Multiculturalism without Culture Anne Phillips,2009-02-17 Public opinion in recent years has soured on multiculturalism due in large part to fears of radical Islam In Multiculturalism without Culture Anne Phillips contends that critics misrepresent culture as the explanation of everything individuals from minority and non Western groups do She puts forward a defense of multiculturalism that dispenses with notions of culture instead placing individuals themselves at its core Multiculturalism has been blamed for encouraging the oppression of women forced marriages female genital cutting school girls wearing the hijab Many critics opportunistically deploy gender equality to justify the retreat from multiculturalism hijacking the equality agenda to perpetuate cultural stereotypes Phillips informs her argument with the feminist insistence on recognizing women as agents and defends her position using an unusually broad range of literature including political theory philosophy feminist theory law and anthropology She argues that critics and proponents alike exaggerate the unity distinctness and intractability of cultures thereby encouraging a perception of men and women as dupes constrained by cultural dictates Opponents of multiculturalism may think the argument against accommodating cultural difference is over and won but they are wrong Phillips believes multiculturalism still has an important role to play in achieving greater social equality In this book she offers a new way of addressing dilemmas of justice and equality in multiethnic multicultural societies intervening at this critical moment when so many Western countries are poised to abandon multiculturalism

**Race or Ethnicity?** Jorge J. E. Gracia, 2018-07-05 What is race What is ethnicity Should we think of them as identities Can they be effectively individuated How are they related How do the relations between them influence pressing issues concerned with social identity gender racism assimilation exploitation justice the law and public policy And how are the answers to these questions affected by the Black and Latino experience in the United States From the Preface This collection of new essays

explores the relation between race and ethnicity and its social and political implications Although much work has been done on the philosophy of race in the past century in the United States the concept of ethnicity has only recently awoken the interest of American philosophers and the relations between race and ethnicity remain largely unexamined The discussion is divided into two parts dealing on the one hand with the nature and the relation between race and ethnicity and on the other with the social consequences of the complex relations between them Part I explores in particular the debated topic of racial and ethnic identities Does it make sense to speak of racial and ethnic identities and especially of black and Latino identities And if it does make sense how should these identities be conceptualized and how are they related to gender Part II examines how race and ethnicity have influenced the lot of some social groups in significant ways How do racially defined institutions deal with racial assimilation How do different conceptions of race and ethnicity influence public policy and various forms of racism How can exploited racial and ethnic groups be effectively recognized And what is the role of affect in social justice as dispensed by the courts
