Understanding the Entrepreneurial Mind Alan L. Carsrud, Malin Brännback, 2009-07-30 Interest in the functioning of the human mind can certainly be traced to Plato and Aristotle who often dealt with issues of perceptions and motivations While the Greeks may have contemplated the human condition the modern study of the human mind can be traced back to Sigmund Freud 1900 and the psychoanalytic movement He began the exploration of both conscious and unconscious factors that propelled humans to engage in a variety of behaviors While Freud s focus may have been on repressed sexuality our focus in

this volume lies elsewhere We are concerned herein with the expression of the cognitions motivations passions intentions perceptions and emotions associated with entrepreneurial behaviors We are attempting in this volume to expand on the work of why entrepreneurs think differently from other people Baron 1998 2004 During the decade of the 1990s the field of entrepreneurship research seemingly abandoned the study of the entrepreneur This was the result of earlier research not being able to demonstrate some unique entrepreneurial personality trait or characteristic Brockhaus and Horwitz 1986 It was both a naive and simplistic search for the holy grail of what made entrepreneurs the way they are However many of the researchers in this volume have never gave up the belief that a better understanding of the mind of the entrepreneur would give us a better understanding of the processes that lead to the creation of new ventures **Entrepreneurs Who Changed**

Management Entrepreneurs are among the primary shapers of our culture yet their role in driving progress and influencing society has often been overlooked As far back as we can trace human history there have been entrepreneurs Almost five millennia ago copper tool manufacturers set up a factory in what today is southwest Spain profiting for hundreds of years from trade around the Mediterranean Papyri document the diverse investments of an ancient Egyptian businessperson from grain yielding land to flax for linen cloth What do these figures have in common with renowned modern entrepreneurs and how do their similarities help us achieve a deeper understanding of entrepreneurship as well as the potential for a healthier wealthier and more equitable and sustainable future Derek Lidow delves into the deep history of innovation to deliver essential new insights into how entrepreneurs create value and bring about change Telling the captivating stories of people from many different cultures over thousands of years he shows how entrepreneurs transform the world through relentless innovation Lidow demonstrates that far from being heroic lone individuals they copy and then add to the inventions of others

The cumulative innovations of swarms of entrepreneurs expand the scale scope and range of products and services Lidow emphasizes how entrepreneurship can harm society as well as benefit it and he underscores ways to mitigate its harmful side and harness its positive effects By highlighting the fundamental qualities of innovation throughout history this book provides indispensable new perspective on how it is shaping our present and future

sought help from his pastor who connected him with Christian executives who were using the Bible to run their businesses. These contacts yielded a biblical foundation for leadership based on Isaiah 9:6-7a. Three aspects of this scripture are very important: Son, Government, and Promises. Son refers to Jesus, Government refers to how we lead, and the Promises are wonderful: counselor, mighty God, everlasting Father, and Prince of Peace. Acting on the advice of the Christian executives and his newfound way of understanding God's Word, Mr. Cooper developed and implemented seven Compelling Leadership Principles, applying them to the turnaround challenge. The holy grail of superior business results, employee engagement, was maximized. All business functions under Mr. Cooper's leadership started to coalesce and create as never before, and real teamwork was achieved. For example, the engineering team was awarded over 100 patents in 18 months. This book tells the story of how the principles were applied and details the amazing transformative achievements of the business and its employees. Prior to developing this book, Mr. Cooper had completed an engineering degree and an executive development MBA in economics. Management experience included all conventional business components while working at several major corporations. As a student and practitioner of leadership, he was always looking for the best way to lead his organizations. After leaving industry, he taught in several colleges in Florida, North Carolina, and Delaware. From his industry experience, especially the challenge to launch a business in eighteen months or be let go, he created a college course demonstrating the practical application of his Compelling Leadership Principles. Mr. Cooper continues to seek teaching opportunities and offer help to small businesses.

The Making of Migrant Entrepreneurs Dominic Zimmermann,2016-02-02 Given the diversification of global migration patterns the increased importance attributed to knowledge and innovation for economic development and the rise of social policy regimes that emphasise self responsibility migrant entrepreneurship has become a widely discussed form of migrant incorporation in both policy and social sciences Particularly in North America and Europe policy advisors have drafted special programmes and regulations aimed at self employed migrants while social scientists have also come up with a vast body of research although it has not been exempt from certain controversies and biases Migrant entrepreneurship has frequently been associated either with rags to riches success stories or with unremunerative hard work and marginalised social positions Also a great deal of research has strongly and consistently focused on entrepreneurial cultures and ethnic

bonds related to ethnic entrepreneurship and consequently other forms of migrant self employment have been given only given scant attention Yet more recently other aspects including institutional embeddedness and gender have become important focal points of research studies and have opened up new promising avenues to explore the phenomenon This book offers a comprehensive up to date overview of the research area covering migrant entrepreneurship and self employment in addition to investigating the skills of migrant entrepreneurs departing from the question which migrants become self employed the highly skilled ones due to their excellence or the ones with a low skill endowment because they cannot find a satisfying employment in the labour market Moreover the included case study on highly skilled Peruvian migrant micro entrepreneurs in Switzerland demonstrates the complex interplay of elements at work before and during the business foundation such as an unsatisfying socio economic integration the search for social recognition and agency the reconfiguration of gender roles and the availability of resources to exploit transnational business opportunities
