The Passion of Music and Dance William Washabaugh, 2020-09-02 The late nineteenth century witnessed the birth and popularization of a number of highly emotional musical styles that played on the eagerness of modern Europeans and Americans to toy with the limits of sanity and to taste the ecstasies of living on the edge This absorbing book explores these popular passionate musical styles which include flamenco tango and rebetika and points out that they arose as well intentioned intellectuals co-opted the emotional experiences most closely associated with women In drawing those experiences out of female practice they defined objectified and turned them into strategies of domination the deepest impact of which was felt ironically by modern women In bridging anthropology sociology cultural media body and gender studies this book broadens the base of theory which has ignored the transnational world of Latin and Mediterranean popular culture and makes a powerful statement about the intersection of nationalism sexuality identity and authenticity

Vallerand, 2015-05-01 Winner of the 2017 APA William James Book Award The concept of passion is one we regularly use to describe our interests and yet there is no broad theory that can explain the development and consequences of passion for activities across people's lives In The Psychology of Passion Robert J Vallerand presents the first such theory providing a complete presentation of the Dualistic Model of Passion and the empirical evidence that supports it Vallerand conceives of two types of passion harmonious passion which remains under the person's control and obsessive passion which controls the person While the first typically leads to adaptive behaviors the obsessive form of passion leads to less adaptive and at times maladaptive behaviors Vallerand highlights the effects of these two types of passion on a number of psychological phenomena such as cognition emotions performance relationships aggression and violence He also discusses the development of passion and reviews a range of literature on passion for activities

Ballroom! Sharon Savoy, 2010-10-31 Dreams are made and broken every year in the dazzling Empress Ballroom at the Winter Gardens in Blackpool England Fierce competition brutal politics and stunning artistry are all on the program at the world's most prestigious competition

In this spellbinding book, Savoy offers a backstage pass to a world where rhinestones and high heels accompany explosive athleticism and staggering talent. With emotionally absorbing and energy-packed prose, she provides an insider's close-up view of all the players who compose this glamorous world that is part dance, part sport, and part art.

Portia, Or, 'By Passions Rocked' Duchess, 1892 Brill's Companion to the Reception of Aristotle's Poetics, 2024-12-16 It is hardly possible to read Aristotle's Poetics today without acknowledging the influence of its reception history; our understanding of Aristotle's poetical theory has been reshaped in past decades thanks to a reappraisal of long-held prejudices whose history may be no less fascinating to explore than the text of the Poetics itself. To grasp what the Poetics has to say therefore involves questioning what its many readers have been looking after. What was the Poetics used for? And what are we using it for now? Into which bodies of texts has it been incorporated and put into perspective? How have these uses and contexts influenced past readings of the Poetics and how do they still inform the way we read it?
