Del Rocío Vallejo-Alegre,2021-07-18 You have learned two words in a second language just by reading the title of the book Think about that for a moment and reflect upon your prior foreign language experiences Often students enter language classes with previously acquired skills be they from secondary school or another college Many say I have studied Spanish for years and don t know how to speak or write it while others are a bit anxious about taking a second language for the first time but all are overwhelmed by the expensive textbooks and online packages that don t seem to be practical or relevant We sought to change these common complaints by creating

materials that take a new approach to learning a second language based upon the skills that we deem most useful and that will enable our students to confidently express themselves in Spanish The text is designed for beginning Spanish language students The pedagogical approach incorporates the flipped classroom methodology The text is supplemented by various presentations and videos that are freely available at <https://milnepublishing.geneseo.edu/yopuedo1>

**Your Inner Fish** Neil Shubin, 2009-01-06 The paleontologist and professor of anatomy who co-discovered Tiktaalik the fish with hands tells a compelling scientific adventure story that will change forever how you understand what it means to be human Oliver Sacks By examining fossils and DNA he shows us that our hands actually resemble fish fins our heads are organized like long extinct jawless fish and major parts of our genomes look and function like those of worms and bacteria Your Inner Fish makes us look at ourselves and our world in an illuminating new light This is science writing at its finest enlightening accessible and told with irresistible enthusiasm

**Decarbonizing Development** Marianne Fay, Stephane Hallegatte, Adrien Vogt-Schilb, Julie Rozenberg, Ulf Narloch, Tom Kerr, 2015-06-09 The science is unequivocal stabilizing climate change implies bringing net carbon emissions to zero This must be done by 2100 if we are to keep climate change anywhere near the 2°C warming that world leaders have set as the maximum acceptable limit Decarbonizing Development Three Steps to a Zero Carbon Future looks at what it would take to decarbonize the world economy by 2100 in a way that is compatible with countries' broader development goals Here is what needs to be done Act early with an eye on the end goal To best achieve a given reduction in emissions in 2030 depends on whether this is the final target or a step towards zero net emissions Go beyond prices with a policy package that triggers changes in investment patterns technologies and behaviors Carbon pricing is necessary for an efficient transition toward decarbonization It is an efficient way to raise revenue which can be used to support poverty reduction or reduce other taxes Policymakers need to adopt measures that trigger the required changes in investment patterns behaviors and technologies and if carbon pricing is temporarily impossible use these measures as a substitute Mind the political economy and smooth the transition for those who stand to be most affected Reforms live or die based on the political economy A climate policy package must be attractive to a majority of voters and avoid impacts that appear unfair or are concentrated on a region sector or community Reforms have to smooth the transition for those who stand to be affected by protecting vulnerable people but also sometimes compensating powerful lobbies
