**An Imaginary Racism** Pascal Bruckner, 2018-11-26

Islamophobia is a term that has existed since the nineteenth century But in recent decades argues Pascal Bruckner in his controversial new book it has become a weapon used to silence criticism of Islam The term allows those who brandish it in the name of Islam to freeze the latter making reform difficult Whereas Christianity and Judaism have been rejuvenated over the centuries by external criticism Islam has been shielded from critical examination and has remained impervious to change This tendency is exacerbated by the hypocrisy of those Western defenders of Islam who in the name of the principles of the Enlightenment seek to muzzle its critics while at the same time demanding the right to chastise and criticize other religions These developments argues Bruckner are counter productive for Western democracies as they struggle with the twin challenges of immigration and terrorism The return of religion in those democracies must not be equated with the defence of fanaticism and the right to religious freedom must go hand in hand with freedom of expression an openness to criticism and a rejection of all forms of extremism There are already more than enough forms of racism there is no need to imagine more While all violence directed against Muslims is to be strongly condemned and punished defining these acts as Islamophobic rather than criminal does more to damage Islam and weaken the position of Muslims than to strengthen them

Race, Place, Trace Lorenzo Veracini, Susan Slyomovics, 2022-02-01 Continuing Patrick Wolfe s work on settler colonialism This edited collection celebrates Patrick Wolfe s contribution to the study and critique of settler colonialism as a distinct mode of domination The chapters collected here focus on the settler colonial assimilation of land and people and on what Wolfe insightfully defined as preaccumulation the ability of settlers to mobilise technologies and resources unavailable to resisting Indigenous communities Wolfe s militant and interdisciplinary scholarship is thus emphasised together with his determination to acknowledge Indigenous perspectives and the efficacy of Indigenous resistances In case studies of Australia French Algeria and the United States contributors illustrate how seminal his contribution was and is There are three core reasons why it is especially important to develop the field of thinking inaugurated by Wolfe first because the demand for Indigenous sovereignty has been crucial to recent struggles against neoliberal attacks in the settler societies second because a critique of settler colonialism and its logic of elimination has supported important struggles against environmental devastation and third because the ability to think race in ways that are not disconnected from other struggles is now more needed than ever Racial capitalism and settler colonialism are as imbricated now as they always have been and keeping both in mind at the same time highlights the need to establish and nurture solidarities that reach across established divides

**Relay Race To Infinity, The: Developments In**

**Mathematics From Euclid To Fermat** Derek Allan Holton, John Stillwell, 2024-10-08 Why were most historically important mathematicians wealthy Why were they often lawyers and many had pastors for fathers Why were original results sometimes discovered by two mathematicians independently within a short time of each other Why did the Italian Fibonacci speak Arabic It all began a couple of years ago when one of the authors started to write short biographies of important historical mathematicians for the teaching journal Australian Primary Mathematics Classroom It was felt that teachers generally knew very little about the way the subject developed or the people who developed it And it was felt that historical knowledge would help them see how the subject progressed and enable them to fit in with the historical episodes that would be of interest to students Clearly the book that developed contains mathematics up to the 17th century but we are keen to set the subject in those times to try to give short biographies of the people involved as well as provide a perspective of the events that led up to the times and led up to the mathematics Importantly it is shown that the maths enterprise was not undertaken by a small few

but worked like a relay race One or a few might take up an idea and develop it but it often gets only so far Later others would take up the idea the baton and the relay race to find results continues **Ski**, 1990-12 **The Invention of Race** Nicolas Bancel, Thomas David, Dominic Thomas, 2014-04-24 This edited collection explores the genesis of scientific conceptions of race and their accompanying impact on the taxonomy of human collections internationally as evidenced in ethnographic museums world fairs zoological gardens international colonial exhibitions and ethnic shows A deep epistemological change took place in Europe in this domain toward the end of the eighteenth century producing new scientific representations of race and thereby triggering a radical transformation in the visual economy relating to race and racial representation and its inscription in the body These practices would play defining roles in shaping public consciousness and the representation of otherness in modern societies *The Invention of Race* provides contextualization that is often lacking in contemporary discussions on diversity multiculturalism and race *Mixed Race Cinemas* Zélie Asava, 2017-09-07 Using critical race theory and film studies to explore the interconnectedness between cinema and society Z lie Asava traces the history of mixed race representations in American and French filmmaking from early and silent cinema to the present day *Mixed Race Cinemas* covers over a hundred years of filmmaking to chart the development of black white mixed representations onscreen With the 21st century being labelled the Mulatto Millennium mixed bodies are more prevalent than ever in the public sphere yet all too often they continue to be positioned as exotic strange and otherworldly according to tragic mulatto tropes This book evaluates the potential for moving beyond fixed racial binaries both onscreen and off by exploring actors and characters who embody the in between Through analyses of over 40 movies and case studies of key films from the 1910s on *Mixed Race Cinemas* illuminates landmark shifts in local and global cinema exploring discourses of subjectivity race gender sexuality and class In doing so it reveals the similarities and contrasts between American and French cinema in relation to recognising visualising and constructing mixedness *Mixed Race Cinemas* contextualizes and critiques raced and post race visual culture using cinematic representations to illustrate changing definitions of mixed identity across different historical and geographical contexts **The 100 Most Popular Young Adult Authors** Bernard A. Drew, 1997-10-15 The book focuses on individuals writing in the 90s but also includes 12 classic authors e g Mark Twain Louisa May Alcott J R R Tolkien who are still widely read by teens It also covers some authors known primarily for adult literature e g Stephen King and some who write mainly for middle readers but are also popular among young adults e g Betsy Byars An affordable alternative to multivolume publications this book makes a great collection development tool and resource for author studies It will also help readers find other books by and about their favorite writers *Race in Translation* Ella Shohat, Robert Stam, 2012-05-28 While the term culture wars often designates the heated arguments in the English speaking world spiraling around race the canon and affirmative action in fact these discussions have raged in diverse sites and languages *Race in Translation* charts the transatlantic traffic of the debates within and between three zones the U S France and Brazil Stam and Shohat trace the

literal and figurative translation of these multidirectional intellectual debates seen most recently in the emergence of postcolonial studies in France and whiteness studies in Brazil The authors also interrogate an ironic convergence whereby rightist politicians like Sarkozy and Cameron join hands with some leftist intellectuals like Bhabha and Bourdieu in condemning multiculturalism and identity politics At once a report from various fronts in the culture wars a mapping of the germane literatures and an argument about methods of reading the cross border movement of ideas the book constitutes a major contribution to our understanding of the Diasporic and the Transnational *The Year's Best Science Fiction* Gardner R. Dozois, 1997 Fourteenth Fifteenth Annual Collections Contesting Race and Citizenship Camilla Hawthorne, 2022-07-15

*Contesting Race and Citizenship* is an original study of Black politics and varieties of political mobilization in Italy Although there is extensive research on first generation immigrants and refugees who traveled from Africa to Italy there is little scholarship about the experiences of Black people who were born and raised in Italy Camilla Hawthorne focuses on the ways Italians of African descent have become entangled with processes of redefining the legal racial cultural and economic boundaries of Italy and by extension of Europe itself *Contesting Race and Citizenship* opens discussions of the so called migrant crisis by focusing on a generation of Black people who although born or raised in Italy have been thrust into the same racist xenophobic political climate as the immigrants and refugees who are arriving in Europe from the African continent Hawthorne traces not only mobilizations for national citizenship but also the more capacious transnational Black diasporic possibilities that emerge when activists confront the ethical and political limits of citizenship as a means for securing meaningful lasting racial justice possibilities that are based on shared critiques of the racial state and shared histories of racial capitalism and colonialism *Race, Labor, and Civil Rights* Robert Samuel Smith, 2008-12

In 1966 thirteen black employees of the Duke Power Company's Dan River Plant in Draper North Carolina filed a lawsuit against the company challenging its requirement of a high school diploma or a passing grade on an intelligence test for internal transfer or promotion In the groundbreaking decision *Griggs v Duke Power* 1971 the United States Supreme Court ruled in favor of the plaintiffs finding such employment practices violated Title 7 of the Civil Rights Act of 1964 when they disparately affected minorities In doing so the court delivered a significant anti employment discrimination verdict Legal scholars rank *Griggs v Duke Power* on par with *Brown v Board of Education* 1954 in terms of its impact on eradicating race discrimination from American institutions In *Race Labor and Civil Rights* Robert Samuel Smith offers the first full length historical examination of this important case and its connection to civil rights activism during the second half of the 1960s Smith explores all aspects of *Griggs* highlighting the sustained energy of the grassroots civil rights community and the critical importance of courtroom activism Smith shows that after years of nonviolent direct action protests African Americans remained vigilant in the 1960s heading back to the courts to reinvigorate the civil rights acts in an effort to remove the lingering institutional bias left from decades of overt racism He asserts that alongside the more boisterous expressions of black radicalism of the late sixties foot

soldiers and local leaders of the civil rights community many of whom were working class black southerners mustered ongoing legal efforts to mold Title 7 into meaningful law Smith also highlights the persistent judicial activism of the NAACP Legal Defense and Education Fund and the ascension of the second generation of civil rights attorneys By exploring the virtually untold story of Griggs v Duke Power Smith s enlightening study connects the case and the campaign for equal employment opportunity to the broader civil rights movement and reveals the civil rights community s continued spirit of legal activism well into the 1970s     Showstopper! G. Pascal Zachary,2014-04-01 This inside account captures the energy and the madness of the software giant s race to develop a critical new program Gripping Fortune Magazine Showstopper is the dramatic inside story of the creation of Windows NT told by Wall Street Journal reporter G Pascal Zachary Driven by the legendary David Cutler a picked band of software engineers sacrifices almost everything in their lives to build a new stable operating system aimed at giving Microsoft a platform for growth through the next decade of development in the computing business Comparable in many ways to the Pulitzer Prize winning book The Soul of a New Machine by Tracy Kidder Showstopper gets deep inside the process of software development the lives and motivations of coders and the pressure to succeed coupled with the drive for originality and perfection that can pull a diverse team together to create a program consisting of many hundreds of thousands of lines of code
