The Reproduction of Life Death Dawne McCance, 2019-07-02 During the 1975-76 academic year Jacques Derrida delivered a seminar *La vie la mort* Life Death at the cole normale sup rieure in Paris Based on archival translations of this untapped but soon to be published seminar The Reproduction of Life Death offers an unprecedented study of Derrida's engagement with molecular biology and genetics particularly the work of the biologist Francois Jacob Structured as an itinerary of three rings each departing from and coming back to Nietzsche Derrida's seminar ties Jacob's logocentric account of reproduction to the reproductive program of teaching that characterizes the academic institution challenging this mode of teaching as auto reproduction along with the concept of academic freedom on which it is based McCance also brings Derrida's critique of Jacob's theory of auto reproduction together with his reading of reproductivity the tendency to repeat reproduce that is theorized and enacted in Freud's *Beyond the Pleasure Principle* The book further shows how Derrida's account of life death relates to his writings on autobiography and the signature and to such later concerns as the question of the animal McCance brings extensive archival research together with a deep knowledge of Derrida's work a background in genetics to offer a fascinating new account of an encounter between philosophy and the hard sciences that will be of interest to theorists in a wide range of disciplines concerned with the question of life

Aporias of Translation Elias Schwieler, 2022-06-06 This book proposes a new way for scholars in for example Education Literary Studies and Philosophy to approach texts and other phenomena through the concept and practice of translation Its interdisciplinary perspective makes the book of value for graduate students and scholars in the Humanities and Social Sciences The unique take on translation as related to the notion of aporia is applied to a number of seminal and classical texts within literature poetry and philosophy which gives the reader new understandings of the workings of language and what happens within and between languages as well as within and between disciplines when some form of interpretation or analysis is at work Importantly the book develops the notion of aporias of translation as a way to learn and develop our understanding of texts and phenomena

and thus functions as a pedagogical process which helps us come to terms with the boundaries of language and academic disciplines

The Post Card Jacques Derrida, 2020-10-28 17 November 1979 You were reading a somewhat retro loveletter the last in history But you have not yet received it Yes its lack or excess of address prepares it to fall into all hands a post card an open letter in which the secret appears but indecipherably What does a post card want to say to you On what conditions is it possible Its destination traverses you you no longer know who you are At the very instant when from its address it interpellates you uniquely you instead of reaching you it divides you or sets you aside occasionally overlooks you And you love and you do not love it makes

of you what you wish it takes you it leaves you it gives you On the other side of the card look a proposition is made to you S and p Socrates and Plato For once the former seems to write and with his other hand he is even scratching But what is Plato doing with his outstretched finger in his back While you occupy yourself with turning it around in every direction it is the picture that turns you around like a letter in advance it deciphers you it preoccupies space it procures your words and gestures all the bodies that you believe you invent in order to determine its outline You find yourself you yourself on its path The thick support of the card a book heavy and light is also the specter of this scene the analysis between Socrates and Plato on the program of several others Like the soothsayer a fortune telling book watches over and speculates on that which must happen on what it indeed might mean to happen to arrive to have to happen or arrive to let or to make happen or arrive to destine to address to send to legate to inherit etc if it all still signifies between here and there the near and the far da und fort the one or the other You situate the subject of the book between the posts and the analytic movement the pleasure principle and the history of telecommunications the post card and the purloined letter in a word the transference from Socrates to Freud and beyond This satire of epistolary literature had to be farci stuffed with addresses postal codes crypted missives anonymous letters all of it confided to so many modes genres and tones In it I also abuse dates signatures titles or references language itself J D With The Post Card as with Glas Derrida appears more as writer than as philosopher Or we could say that here in what is in part a mock epistolary novel the long section is called Envois roughly dispatches he stages his writing more overtly than in the scholarly works The Post Card also contains a series of self reflective essays largely focused on Freud in which Derrida is beautifully lucid and direct Alexander Gelley Library Journal

The Anticipatory Corpse Jeffrey P. Bishop, 2011-09-19 In this original and compelling book Jeffrey P Bishop a philosopher ethicist and physician argues that something has gone sadly amiss in the care of the dying by contemporary medicine and in our social and political views of death as shaped by our scientific successes and ongoing debates about euthanasia and the right to die or to live The Anticipatory Corpse Medicine Power and the Care of the Dying informed by Foucault's genealogy of medicine and power as well as by a thorough grasp of current medical practices and medical ethics argues that a view of people as machines in motion people as in effect temporarily animated corpses with interchangeable parts has become

epistemologically normative for medicine The dead body is subtly anticipated in our practices of exercising control over the suffering person whether through technological mastery in the intensive care unit or through the impersonal quasi scientific assessments of psychological and spiritual medicine The result is a kind of nihilistic attitude toward the dying and troubling contradictions and absurdities in our practices Wide ranging in its examples from organ donation rules in the United States to ICU medicine to spiritual surveys to presidential bioethics commissions attempting to define death and to high profile cases such as Terri Schiavo s The Anticipatory Corpse explores the historical political and philosophical underpinnings of our care of the dying and finally the possibilities of change This book is a ground breaking work in bioethics It will provoke thought and argument for all those engaged in medicine philosophy theology and health policy **The Short French**

writers officials kings and queens of recent times and also to those who had died long before whether Christ the saints or the ancient Greeks and Romans who posthumously filled the minds of Renaissance humanists Did tenses refer to the dead in ways that contributed to granting them differing degrees of presence and absence Did tenses communicate dimensions of posthumous presence and absence that partly eluded more concept based affirmations The investigation ranges from funerary and devotional writing to Eucharistic theology from poetry to humanist paratexts from Rabelais s prose fiction to Montaigne s *Essais* Primarily a work of literary and cultural history it also draws on early modern grammatical thought and on modern linguistics with its concept of aspect and its questioning of tense while arguing that neither can fully explain the phenomena studied The book briefly compares early modern usage with tendencies in modern French and English in the West asking whether changes in belief about posthumous survival have been accompanied by changes in tense use
