Political Parties, Party Systems and Democratisation in East Asia Liang Fook Lye, Wilhelm Hofmeister, 2011 Some fledgling democracies in the world have encountered setbacks due to political parties trying to grapple with the expectations of sophisticated electorates and introducing gradual political reforms over the years This book describes how democracy is evolving in East Asia and how it assumes different forms in different countries with political parties adapting and evolving alongside It has a two fold intent First it contends that the existing variety of party systems in East Asia will endure and may

even flourish rather than converge as liberal democracies Second it highlights the seeming political durability of one party systems unlike two part or multi party systems in the US and Europe and their enduring predominance in countries such as Cambodia China Singapore and Vietnam Political Parties, Party Systems And Democratization In East Asia Liang Fook Lye, Wilhelm Hofmeister, 2011-03-11 Some fledgling democracies in the world have encountered setbacks due to political parties trying to grapple with the expectations of sophisticated electorates and introducing gradual political reforms over the years This book describes how democracy is evolving in East Asia and how it assumes different forms in different countries with political parties adapting and evolving alongside It has a two fold intent First it contends that the existing variety of party systems in East Asia will endure and may even flourish rather than converge as liberal democracies Second it highlights the seeming political durability of one party systems unlike two part or multi party systems in the US and Europe and their enduring predominance in countries such as Cambodia China Singapore and Vietnam *Party System Closure* Fernando Casal Bértoa, Zsolt Enyedi, 2021-05-09 Party System Closure maps trends in interparty relations in Europe from 1848 until 2019 It investigates how the length of democratic experience the institutionalization of individual parties the fragmentation of parliaments and the support for anti establishment parties shape the degree of institutionalization of party systems The analyses presented answer the questions of whether predictability in partisan interactions is necessary for the survival of democratic regimes and whether it improves or undermines the quality of democracy The developments of party politics at the elite level are contrasted with the dynamics of voting behaviour The comparisons of distinct historical periods and of macro regions provide a comprehensive picture of the European history of party competition and cooperation The empirical overview presented in the book is based on a novel conceptual framework and features party composition data of more than a thousand European governments Party systems are analysed in terms of poles and blocs and the degree of closure and of polarization is related to a new party system typology The book demonstrates that information collected from partisan interactions at the time of government formation can reveal changes that characterise the party system as a whole The empirical results confirm that the Cold War period 1945 1989 was exceptionally stable while the post Berlin Wall era shows signs of disintegration although more at the level of voters than at the level of elites After three decades of democratic politics in Europe 1990 2019 the West and the South are looking increasingly like the East especially in terms of the level of party de institutionalization The West and the South are becoming more polarised than the East but in terms of parliamentary fragmentation the party systems of the South and the East are converging while the West is diverging from the rest with its increasingly high number of parties As far as our central concept party system closure is concerned thanks to the gradual process of stabilization in the East and the recent de institutionalization in the West and South the regional differences are declining Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative

The Democratic Century Seymour Martin Lipset, Jason M. Lakin, 2004 In this study on democracy and democratic systems two scholars offer an expansive view of democratic systems and explain why democracy has succeeded in some countries and has failed in others

The Personalisation of Politics Lauri Karvonen, 2014-12-01 With the weakening of the structural determinants of politics in Western democracies it is commonly assumed that individual politicians and politicians as individuals have come to mean more for voter behaviour and party choice Many observers argue that politics has become more personalised in the course of the last few decades Although considerable research on the various aspects of personalisation has been carried out no single study so far has approached the question from a broad comparative perspective By examining four central dimensions of personalisation institutions candidates party leaders and media and by including data from most stable parliamentary democracies this book attempts to fill part of that gap The book demonstrates clearly that there is no linear trend towards more personalisation among the cases studied From the point of view of the general personalisation thesis the findings are mixed at best in some important respects they are negative While the media tend to focus more on individual politicians the idea that party leaders increasingly determine the party choice of voters finds little support in empirical evidence Most researchers seem to agree that the position of the prime minister has become more dominant A closer look at comparative evidence results in a more complex picture There has been a certain tendency to develop the most party centred electoral systems in a more candidate centred direction On the other hand recent reforms have altered some of the most candidate centred systems in the opposite direction Individual candidates seem to mean more to voters in systems where preferential voting has been practiced for a long time This change is by no means dramatic nor does it seem to apply to other electoral systems Karvonen shows that the personalisation thesis while not completely erroneous has been overstated not just by the media but in some of the research literature as well

The Oxford Handbook of the Radical Right Jens Rydgren, 2018-02-01 The resurgence of strong radical right wing parties and movements constitutes one of the most significant political changes in democratic states during the past several decades particularly in Europe The radical right s comeback has notably attracted interest from political scientists sociologists and historians although the majority of past research focuses on party and electoral politics In contrast The Oxford Handbook of the Radical Right not only covers existing literature but also shows how the radical right forms movements rather than parties Editor Jens Rydren has gathered an international cast of contributors to cover concepts and definitions ideologies and discourses and a range of contemporary issues such as religion globalization gender and activism Further this volume is one of few to provide a number of cases focusing on areas outside of Europe including Russia the US Australia Israel and Japan By integrating various strands of scholarship on the radical right that covers different regions and different research perspectives this Handbook provides an authoritative and state of the art overview of the topic and will set the agenda for scholarship on the radical right for years to come
