state of political science Each volume focuses on a particular part of the discipline with volumes on Public Policy Political Theory Political Economy Contextual Political Analysis Comparative Politics International Relations Law and Politics Political Behavior Political Institutions and Political Methodology The project as a whole is under the General Editorship of Robert E Goodin with each volume being edited by a distinguished international group of specialists in their respective fields The books set out not just to report on the discipline but to shape it The series will be an indispensable point of reference for anyone working in political science and adjacent disciplines Public policy is the business end of political science It is where theory meets practice in the pursuit of the public good Political scientists approach public policy in myriad ways Some approach the policy process descriptively asking how the need for public intervention comes to be perceived a policy response formulated enacted implemented and all too often subverted perverted altered or abandoned Others approach public policy more prescriptively offering politically informed suggestions for how normatively valued goals can and should be pursued either through particular policies or through alternative processes for making policy Some offer their advice from the Olympian heights of detached academic observers others as engaged scholars cum advocates while still others seek to instil more reflective attitudes among policy practitioners themselves toward their own practices The Oxford Handbook of Public Policy mines all these traditions using an innovative structure that responds to the very latest scholarship Its chapters touch upon institutional and historical sources and analytical methods how policy is made how it is evaluated and how it is constrained In these ways the Handbook shows how the combined wisdom of political science as a whole can be

brought to bear on political attempts to improve the human condition The Oxford Handbook of Civil Society Michael Edwards, 2011-09-05 In the past two decades civil society has become a central organizing concept in the social sciences. Occupying the middle ground between the state and private life the civil sphere encompasses everything from associations to protests to church groups to nongovernmental organizations. Interest in the topic exploded with the decline of statism in the 1980s and 1990s and many of our current debates about politics and social policy are informed by the renewed focus on civil society. Michael Edwards, author of the most authoritative single authored book on civil society, serves as the editor for *The Oxford Handbook of Civil Society*. Broadly speaking the book views the topic through three prisms: as a part of society, voluntary associations as a kind of society marked out by certain social norms, and as a space for citizen action and engagement, the public square or sphere. It does not focus solely on the West, a failing of much of the literature to date, but looks at civil society in both the developed and developing worlds. Throughout it merges theory, practice, and empirical research. In sum, *The Oxford Handbook on Civil Society* will be the definitive work on the topic.

Consumed: How Markets Corrupt Children, Infantilize Adults, and Swallow Citizens Whole Benjamin R. Barber, 2008-03-17 Powerful and disturbing. No one who cares about the future of our public life can afford to ignore this book. Jackson Lears: A powerful sequel to Benjamin R. Barber's best-selling *Jihad vs McWorld*. *Consumed* offers a vivid portrait of a global economy that overproduces goods and targets children as consumers in a market where there are never enough shoppers and where the primary goal is no longer to manufacture goods but needs. Disturbing, provocative, and compelling, this book examines phenomena as seemingly disparate as adolescent fashion trends for adults, megachurches, declining voter participation, the privatization of the public sphere, branding, and the rise of online shopping to show how the freedoms of the free market have undermined the freedoms of the deliberative adult citizen. Barber brings together extensive empirical research with an original theoretical framework for understanding our contemporary predicament.

Con\$umed Benjamin R. Barber, 2007 An examination of the effects of capitalism on American culture and society reveals how consumer capitalism overproduces goods, targets children as consumers, and replaces public goods with private commodities.

Enforcement of Transnational Regulation Fabrizio Cafaggi, 2012-01-01 Globalization pushes the boundaries of markets. Alongside the greater goods of transnational economic activity come the bads of unregulated conduct. This important book looks to the new frontiers of legal intervention to make sure that global markets do not run riot over important public values. The signal contribution is not the search for ever higher levels of transnational authority, the superstates of a brave new world, but empowering numerous private actors to enforce legal norms in our fast-changing economic environment.

Samuel Issacharoff, New York University School of Law, US. This book addresses the different mechanisms of enforcement deployed in transnational private regimes vis-à-vis those in the field of public transnational law. Enforcement represents a key dimension in measuring the effectiveness and legitimacy of transnational private regulation. This detailed book shifts the focus from rule making to enforcement and compliance and

moves from a vertical analysis to a comparative sectoral analysis Both public and private transnational regulation fall under the scrutiny of the authors and the book considers the effectiveness of judicial models of enforcement under international law and through national courts and of non judicial means Comparisons are drawn across sectors including international commercial law labor law finance Internet regulation and advertising Enforcement of Transnational Regulation will appeal to scholars of both private and public law regulation and comparative law It will also prove a stimulating and challenging read for policy makers and law makers

The Fox in the Henhouse Elizabeth Minnich, Si Kahn, 2010-05 Read a transcript of Amy Goodman's interview with Si and Elizabeth on Democracy Now A legendary activist and a distinguished public philosopher address a timely but complex issue in a way that is accessible and compelling Evaluates privatization not just economically but in social political and human terms Offers principles and practices for creating alternatives to privatization and strengthening the public sector Privatization has been on the right wing agenda for years but now it has the power of the Bush administration behind it Health care schools Social Security public lands the military prisons all are considered fair game But does privatization really serve the public good Or is it a payoff to powerful corporations intent on replacing the government with a private profit culture in which there is no meaningful public accountability and the bottom line rules all In this powerful book legendary activist Si Kahn and public philosopher Elizabeth Minnich argue that privatization is a threat whose seriousness few appreciate Kahn and Minnich expose the damage privatization has done in several specific areas of society as well as to society as a whole They argue that corporations are by their very nature unable to effectively fulfill what have traditionally been the responsibilities of government Some things that are worth doing simply can't indeed shouldn't be done purely for profit Unless there is a balance between the public and private sectors vulnerable populations will be chronically underserved and critical public functions will be underfunded to the point of virtual elimination Privatization is usually dealt with in dry economic terms but Kahn and Minnich take an unusual and lively approach to the issue Combining stories analysis impassioned argument and even song lyrics they discuss how the concept of privatization has evolved and look at the different forces that work for and against it emphasizing the extreme anti government ideology motivating many privatization advocates And they outline principles and practices for combating privatization and its proponents **The Fox in the Henhouse** makes a powerful case that the market is not the measure of all things and that a vital public sector is an indispensable component of a healthy democracy
