Partnering With Parents in Elementary School Math Hilary Kreisberg, Matthew L. Beyranevand, 2021-02-03 How to build productive relationships in math education I wasn t taught this way I can t help my child These are common refrains from today s parents and guardians who are often overwhelmed confused worried and frustrated about how to best support their children with what they see as the new math The problem has been compounded by the shift to more distance learning in response to a global pandemic Partnering With Parents in Elementary School Math provides educators with long overdue guidance on how to productively partner and communicate with families about their children s mathematics learning It includes reproducible surveys letters and planning documents that can be used to improve the home school relationship which in turn helps students parents teachers and education leaders alike Readers will find guidance on how to Understand and empathize with what fuels parents anxieties and concerns Align as a school and set parents expectations about what math instruction their children will experience and how it will help them Communicate clearly and productively with parents about their students progress strengths and needs in math Run informative and fun family events support homework Coach parents to portray a productive disposition about math in front of their children Educators families and students are best served when proactive productive and healthy relationships have been developed with each other and with the realities of today s math education This guide shows how these relationships can be built

Coordinating Mathematics Across the Primary School Tony Brown, 2003-10-04 Specifically designed for busy teachers who have responsibility for co ordinating a subject area within their primary school Each volume in the series conforms to a concise style while providing a wealth of tips case studies and photocopiable material that teachers can use immediately There are special volumes dedicated to dealing with OFSTED creating whole school policy and the demands of co ordinating several subjects within a small school

The entire set of 16 volumes is available [Resources in Education](#) ,1999 **Paired Maths Handbook** Judi Bamford,Keith J. Topping,2013-11-12 First Published in 1998 This book is one of a family of three related books consisting of two resource Handbooks for everyday use supported by a more detailed background text for deeper reading and reference The Paired Maths Handbook gives a brief introduction to the rationale materials organisation and evaluation of the Paired Maths method for parental involvement and peer tutoring in mathematics for children aged 4 to 14 This is followed by 12 different practical resources to copy to help with the organisation of the method The main part of the book consists of two dimensional mathematical games to copy complete with instructions and needing minimal other materials These games are particularly suitable for children aged 9 to 12 especially when involved in cooperative learning or peer tutoring in schools or other study centres *Collaboration in Teacher Education* Andrea Peter-Koop,Vânia Santos-Wagner,C.J. Breen,A.J.C Begg,2013-03-09 This book systematically explores and reflects on a variety of issues related to collaborative mathematics teacher education practice and research such as classroom coaching mentoring or co learning agreements highlighting the evolution and implications of collaborative enterprises in different cultural settings It is relevant to educational researchers research students and practitioners *Key Concepts in Teaching Primary Mathematics* Derek Haylock,2007-09-17 Covering the key principles and concepts in the teaching and learning of mathematics in primary schools this text provides trainee and practising teachers with a quick and easy reference to what they need to know for their course and in the classroom The entries are arranged alphabetically and each contains a brief definition followed by an explanation and discussion practical examples and annotated suggestions for further reading Examples of the wide ranging material include Anxiety about mathematics Assessment for Learning Cognitive conflict Concept learning Creativity in mathematics Differentiation Equivalence Explanation Investigation Low attainment Making connections Meaningful context Mental calculation Numeracy Play as a context for learning mathematics Problem solving Questioning Talk *The A-Z of Primary Maths* Kate Frood,2024-01-26 The A Z of Primary Maths is a compendium of great ideas for teaching mathematics organised around the 26 letters of the English alphabet Maths foundations must be built in our primary schools We need to create space for children to play with numbers to explore patterns to solve problems and to laugh and chat in maths lessons It s this start that will build a lifelong love of and confidence in maths Kate Frood [The Emergence of Self in Educational Contexts](#) Giuseppina Marsico,Luca Tateo,2018-09-27 This book represents the first extensive introduction to the emerging construct of Educational Self The new concept describes a specific dimension of the Self which is elaborated in the course of a person s school life and is reactivated anytime the person is involved in an educational activity whether as a student teacher or parent The Educational Self ES approach was created by the volume editors and is currently being developed at various universities in Europe and Latin America as a way of understanding and operating in educational contexts The book presents the theoretical framework and the empirical developments of the construct paving the way for further applications in education

The main locations of the empirical studies are Denmark Italy Brazil Portugal and Colombia but the research network is steadily expanding to other countries so that the concept here can be generalized to different cultural contexts The book addresses a range of contexts and moments in school life The editors introduction presents the construct of ES the opportunities for further theoretical and empirical developments of the concept and its potential applications in educational practices In the remainder of the volume ES is explored for different age groups from children to adolescents to higher education different actors peers teachers parents and their interactions different contexts formal education special institutions school family relationships and different phenomena disruptive behavior special needs value orientation school failure etc All the studies share a qualitative idiographic approach which is characteristic of the perspective of cultural psychology in which the ES construct was elaborated Eliminating the Achievement Gap William Jeynes,2019-10-04

Eliminating the Achievement Gap is designed to be the first book to base society s efforts to reduce the achievement gap on meta analytic analysis It proposes an interdisciplinary approach to this problem that is rare refreshing and insightful including solutions generally overlooked Parents as Partners in Schooling Centre for Educational Research and Innovation,1997 Many OECD countries are coming to the conclusion that close co operation between family and school helps children to learn more effectively This volume assesses the benefits of parental participation in education and discusses ways to achieve it *Teaching Children Mathematics* ,1994 *The Sociology of Mathematics Education* Paul Dowling,2002-11-01 Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use *Doing Research/Reading Research* Paul Dowling,2005-11-29 This best selling text provides a scheme which enables the beginning researcher to organize and evaluate the research that they read and to plan and implement small scale research projects of their own The authors also give structured practical guidance on the development of a research question techniques of data collection qualitative and quantitative forms of analysis and the writing and dissemination of research **Resources in Education** ,1996 Values in Education and Education in Values Mark Halstead,Monica J. Taylor,2005-10-26 This work provides an analysis of how schools can influence the developing values of young people The authors first examine from the perspective of educationalists and policy makers values within contemporary education before focusing on the values of pupils and schools

Research in Middle Level Education ,1998 **British Book News** British Council,1993 Includes no 53a British wartime books for young people **Education, Entertainment, and Learning in the Home** David Buckingham,Margaret Scanlon,2003 This book is based on an extensive research project investigating the developing market in educational materials designed for use in the home It considers the characteristics of edutainment in children s information books pre school magazines and CD Roms It discusses the economic forces at work in the production and marketing of these media and the rhetoric of the sales pitches Also it considers how parents and children use them in the home
