priceless opportunity to solve some of the solar system's most enduring riddles and it prompted a clutch of enterprising scientists to brave the wild frontier in a grueling race to the Rocky Mountains. Acclaimed science journalist David Baron, long fascinated by eclipses, re-creates this epic tale of ambition, failure, and glory in a narrative that reveals as much about the historical trajectory of a striving young nation as it does about those scant three minutes when the blue sky blackened and stars appeared in mid-afternoon. Lauded as a sweeping, compelling Wall Street Journal work of science history, *American Eclipse* tells the story of the three tenacious and brilliant scientists who raced to Wyoming and Colorado to observe the rare event. Dedicating years of exhaustive research to reconstruct a remarkable chapter of U.S. history, Scientific American award-winning writer David Baron brings to three-dimensional life these competitors: the planet hunter James Craig Watson, pioneering astronomer Maria Mitchell, and the ambitious young inventor Thomas Edison, to thrillingly re-create the fierce jockeying of nineteenth-century American astronomy. With spellbinding accounts of train robberies and Indian skirmishes, the mythologized age of the Wild West comes alive as never before. An enthralling Daniel Kevles and magnificent portrayal of America's dawn as a scientific superpower, *American Eclipse* depicts a young nation that looked to the skies to reveal its towering ambition and expose its latent genius. *AB Bookman's Weekly*, 1997 **Igor** Satoshi Kitamura, 2006 Distinctive and artistic illustrations filled with energetic details make this a wonderful story about a bird who ultimately realizes he is not as alone or atonal as he had thought. Full color. Atlantis Murry Hope, 1991 Hope sets out to show that new discoveries about the changing tilt of Earth's axis and possible collisions between our planet and a giant asteroid may provide valuable clues about the destruction of Atlantis. The Elements of the Greek Tradition Murry Hope, 1989
