Passing Down the Farm Donald J. Jonovic, Wayne D. Messick, 1991 **Passing Down the Farm** Donald J. Jonovic, Wayne D. Messick, 1986 *Talking the Talk* Adrienne Patrice Lamberti, 2007

The 1990s were a hurricane of change for American farming and the Beginning Farmer Center BFC was caught in the storm Today s successful farmer must learn modern professional communications to survive in a world of corporate farming globalisation and government over regulation This significant new book presents a cogent analysis of far reaching changes rocking the heartland of America *Your Estate Matters* Patti S. Spencer, Esq., 2015-01-13 Patti Spencer has learned everything there is to know on this subject and has written down a good bit of it in this book This is a tremendous help to individuals as they try to sort out their estate and tax planning needs Matthew J Creme Jr Partner at Nikolaus Hohenadel LLP Former President of the PA Bar Association When it comes to estate planning and tax law there s simply no one better than Patti Spencer She demystifies estate planning in a way that is accessible for all Known for her no nonsense style and humor this book is a must have for anyone making their estate plans or just trying to understand the process Samuel Bressi President CEO of Lancaster County Community Foundation I have read Patti Spencer s newspaper column on a weekly basis for several years now and never tire of learning more about estate planning and tax law Patti manages to take complicated issues and reduce them to their simplest form David Griffith Former Business Editor at Intelligencer Journal We don t intend to neglect our estate and financial plans but it is so easy to be overwhelmed with conflicting financial advice *Your Estate Matters* will bring clarity to those pesky rapidly changing tax laws and will provide you with the accurate information you need to properly manage your estate *Your Estate Matters* offers a practical down to earth approach that explains the ins and outs of estate planning tax savings and other issues that directly affect your family s pocketbook income tax living wills trusts prenuptial agreements college savings and retirement planning If you want to stay ahead of the curve are ready to plan your own estate have aging parents or have recently retired this is the book you need to read *Holding Our Ground* Deborah Bowers, Tom Daniels, 1997-03-01 Farmers who own or rent most of the private land in America hold the key not only to the nation s food supply but also to managing community growth maintaining an attractive landscape and protecting water and wildlife resources While the issue of protecting farmland and open space is not new the intensity of the challenge has increased Farmers are harder pressed to make a living and rural and suburban communities are struggling to accommodate increasing populations and the development that comes with them *Holding Our Ground* can help landowners and communities devise and implement effective strategies for protecting farmland The book discusses the reasons for protecting farmland and how to make those reasons widely known and understood describes the business of farming federal government farm programs and the role of land in farmers s decisions analyzes federal state and local farmland protection efforts and techniques explores a variety of land protection options including purchase of development rights transfer of development rights private land trusts and

financial tax and estate planning reviews the strengths and weaknesses of the farmland protection tools available The authors describe the many challenges involved in protecting farmland and explain how to create a package of techniques that can meet those challenges In addition they offer appendixes with model zoning ordinances nuisance disclaimers conservation easements and other documents that individuals and communities need to carry out the programs discussed Holding Our Ground provides citizens elected officials planners and landowners with a solid basis for understanding the issues behind farmland protection and will be an invaluable resource in developing techniques and programs for achieving long term protection goals

Local Food Systems in Old Industrial Regions Jay D. Gatrell, Paula S. Ross, 2016-05-06 In recent years there has been an explosion of interest in local food systems among policy makers planners and public health professionals as well as environmentalists community developers academics farmers and ordinary citizens While most local food systems share common characteristics the chapters in this book explore the unique challenges and opportunities of local food systems located within mature and or declining industrial regions Local food systems have the potential to provide residents with a supply of safe and nutritious food such systems also have the potential to create much needed employment opportunities However challenges are numerous and include developing local markets of a sufficient scale adequately matching supply and demand and meeting the environmental challenges of finding safe growing locations Interrogating the scale scope and economic context of local food systems in aging industrialized cities this book provides a foundation for the development of new sub fields in economic urban and agricultural geographies that focus on local food systems The book represents a first attempt to provide a systematic picture of the opportunities and challenges facing the development of local food systems in old industrial regions

The Farmer's Lawyer Sarah Vogel, 2021-11-02 With a new foreword by Willie Nelson An exquisitely written American saga Sarah Smarsh The remarkably well told and heartfelt John Grisham story of a young lawyer s impossible legal battle to stop the federal government from foreclosing on thousands of family farmers In the early 1980s farmers were suffering through the worst economic crisis to hit rural America since the Great Depression Land prices were down operating costs and interest rates were up and severe weather devastated crops Instead of receiving assistance from the government as they had in the 1930s these hardworking family farmers were threatened with foreclosure by the very agency that Franklin Delano Roosevelt created to help them Desperate they called Sarah Vogel in North Dakota Sarah a young lawyer and single mother listened to farmers who were on the verge of losing everything and inspired by the politicians who had helped farmers in the 30s she naively built a solo practice of clients who couldn t afford to pay her Sarah began drowning in debt and soon her own home was facing foreclosure In a David and Goliath legal battle reminiscent of A Civil Action or Erin Brockovich Sarah brought a national class action lawsuit which pitted her against the Reagan administration s Department of Justice in her fight for family farmers Constitutional rights It was her first case A courageous American story about justice and holding the powerful to account The Farmer s Lawyer shows how the farm economy we all

depend on for our daily bread almost fell apart due to the willful neglect of those charged to protect it and what we can learn from Sarah's battle as a similar calamity looms large on our horizon once again *Rural Development Perspectives*, 1995

A Revolution Down on the Farm Paul K. Conkin, 2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing no industry is more important than agriculture Humans have been farming for thousands of years and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries In 1900 30 million American farmers tilled the soil or tended livestock today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century Fifty years ago the planet could not have sustained a population of 6.5 billion now commercial and industrial agriculture ensure that millions will not die from starvation Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929 with U.S. farmers leading the way Productivity on American farms has increased tenfold even as most small farmers and tenants have been forced to find other work Today only 300,000 farms produce approximately ninety percent of the total output and overproduction largely subsidized by government programs and policies has become the hallmark of modern agriculture *A Revolution Down on the Farm: The Transformation of American Agriculture since 1929* charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences He examines the history of American agriculture showing how New Deal innovations evolved into convoluted commodity programs following World War II Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come Although the increased production and mechanization of farming has been an economic success story for Americans the costs are becoming increasingly apparent Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced environmental problems that are still being discovered *A Revolution Down on the Farm* concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large-scale mechanized, subsidized, and fossil-fuel and chemically dependent system

Farming for Us All Michael Mayerfeld Bell, 2024-02-20 Climate change Habitat loss Soil erosion Groundwater depletion Toxins in our food Inhumane treatment of farm animals Increasing farm worker exploitation Hunger and malnutrition in the midst of plenty What will it take for farmers in the United States to embrace sustainable practices Michael Mayerfeld Bell's *Farming for Us All* first tackled this question twenty years ago providing crucial insight into how the structure of U.S. agriculture created this situation and exploring by contrast the practices of

farmers who are working together to radically change how they think learn and grow This updated edition of his now classic work reflects on the lessons learned over the past two decades Constrained by an oppressive nexus of markets regulations subsidies and technology farmers find themselves undermining their own economic and social security as well as the security of the land Bell turns to Practical Farmers of Iowa PFI that state s largest sustainable agriculture group He traces how PFI creates an agriculture that engages others farmers researchers officials and consumers in a common conversation about what agriculture could look like Through dialogue PFI members crossbreed knowledge discovering pragmatic solutions to help crops grow in ways that sustain families communities societies economies and environments Farming for Us All makes the case that for sustainable farming to flourish new social relations are as important to cultivate as new crops This book is necessary and hopeful reading for anyone concerned about the present and future of food and farming

Recommendations and Reports Administrative Conference of the United States,1968 Beyond The Amber Waves Of Grain Paul Lasley,2021-11-28 This book explores the large scale impacts of economic restructuring in the Midwest in response to the 1980s farm crisis Drawing upon detailed surveys from twelve north central states the authors offer a comprehensive view of farm restructuring and its social economic and political consequences The study goes beyond the farm gate to look at the broader implications of those changes for agriculture policy related industries and areas still dependent upon farming contributing to the literature on economic restructuring Like the factory closings in the Rust Belt the dramatic failure of agricultural industries in the Farm Belt has caused fundamental changes in the organization and control of production The impact of job losses and economic depression and the shattering of a way of life have shaken public complacency about the stability of many fundamental American myths Beyond the Amber Waves of Grain looks at the farm crisis not as a purely agricultural nonurban issue but as one that adds to our understanding of the overall social impacts of economic change The book takes up the story of Midwestern farm enterprises in the wake of the farm crisis of the 1980s Using data drawn from detailed surveys of 3 940 farm households in twelve north central states the authors offer a comprehensive view of the social and economic restructuring of agriculture and explore the consequences for farm enterprises farm households and farming communities The study goes beyond the farm gate to look at the broader implications for related industries and communities dependent upon farming for agricultural and rural policies and for farm women and men contributing to the literature on economic restructuring and its outcomes **The Farmer-lender**
