## **Partnerships For Global Development:**

*Public-Private Partnerships in Global Development* Timothy E. Nielander, 2020-11-03 The global development community has articulated many collective aspirations in the Sustainable Development Goals SDGs aimed at transforming the world. Given the complicated issues that accompany globalization, State and non-State actors continue to explore the utility of public-private cooperation mechanisms. Public-private cooperation initiatives strive for global governance mechanisms involving oversight by all of the actors and operating frameworks that include multiple states, intergovernmental organizations, NGOs, private sector companies, and prominent individuals. This book examines global public-private initiatives which attempt to form new institutions to achieve cooperation objectives in contrast to traditional PPP models which rely on contract arrangements between governments and service providers. Students of these initiatives from many interconnected disciplines including law, finance, international relations, and governance will find this introduction to this growing field of development cooperation timely and informative.

**Stakeholders** Ian Smillie, 2013-11-05 This unique study from the OECD Development Centre presents a comprehensive review by independent experts of the relationships and division of responsibility between the 22 member governments of the OECD Development Assistance Committee (DAC) and NGOs from these donor countries working in international development. Additional chapters cover the roles of the European Union and the World Bank. Among other themes, the book looks at two very significant issues. First, at the way in which an overemphasis on evaluation may be leading NGOs to focus purely on measuring their output, thus choosing activities which are easily accountable. Second, it examines the important impacts of the evolution in the funding relationship between governments and NGOs, from matching grants to contracts where NGOs must increasingly compete for contracts.

*Higher Education and Global Poverty* Christopher S. Collins, 2011 This study is founded on several case studies which examine countries including Thailand and Uganda where impact analyses were done on World Bank loans dedicated to the expansion of higher education in science and technology. These two countries were chosen because they are in two different regions with dissimilar colonial histories and their loans are relatively recent. A case study on crossborder university partnerships also provides a model which other universities and development agencies may utilize when positioning higher education as a poverty reduction strategy. Delivering extensive frontline information on education, international development, and the challenges that follow, this book also includes a review of poverty reduction strategies as well as a theoretical framework that covers colonialism, development, and indigenous knowledge. This research, conducted on the World Bank and the impact of its policies in two developing countries, offers primary source information on work related to the topic. A major portion of the book looks at the effort put forth by U.S. universities in partnership with universities in developing countries for the purpose of using knowledge creation and dissemination as a poverty reduction strategy. The policy recommendations presented are useful for international

development agencies like the World Bank and the model demonstrated can be used by universities interested in cross border partnerships across lines of economic development This book will be invaluable to educational researchers qualitative and ethnographic researchers international development specialists and scholars in international education

Sachs,2015-03-10 Jeffrey D Sachs has shown himself to be one of the world s most perceptive and original analysts of global

development in his groundbreaking books including *The End of Poverty* and *Common Wealth Economics for a Crowded Planet*. Now in this major new work he presents a compelling and practical framework for how global citizens can address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation and political economic injustice. Sachs outlines the holistic way forward: sustainable development. This provocative work offers readers, students, activists, environmentalists and policy makers the tools, metrics and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary general on the Millennium Development Goals and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and a clarion call for all who care about our planet and global justice.

*Development Issues in Global Governance* Benedicte Bull, Desmond McNeill, 2007. *Development Issues in Global Governance* presents the first serious academic study of multilateral organizations' current partnerships with the private sector. This new volume describes empirically and analyzes theoretically the impact of such partnerships on the practices, legitimacy and authority of the parties involved. With detailed case studies of key international bodies including the World Health Organization (WHO), the International Labour Organization (ILO), the World Bank and the UN's Education Science and Communication Organization (UNESCO), the reader is given a clear understanding of present debates in this critical area of world affairs. This invaluable book includes fresh case studies that deal with five different industries: pharmaceuticals, software, water supply, tobacco and chocolate. It provides an overview of the scope of the phenomenon of partnerships in the multilateral system and classification of different types is based on detailed qualitative research including extensive interviews in the multilateral organizations. It places the findings in a rigorous theoretical framework relating them to current trends in international politics and international political economy. It examines the challenges contained in the Millennium Development Goals: the provision of drugs to HIV/AIDS patients and vaccination for all children, the bridging of the digital divide, combating child labour and the provision of clean water to the poor. The authors conclude that we are witnessing the emergence of a new institutional form best characterized as market multilateralism. They argue that although transnational corporations have become heavily involved with multilateral organizations, these partnerships are crafted to deal with specific instances of market failure while the guiding principles of the global economy remain unchallenged. This book will be of great interest to all students of development studies, international relations, political science and business management.
